Tradition Azalea

PRICES:

Prices are effective July 1–June 30 and current prices can be obtained from our order forms.

ORDERS:

All orders are acknowledged upon receipt, based on availability and our projections.

Spring orders received by July 31 will receive priority during the acknowledgment process. Spring orders received after July 31 will be acknowledged based on availability.

Spring Final Confirmations will be mailed in early December subject to our crop yield and projection accuracy. Any customer initiated changes for spring shipments should be made by February 1.

SHIPPING:

Our minimum order for delivery is \$3,500. Our minimum shipping quantity is 25 per variety for 1 gallon plants, 10 per variety for 2, 3, & 5 gallon plants, and 5 per variety for 7 gallons and above. All plants are shipped F.O.B., Melfa, Virginia, and freight is due at delivery. All plants are individually tagged with UPC codes. We ship on tractor trailers and will ship partial loads and prorate the shipping costs. Customers are responsible for unloading their own plant material. **TRUCK DRIVERS ARE NOT RESPONSIBLE FOR UNLOADING YOUR ORDER.**

Trees: Spring shipping of deciduous trees starts February 1. Trees grown at our nursery in eastern Virginia break dormancy by mid March. In early springs, this may occur even earlier. We recommend that customers take delivery of their fruit trees as early as possible. After trees break dormancy, their roots are very susceptible to freeze injury and they should be protected after shipment when sub-freezing temperatures are expected.

Shrubs: All shrubs are shipped on shelved trucks to minimize damage. We start shipping shrubs mid March.

Roses: We ship garden roses April 10 to Mother’s Day. Roses should be pre-booked before October 1 for best selection.

TERMS AND CONDITIONS OF SALE

TERMS:

New accounts are shipped C.O.D. To established accounts, the terms will be net 30 days. Past due accounts will be charged 1-1/2% monthly service charge. We accept Master Card, Visa, American Express and Discover and users will be charged a 3% convenience fee.

DELINQUENT ACCOUNTS:

In the event suit or legal action is instituted on any past due account, we reserve the right to seek recovery for all interests, costs, and attorney fees upon trial or any appeal thereafter. We also reserve the right to require that the venue for any such suit or action shall be Accomack County, Virginia, and the substantive and procedural law of the Commonwealth of Virginia shall apply.

CONDITIONS:

All orders are subject to crop yield, climatic conditions and other factors beyond our control. We will exercise care to have all varieties true to name. We warrant all stock to be healthy at the time of shipment. The purchaser assumes all risks after stock is delivered to the carrier. All complaints must be made to the carrier when the stock is delivered and indicated in writing on the Shipping Receipt. There is no further warranty, expressed or implied. In any event, our liability is limited to replacing plants free or refunding purchase price.

VOLUME DISCOUNTS

The following discounts are earned based upon total purchases during a calendar year. The discount percentage is deducted from the invoice as a line item. We will rebate all discounts as they are earned throughout the year. Accounts must be paid within specified terms to receive these discounts.

\$100,000 or greater	18%

Yaku Prince Rhododendron

GRASSES

KARL FOERSTER FEATHER REED GRASS – *Calamagrostis x acutiflora* 'Karl Foerster'. Deep green, cool season, clump forming grass. Feathery flowers are bright pink-red and fade to buff. Foliage 2½'-3½', blooms 6'. Zone 4.

OVERDAM VARIEGATED FEATHER REED GRASS *Calamagrostis x acutiflora* 'Overdam'. Nicely variegated with vertical white stripes. Compact clumps 2-3' with blooms 6'. Zone 4.

BLUE DUNE LYME GRASS – *Leymus arenarius* 'Blue Dune'. Pointed blue foliage that is drought and salt tolerant. Narrow, spiked inflorescence turns light beige. Foliage 2-3', blooms 3-4'. Zone 4.

LITTLE ZEBRA GRASS – *Miscanthus sinensis*. PP13,008. This is a shorter and more upright grass and it keeps its yellow banded color all season. Flowers late summer and has winter appeal. Foliage height 3-4' with 1' plumes. Zone 5.

DIXIELAND MAIDEN – *Miscanthus sinensis* 'Dixieland'. A compact, variegated *Miscanthus*. Lovely pink tinged plumes rise above dramatic variegated foliage. 2'-3' wide x 3'-4' tall when in bloom. Appreciates a full day of sun. Zone 4.

MAIDEN GRASS – *Miscanthus sinensis* 'Gracillimus'. A tall, graceful, clumping grass with slender, weeping, silvery green leaves. White plumes are fan shaped. Foliage 5', blooms 7'. Zone 5.

PORCUPINE MAIDEN GRASS – *Miscanthus sinensis* 'Strictus'. Upright grass with green and yellow horizontal bands. Reddish blooms in Sept. Foliage height is 4-5', with blooms 6-7'. Zone 5.

VARIEGATED JAPANESE SILVER GRASS – *Miscanthus sinensis* 'Variegatus'. The thin bladed, green and white variegated leaves give this grass its stately, vase-like appearance. Creamy-pink plumes appear in late summer. Foliage height 4-5', with blooms 6-7'. Zone 4.

NORTHWIND PANICUM – *Panicum virgatum* 'Northwind'. An ornamental grass with sturdy stems that stay upright. An excellent vertical accent in the landscape. Foliage emerges in shades of olive to blue-green and turn yellow as autumn approaches. Open and airy panicles produce showy seed heads which attract birds and add interest to the winter garden. Compact and clumping. Good for areas where erosion may occur. 4'-6' in height x 2'-3' wide. Zone 4.

CASSIAN FOUNTAIN GRASS – *Pennisetum alopecuroides* 'Cassian'. A lovely ornamental grass with showy pink tinged blooms. This ornamental grass performs nicely in full sun or part shade. Good focal interest when planted near pools or ponds. Overall height and spread 2'-2 ½'. Zone 5.

FOUNTAIN GRASS – *Pennisetum alopecuroides*. Slender green leaves turn golden yellow in the fall. Beautiful silvery foxtail flower plumes from July–September. Foliage height is 2-3', with blooms 3-4'. Zone 5.

NATIONAL ARBORETUM BLACK FLOWERING FOUNTAIN GRASS – *Pennisetum alopecuroides* 'National Arboretum'. Glossy green leaves form a neat mound that produces dark purple flowers. Foliage height is 2', with blooms 3'. Zone 5.

KARLEY ROSE FOUNTAIN GRASS – *Pennisetum orientale* 'Karley Rose'. Grass is clumping, with graceful, arching, blue-green blades. Purple foxtail flowers form late spring into fall. Foliage height is 16-18", with blooms 3-4'. Zone 6.

STANDING OVATION BLUESTEM – *Schizachyrium scoparium* 'Standing Ovation'. PP25,502. It's all about color! Stems are a spiky bluish-green turning brilliant, fiery shades of orange, red and yellow in the fall. Seed heads are an excellent food source for birds. Tight and upright habit. Mature at 3', 4' when in flower. Zone 3.

'TWILIGHT ZONE' LITTLE BLUESTEM – *Schizachyrium scoparium* 'Twilight Zone'. PP27,432. Its sturdy upright bluish green foliage takes on a silvery mauve color at the tips in midsummer, turning to purple in fall creating all-season interest. Matures at 3', 4' when in bloom, with a 20" spread. Zone 3.

Mixed selection of ornamental grasses

EVERGREEN AZALEAS

DELAWARE VALLEY WHITE

Large, pure white, single flowers. Mid-season bloomer. Joseph Gable hybrid. Zone 5.

ELSIE LEE

Semi-double, ruffled, lavender flowers. Upright grower. Late bloomer. Shammarello hybrid. Zone 5.

FLAME CREEPER

Orange flowers. Low spreading habit with needle-like foliage. Late. Zone 5.

GIRARD'S CRIMSON

Bright, crimson-red flowers. Medium height. Mid-season bloomer. Girard hybrid. Zone 5.

GIRARD'S FUCHSIA

Large, reddish-purple flowers with wavy petals adorn this compact grower. Mid-season bloomer. Girard hybrid. Zone 5.

GIRARD'S ROSE

Large, single red flowers. Dark-red winter color. Mid-season bloomer. Girard hybrid. Zone 5.

GLORIA

Hose-in-hose, salmon-pink flowers. Tall grower. Late bloomer. Bobbink and Atkins hybrid. Zone 5.

GUMPO PINK

Dwarf habit with large, single pink flowers. Late. Satsuki. Zone 6.

GUMPO WHITE

Dwarf habit with large, single white flowers. Late. Satsuki. Zone 6.

HARDY GARDENIA

White, double gardenia type flowers. Mid-season bloomer. Linwood Hardy hybrid. Zone 6.

HELEN CURTIS

Small, semi-double white flowers. Compact growth habit. Late bloomer. Shammarello hybrid. Zone 5.

HERBERT

Vivid reddish-purple, hose-in-hose frilled flowers. Spreading habit is low to medium in height. Mid-season bloomer. Gable hybrid. Zone 5.

HINO CRIMSON

Single crimson flowers, small rounded leaves. Early bloomer. Kurume hybrid. Zone 5.

HOT SHOT

Orange-red single flowers. Foliage has good winter color. Mid-season bloomer. Girard hybrid. Zone 5.

JOHANNA

Striking, bright red single flowers. Foliage is dark green turning dark red in the winter. Mid-season bloomer. Vuyk hybrid. Zone 5.

KAEMPO

Deep pink single flowers. Very compact habit. Late. Satsuki hybrid. Zone 5.

KARENS

Reddish-purple flowers. Medium growth habit. Early bloomer. Gable hybrid. Zone 5.

MACRANTHA

Dark-salmon double flowers. Medium habit. Late. Satsuki. Zone 6.

MICHAEL HILL

Medium pink, single frilled flowers. Low compact habit. Very late bloomer. North Tisbury hybrid. Zone 6.

NANCY OF ROBIN HILL

Pale pink double flowers. Late bloomer. Robin Hill hybrid. Zone 6.

PLEASANT WHITE

Single white flowers can reach 3" in diameter. Habit is large and spreading. Late bloomer. Girard hybrid. Zone 5.

POUKHANENSE

Purple, single, semi-deciduous flowers. Loose open habit. Early bloomer. Poukhanense species. Zone 5.

RENE MICHELLE

Deep pink single flowers. Good foliage. Mid-season bloomer. Girard hybrid. Zone 5.

ROSEBUD

Pale pink rose-like flowers. Upright grower. Late bloomer. Gable hybrid. Zone 5.

ROYALTY

Vivid deep purple flowers. Vigorous spreading habit. Mid-season bloomer. Gable hybrid. Zone 5.

SIR ROBERT

Pale-pink flowers. Mounded, compact habit. Very late bloomer. Robin Hill hybrid. Zone 6.

STEWARTSTONIAN

Brick-red flowers. Tall habit. Mid-season bloomer. Gable hybrid. Zone 5.

TRADITION

Hose-in-hose pink flowers. Vigorous grower. Mid-season bloomer. Kurume hybrid. Zone 5.

ENCORE® AZALEAS

AUTUMN BRAVO®

PP11,628. Putting on quite a show, this Encore® selection sports 2" single, blazing red blooms complimented by dark green foliage. Mature at 4' tall x 4 ½' wide. Zone 6.

AUTUMN CARNATION™

PP15,339. Now gardeners can enjoy in spring, summer, and fall the rich medium pink blooms seen once a year on the Pink Ruffle azalea. The exceptional flower quality, color and lustrous dark green foliage make this variety an excellent landscape addition. Mature size 4-5' H x 4' W. Zone 6.

AUTUMN CARNIVAL®

PP12,111. Excellent contrast plant. Fluorescent 2½" pink blooms are stunning against deep green foliage. Compact habit. Mature at 3' tall by 3½' wide. Zone 6.

AUTUMN FIRE™

PP28,279. True red 2½" blooms in spring, summer and fall. Glossy green foliage intensifies to purple bronze hues in winter. Slow growing. Can be maintained at 2'-3' tall by 3' wide. Zone 6.

AUTUMN JEWEL®

PP25,074. Year-round color with pink blooms in spring, summer and fall and attractive purple foliage in winter. Mature at 4' tall and wide. Zone 6.

AUTUMN LILY™

PP25,073. White blooms with an occasional single purple stripe are a classic compliment to the deep green foliage of this reblooming azalea. A good choice for mass and foundation plantings. One of the most cold hardy in the Encore® azalea series. Mature at 5' x 4'. Zone 6.

AUTUMN ROYALTY™

PP10,580. A robust upright variety with deep green foliage and large, rich purple blooms, Autumn Royalty was voted Azalea of the Year by the American Rhododendron Society. Mature size 4-5' H x 4' W. Zone 6.

AUTUMN SANGRIA™

PP15,077. With one of the largest blooms in the Encore® Azalea collection, an especially dense growth habit and a gorgeous dark pink and green color combination, Autumn Sangria is well suited as a specimen or a foundation planting. Mature size 4-5' H x 4' W. Zone 6.

AUTUMN SUNBURST®

PP25,072. A compact plant with nice dark green foliage. Profuse blooms of coral with ruffled white edges in spring and fall. Mature 3' tall x 3½' wide. Zone 6.

AUTUMN SUNSET™

PP16,248. The blooms of this Encore® variety pay homage to the vivid orange-reds of spectacular sunsets. With its deep green foliage, Autumn Sunset™ makes a significant color impact in any garden setting. Mature size 4' H x 3-4' W. Zone 6.

AUTUMN TWIST™

PP12,133. Amidst the unique white and purple striped blooms an occasional, completely purple bloom will appear. Combined with its beautiful dark green foliage, Autumn Twist's unique color pattern makes this variety a festive and fast growing addition to any garden. Mature size 4-5' H x 4' W. Zone 6.

PERFECTO MUNDO® REBLOOMING AZALEAS

PERFECTO MUNDO® DOUBLE PINK

A neat rounded reblooming azalea with subtle pink flowers. Blooms in spring and fall. Mature at 2'-3' tall and wide. Zone 6.

PERFECTO MUNDO® DOUBLE DARK PINK

- A reblooming azalea with lovely dark pink flowers. Blooms in spring and again in fall until frost. Resistant to lacebugs. Mature at 2½'-3 x 3'-4'. Zone 6.

PERFECTO MUNDO® DOUBLE WHITE

- A reblooming azalea with double white flowers. Blooms in spring and again in fall. Mature at 2½'-3' x 3'-4'. Zone 6.

PERFECTO MUNDO® DOUBLE PURPLE

- A mounded reblooming azalea with ruffled, deeply-saturated purple flowers. Blooms in spring and in fall. Mature at 2½'-3' x 3'. Zone 6.

PERFECTO MUNDO® ORANGE

A reblooming blazingly brilliant orange flowering evergreen azalea. Resistant to lacebugs. Mounded habit, mature at 2½' tall x 3-4' wide. Zone 6.

PERFECTO MUNDO® PINK CARPET®

A dwarf, wider than tall, reblooming azalea with light pink flowers. Blooms in spring and again in late summer until fall. Resistant to lacebugs. Mounded habit, mature at 2' x 2-3' wide. Zone 6.

PERFECTO MUNDO® RED

A reblooming azalea with rich red flowers. Blooms in spring and again in fall. Resistant to lacebugs. Mature at 2½' x 3'-4'. Zone 6.

ARONIA

LOW SCAPE® MOUND CHOKEBERRY

A. melanocarpa. PP28,789. Royalty charge \$.50. A low growing groundcover shrub with glossy-green leaves which in spring is covered in dainty white flowers. By fall, the flowers have turned into dark purple-black fruit which contrasts nicely with brilliant red foliage. Tough, tolerant and tidy. Thrives in most conditions. Mounded habit, mature at 1'-2'. Zone 3.

BERBERIS

CONCORDE JAPANESE BARBERRY

B. thunbergii f. atropurpurea 'Concorde'. An excellent choice for containers or small gardens. This dense and compact dwarf has deep maroon-purple foliage which intensifies in the fall before dropping. A few bright red berries may follow the small yellow flowers. Little to no viable seed produced. Mature at 18"-24" tall and wide. Zone 4.

ROYAL BURGUNDY® - *B. thunbergii* 'Gentry's Cultivar'. PP9,461. Royalty charge 35¢. Fine textured, petite, deep maroon foliage. A true dwarf that requires little to no pruning. Mature 5'. Zone 4.

BUDDLEIA

LO & BEHOLD® 'PINK MICRO CHIP'

B. 'Pink Micro Chip'. PP26,547. A small plant, which has a look of salvia because of its uniquely colored blooms, with the long blooming habit of a buddleia. Mature at 1.5' - 2' tall and wide. Royalty charge \$.50. Zone 5.

LO & BEHOLD® 'PURPLE HAZE'

B. hybrid. PP24,514. Royalty charge \$.50. Uniquely horizontal branches produce an abundance of dark purple-blue flowers. Fragrant purple-blue flowers radiate outward and downward like a pinwheel, and are continuous from mid-summer to frost. Spreading habit. Non-invasive. Attractive to butterflies and hummingbirds, but not to deer. Mature height 3'. Zone 5.

MISS MOLLY – *B. hybrid*. PP23,425.

Royalty charge \$.50. A vibrant focal point which attracts butterflies and hummingbirds to the summer garden. Fragrant flowers are a rich sangria red color. A nice selection in a mixed border or wildlife garden. Resists deer. Height and spread, 4' - 5'. Zone 5.

PUGSTER® AMETHYST

B. x 'SMNBDL'. PP30,236. Large and full, amethyst toned flowers have a tiny yellow-orange eye in the center. This compact buddleia seems much larger because of its thick stems and full, non-stop flowers from early summer through frost. Mature at 2' tall and 2' wide. Royalty charge \$.50. Zone 5.

PUGSTER® BLUE – *B. 'SMNBDBT'*.

Described as a better blue, this stocky buddleia is adorned with enticing dark violet-blue flower heads. Reblooms in summer. Mature at 2' x 2'. Royalty charge \$.50. Zone 5.

PUGSTER® PERIWINKLE – *B. davidii*. 'SMNBDO'. PP28,796. CPBRAE.

A compact Butterfly bush with true soft lavender blooms. Its small size makes it a perfect choice for flower beds or perennial gardens. Provides long season bloom and is an excellent host for bees and butterflies. Mature at 2' tall x 2' - 3' wide. Royalty charge \$.50. Zone 5.

PUGSTER® PINKER – *Buddleia x 'SMNBDB'*. PP33,565. Full-sized rich pink flower spikes on a dwarf plant.

Flowers have a tiny orange eye. Thick stems improve winter hardiness. Non-stop bloom summer until frost. Attractive to bees and butterflies. Mature 2' tall x 2½' wide. Royalty charge \$.50. Zone 5.

PUGSTER® WHITE – *B. davidii*.

'SMNBOW'. PP28,795 CPBRAE. A compact butterfly bush with clean white blooms. Its small size makes it a perfect choice for flower beds or perennial gardens. Provides long season bloom and is an excellent host for bees and butterflies. Mature at 2' tall x 2' - 3' wide. Royalty charge \$.50. Zone 5.

BLACK KNIGHT – *B. davidii*. Very dark purple flowers. Dense habit. Mature height 5-7'. Zone 5.

HONEYCOMB – *B. x weyeriana*. The best yellow flowering buddleia. Mature height 5-6'. Zone 5.

LOCHINCH – *B. fallowiana x B. davidii*. Great silver foliage. Sweetly scented flowers are lavender-blue with orange eyes. Mature height 10'. Zone 6.

NANHO BLUE – *B. davidii var. nanhoensis*. Long blue flower spikes appear from early summer into fall. Compact habit. Mature height 4-5'. Zone 5.

PINK DELIGHT – *B. davidii*. Excellent compact growth, pure pink flowers and attractive silvery foliage make this variety a winner. Mature height 6'. Zone 5.

ROYAL RED – *B. davidii*. Rich purplish-red flowers from July till frost. Mature height 6-8'. Zone 5.

BUXUS

LITTLE MISSY – *B. microphylla 'Little Missy'*. PP24,703. A compact boxwood, with lustrous green foliage and an excellent choice for small spaces. Takes trimming well making it suitable for border hedges and knot gardens. Good resistance to blight and deer. Mature at 2' x 2' tall and wide. Royalty charge \$.50. Zone 5.

GREEN MOUNTAIN – *B. microphylla koreana x B. sempervirens*. This variety is more upright and pyramidal in form with small green leaves. Excellent for hedging. Mature size 5' x 3'. Zone 5.

GREEN VELVET – *B. microphylla koreana x B. sempervirens*. A hardy yet slow grower with dark green leaves and a rounded full bodied form. Excellent retention of green color year round. Mature size 3-4'. Zone 5.

WINTER GEM – *B. microphylla var. japonica 'Winter Gem'*. A hardy small leaf boxwood, excellent for small hedges or formal gardens. In colder climates it can take on a bronze hue in winter, quickly green-ing again in spring. Slow growing and mature at 4-6' tall and wide. Zone 5.

CALLICARPA

EARLY AMETHYST – *C. dichotoma*. Small lavender-pink flowers bloom through summer, later revealing massive amounts of showy lilac berries. Round and bushy habit. Mature size 4' x 4'. Zone 5.

CAMELLIA

APRIL BLUSH CAMELLIA – *C. japonica*. ‘April Blush’ grows into the classic Camellia bush with deep green leaves, shell-pink semi-double blooms. It sets buds freely, and flowers in mid-season. The relatively slow growth guarantees dense leaves and a plant of smaller stature. Mature height 6’-8’. Zone 6.

APRIL DAWN BLUSH CAMELLIA – *C. japonica*. Double, bicolored blooms in light pink with a white border. An occasional deeper stripe adds a lovely highlight. Glossy green foliage, vigorous, upright habit. Mature 5’-8’ tall x 4’ wide. Zone 6.

APRIL DAWN CAMELLIA – *C. japonica*. Variegated double flowers of shell pink and white, blooms throughout the plant mid to late season. This vigorous grower has an upright habit. Mature at 6’-8’ x 5’. Zone 6.

APRIL KISS CAMELLIA – *C. japonica*. ‘April Kiss’. One of the earliest bloomers of the ‘April’ series, it boasts profuse deep rose-pink double flowers. With an upright, moderate growth and a dense, compact habit, it reaches a mature size of 8-10’ tall and 5-6’ wide. Zone 6.

APRIL REMEMBERED CAMELLIA – *C. japonica*. This fast-growing camellia sets lots of buds that bloom from early into late spring. Large semi-double flowers are cream colored with a touch of pink. Slightly weeping. Mature at 10’ x 4’. Zone 6.

APRIL ROSE CAMELLIA – *C. japonica*. This very compact and relatively slow-growing plant has rose-red formal double flowers. The medium sized blooms are very pretty and bloom late in the season. Mature height 6’-8’. Zone 6.

APRIL SNOW CAMELLIA – *C. japonica* ‘April Snow’. Lovely white, rose form double flowers on a compact, relatively slow growing plant. This camellia has a heavy bud-set and blooms in late season. Mature height 8’. Zone 6.

APRIL TRYST CAMELLIA – *C. japonica*. A nicely shaped plant with an abundance of bright red, anemone-form flowers. Blooms mid-season. Upright habit. Mature height 6’-8’. Zone 6.

ARCTIC DAWN CAMELLIA – *C. x ‘Arctic Dawn’*. Large, brilliant coral-pink blooms cover dark evergreen foliage in late winter through mid-spring. Flowers are semi-double to peony in form. Vigorous and upright. Mature at 8’-10’ x 6’-8’. Zone 6.

AUTUMN SPIRIT CAMELLIA – *C. x Autumn Spirit*. In the fall this camellia is covered with pink, small to medium sized, peony-like flowers. An early blooming variety, this vigorous shrub makes a nice addition to any garden. Mature at 5’-6’ tall and wide. Zone 6.

GREENSBORO RED – *C. japonica* ‘Greensboro Red’. Mid-spring single to semi-double red flowers adorn this lustrous, evergreen shrub. A large and upright specimen, mature at 10’-12’ tall x 7’-8’ wide. Zone 7.

PINK PERFECTION CAMELLIA – *C. japonica*. An upright, evergreen, bushy shrub producing a long season of formal, double, medium-sized flowers of the palest shell pink. Its flowers are perfectly formed and are made up of luminous petals that overlap. Mature at 8’- 10’ tall x 6’-8’ wide. Zone 7.

SNOW CHAN – *C. japonica* ‘Snow Chan’. A large shrub bearing beautiful white peony-type flowers with glowing yellow centers in late winter and early spring. Lustrous, dark green foliage makes perfect backdrop for the spectacular flowers. Mature at 10-12’ tall x 8-10’ wide. Zone 6.

SPRING’S PROMISE CAMELLIA – *C. japonica*. An upright and compact camellia that blooms mid season. The rose red single flowers have strong yellow stamens and are slightly fragrant. Mature size is 5’-8’. Zone 6.

TURANDOT – *C. japonica* ‘Turandot’. Glossy dark green foliage provides a classic background for its fully double, rose-red flowers with abundant yellow anthers at their center. Buds are cold tolerant. Mature at 8-15’ tall x 5-8’ wide. Zone 7.

Turandot Camellia

NORTHERN EXPOSURE CAMELLIA – *C. sasanqua*. With its delicate single white blooms and dark green glossy foliage, this beauty is a stand-out in colder climates. It is medium-sized with an upright habit and excellent disease resistance. Blooms in fall. Mature height 5-6’. Zone 6.

PINK SERENADE CAMELLIA – *C. sasanqua*. It has a long lasting show of pink single flowers. The showiness, combined with a strong upright growth habit, makes it a very worthwhile plant for the garden or shrub border. This is one of the earliest sasanquas to start blooming in the fall. Mature height 6-8’. Zone 7.

WINTER’S SNOWMAN CAMELLIA – *C. sasanqua*. ‘Winter’s Snowman’. This tall columnar form is great for tight spaces. Its white 3” diameter anemone-form flowers are striking in winter and early spring. Foliage is emerald green. Mature 12’. Zone 6.

WINTER’S STAR CAMELLIA – *C. oleifera* x *C. hiemalis*. A fall blooming evergreen camellia with violet-pink flowers. Upright, vigorous, yet compact, habit reaching 5’ in height in maturity. Zone 6.

CARYOPTERIS

DARK KNIGHT – *C. x clandonensis*. Compact mounding plant with aromatic foliage and deep blue late summer flowers. Mature size 3' x 4'. Zone 5.

LONGWOOD BLUE – *C. x clandonensis*. Mounded habit with gray-green foliage. Flowers are bluish violet. Mature size 3' x 4'. Zone 5.

Longwood Blue
Caryopteris

CEPHALANTHUS

SUGAR SHACK® BUTTONBUSH – *Cephalanthus occidentalis*. PP26,543. Great plant for wet areas or rain gardens. Fragrant, white, button-like flowers in summer produce red fruit for fall interest. Trim in early spring as the flowers are produced on new wood. Mature at 3'-4' wide and tall. Royalty fee \$.50. Zone 4.

CHAMAECYPARIS

GOLD MOP CYPRESS – *C. pisifera*. A mounding evergreen with golden thread like foliage. Mature height and width 5'-7'. Zone 5.

CLETHRA

HUMMINGBIRD – *C. alnifolia*. Compact summer-sweet with dense mounding habit. White flowers are delightfully fragrant in the summer. Plant is shade tolerant. Mature size 3'-5' x 3'-4'. Zone 3.

RUBY SPICE – *C. alnifolia*. Fragrant, deep-pink flowers bloom in late summer. Dark green foliage. Mature size 3'-6' x 3'-4'. Zone 3.

CORNUS

EUROPEAN VARIEGATED – *C. alba* 'Argenteo-marginata'. This larger ornamental shrub has year round appeal with its summer display of attractive cream and green variegated foliage and winter display of vibrant red branches. Mature 10'. Zone 3.

CORNUS SGT. PEPPER® – *C. alba* 'Verpaalen 2'. PP34,377. The spring variegated foliage is bright green and cream, with pale pink margins, taking on a burgundy and hot pink color in the fall. The stems remain burgundy through the seasons. An excellent plant for breaking architectural and landscape monotony. Mature at 4-6' tall x 6-8' wide. Zone 3.

BAILEYI RED TWIG DOGWOOD – *C. sericea*. A beautiful red stemmed dogwood with medium green foliage and creamy white flowers followed by blue-black fruit. Winter bark color is burgundy. Mature 9'. Zone 3.

YELLOW TWIG DOGWOOD – *C. sericea* 'Flaviramea'. Bright yellow stems on the younger growth of this bushy shrub are very striking during the winter. Flowers are white followed by white fruit. Mature height 9'. Zone 3.

COTINUS

WINECRAFT BLACK SMOKE BUSH – *Cotinus coggygria*. A deciduous shrub with purple-black foliage. Blooms are pink-red and look like rusty smoke hanging over the foliage. An outstanding accent plant for an eclectic garden. Dwarf, upright habit. Mature at 4'-6' tall and wide. Royalty charge \$.50. Zone 4.

DEUTZIA

NIKKO – *D. gracilis*. Noted for its showy display of white flowers in April and May, Nikko is dwarf, dense, rounded and spreading. Flower display is best in full

sun. Plant in masses for an informal hedge or use as an accent plant or focal point in a mixed bed. Deciduous. 1'-2' x 2'-5'. Zone 5.

DIERVILLA

KODIAK® JET BLACK™ – *D. rivularis*. An adaptable low maintenance native, providing interest throughout the growing season with dark, burgundy-black foliage creating an eye-catching contrast against its bright summer yellow flowers. Mature size 3-4'. Royalty charge \$.50. Zone 4.

KODIAK® RED – *D. x splendens*. A native, deciduous, flowering shrub that can tolerate any growing condition. The spring growth emerges with a deep burgundy tone before turning to green with a red edge, then bright red in fall. Clusters of yellow honeysuckle-like flowers adorn the plant throughout the summer. Mature at 3-4' high with a 4-5' spread. Royalty charge \$.50. Zone 4.

EUONYMUS

MANHATTAN – *E. kiautschovicus*. A fast growing semi-evergreen shrub used often in hedges. Glossy dark green foliage. Mature height 6'. Zone 5.

FOTHERGILLA

DWARF FOTHERGILLA – *F. gardenii*. Fragrant white flowers appear on this shrub prior to the leaves. Habit is small with spreading branches. Beautiful orange, red and yellow fall color. Mature size 3' x 3'. Zone 5.

MOUNT AIRY – *F. major*. A vigorous grower that produces an abundance of flowers nestled in the beautiful, dark blue-green summer foliage. Fall colors are yellow-orange-red. Mature height 5-6'. Zone 5.

HIBISCUS

LUNA™ PINK SWIRL – *H. moscheutos*. Compact, well branched, featuring large 8" flowers with a cranberry red center and soft pink and white swirls. Blooms from mid-summer to early fall. Mature at 2-3' tall and wide. Zone 5.

LUNA™ RED – *H. moscheutos*. Compact, 2-3' tall and wide, with 6-8" deep burgundy red flowers. Blooms July to September. Zone 5.

LUNA™ ROSE – *H. moscheutos*. Compact, well branched shrub. Large 8" deep rose-pink flowers with a ruby center adorn this mounded 2-3' shrub from mid-summer to early fall. Zone 5.

LUNA™ WHITE – *H. moscheutos*. A compact, 2-3' shrub covered in large white blooms with ruby red centers from mid-summer to early fall. Zone 5.

SUMMER SPICE® BLEU BRULEE™ – *H. moscheutos*. PPAF. A compact shrub that produces large 8" lilac blue flowers with contrasting red center eyes from mid-summer to early fall. Mature at 3' in height and spread. Zone 5.

HYDRANGEA

See additional tree form hydrangeas in ornamental tree section

ANNABELLE – *H. arborescens*. Big snowball flowers gradually change from green to pure white. Mature height 3-4'. Zone 4.

INCREDIBALL STORM PROOF™ – *H. arborescens*. PP20,571. Abundant globe shaped white blooms on strong stems cover this hardy, resilient shrub. As its name indicates, its sturdy stems stay upright even during inclement weather. It has a dense, mounded habit with a mature size of 4'. Royalty charge \$.50. Zone 3.

BLUE WAVE – *H. macrophylla*. A vigorous shrub with dark green serrate leaves and large clusters of long blooming lace cap summer flowers. Flowers are rich blue in acidic soils and lilac-pink in alkaline. Mature 3-5'. Zone 5.

ECLIPSE® – *H. macrophylla*. PP34,544. Dark, almost brown, leaves keep their color throughout the season, mophead blooms have dark pink florets with a white center. Mature at 3-5' tall and wide. First Editions introduction. Zone 5.

ENDLESS SUMMER® BLOOMSTRUCK® – *H. macrophylla*. PP25,566. 'PIIHM-II'. This introduction offers pink, purple or blue flowers depending on soil pH. Reddish purple stems are showy and strong to support the weight of the large flowers. Mature height 3-4' and width 4-5'. Zone 4.

ENDLESS SUMMER® BLUSHING BRIDE® – *H. macrophylla* 'Blushing Bride'. PP17,169. Dark glossy green foliage makes the perfect backdrop for the beautiful, white mopheads that measure up to 6" across. Mature flowers turn pink or blue depending on soil acidity. Repeat bloomer. Mature height 5'. Zone 4.

ENDLESS SUMMER® SUMMER CRUSH® – *H. macrophylla*. PP30,359. Raspberry to purple flowers are dazzling up close and from a distance. Plump blooms are borne on sturdy stems. This is a compact hydrangea, excellent as a container plant or in multiples in the garden. Mature at 3' tall and wide. Zone 5.

ENDLESS SUMMER® THE ORIGINAL – *H. macrophylla* 'Bailmer'. PP15,298. A mop-head type hydrangea that blooms consistently on both old and new wood, producing 8" diameter flowers all summer. Blooms pink in alkaline soils and blue in acidic soils. Mature height 5'. Zone 4.

ENDLESS SUMMER® POP STAR – *H. macrophylla* 'Bailmacs'x'. PP33,703. A genetically compact hydrangea with blue or pink lace-cap flowers and rich, dark green foliage. Reblooms prolifically. Mature at 1½'-3' tall and wide. Zone 4.

ENDLESS SUMMER® TWIST-N-SHOUT® BIG-LEAF – *H. macrophylla*. PP20,176. 'PIIHM-I'. Sturdy red stems with glossy deep green foliage. Abundant lovely blossoms with lacy centers in pink or blue depending on soil type. Repeat bloomer. Mature height 5'. Zone 4.

LET'S DANCE CAN DO!® – *H. macrophylla* *x serrata*. PP32,548. A reblooming, bigleaf, lacecap hydrangea with flower buds along the length of the stem, not just the top. Flowers are strawberry pink to lavender depending on soil acidity. Mounded habit, mature at 3-4' tall x 3' wide. Royalty charge \$.50. Zone 4.

NIKKO BLUE – *H. macrophylla*. Large blue or deep lavender flower balls. Prolific bloomer. Mature height 6'. Zone 5.

TUFF STUFF AH HA® – *H. serrata*. PP29,832. This reblooming mountain hydrangea is a prolific rebloomer from summer to frost. Waterlily-like florets in blue or pink depending on soil chemistry. A beautiful focal point in any garden and a good choice for cut flowers. Mature at 2'-3' tall and wide. Royalty charge \$.50. Zone 5.

BOBO® – *H. paniculata*. PP22,782. From Belgium, a prolific bloomer with strong stems that support the large white flowers. Royalty charge \$.50. Mature height 2½'-3' and width 3-4'. Zone 3.

FIRE LIGHT® – *H. paniculata*. PP25,135. Thick, sturdy stems with upright panicles packed with pure white to pink florets that transform to a rich pomegranate-red. Extremely hardy. Mature height 4½'-6'. Royalty charge \$.50. Zone 3.

LIMELIGHT™ – *H. paniculata*. PP12,874. An extraordinary hydrangea with bright, beautiful lime-green flowers. This plant adds much needed color in late summer landscape. Royalty charge \$.50. Mature height 6-8'. Zone 3.

Endless Summer® Hydrangea

LIMELIGHT PRIME™ – *H. paniculata*. ‘SMNHPPH’ PP32,511. The next generation of Limelight™ with earlier blooming, bolder and brighter flower color, stronger stems and smaller size. Flowers are greenish-white which become shades of pink and red as they mature. Mature at 4’-6’ x 4’-5’. Royalty charge \$.50. Zone 3.

LITTLE LIME® – *H. paniculata*. PP22,330. PPAF. A dwarf form of the ever popular ‘Limelight’ hydrangea. At one third the size of traditional hardy hydrangeas, this variety fits well into any landscape. Royalty charge \$.50. Mature height 3-5’. Zone 3.

LITTLE LIME PUNCH® – *H. paniculata* ‘SMNHPPH’. PP33,207. Similar to Little Lime® in habit. Flowers emerge green, transitioning to white, light pink and maturing a reddish color. Petite habit with strong flower stems. Mature at 3’-5” tall and wide Zone 3.

LITTLE QUICK FIRE® – *H. paniculata*. PP25,136. Royalty charge \$.50. White flowers emerge in the summer, earlier than other hydrangea selections, then turn to shades of pink. This dwarf shrub is drought tolerant and a good choice for a mixed border or showy specimen plant. Mature at 3’-5’. Zone 3.

PINK DIAMOND – *H. paniculata*. Upright rounded habit with an incredibly large flower. Pink buds open to white and gradually turn rich shades of pink. Mature height 6’. Zone 3.

PINKY WINKY™ – *H. paniculata*. PP16,166. Large, white flower panicles open in mid-to-late summer. Florets on the base of the panicles begin to turn pink as the flower continues to grow, producing new white florets at the tip. Flowers are a beautiful two-tone color that can grow to 16 inches in length. Royalty charge \$.50. Mature height 6-8’. Zone 3.

QUICK FIRE FAB® – *H. paniculata* ‘SMNHPPH’. PPAF. A mophead version of Quick Fire and the earliest to bloom. A large hydrangea with white flowers that age to deep pink and then red. 6’-8’ tall x 5’-6’ wide. Royalty charge \$.50. Zone 3.

ALICE – *H. quercifolia*. Large, oak-like foliage with burgundy fall color. Flowers are large 12” white panicles. Mature height 6-10’. Zone 5.

MUNCHKIN – *H. quercifolia*. N.A. #73,936. A seedling of Sike’s Dwarf, this U.S. National Arboretum introduction is more compact and holds up well following heavy rains. Flowers open white then fade to pale pink. Mature size is 3’ tall x 4-5’ wide. Zone 5.

PEE WEE – *H. quercifolia*. A smaller oakleaf hydrangea with white flowers that fade to pink. Mature height 3-4’ tall x 3-4’ wide. Zone 5.

QUEEN OF HEARTS – *H. quercifolia*. A hybrid oakleaf cultivar from the U.S. National Arboretum (‘Snow Queen’ x ‘Pee Wee’) maturing in a rounded form at 6’ tall and 9’ wide. Upright, 9” long, white conical flowers age to an attractive deep pink. Its large leaves turn to a mahogany red in fall. Zone 5.

RUBY SLIPPERS – *H. quercifolia*. N.A. #74,836. A truly compact oakleaf hydrangea, ‘Ruby Slippers’ is particularly attractive for small residential landscapes. Flowers open white, but quickly turn pale pink and deepend to rose. Foliage is dark green in summer and mahogany-red in fall. Zone 5.

SIKES DWARF – *H. quercifolia*. A dwarf ‘Oakleaf’ hydrangea with an abundance of white flower heads in summer. Mature height 3-4’. Zone 5.

ILEX CRENATA

CRENATA COMPACTA – *I. crenata*. Compact, globose form. Lustrous dark green, obovate leaves. Mature height 5’. Zone 5.

GREEN LUSTRE – *I. crenata*. Broad, open shrub form. Dark green, elliptic foliage. Mature height 4’. Zone 5.

HELLERI – *I. crenata*. Low, dense mounding plant. Very small, dark green leaves. Mature height 4’. Zone 5.

HOOGENDORN – *I. crenata*. Habit is compact and mounding with small, elongated, dark green leaves. Mature height 4’. Zone 5.

SCHWOEBEL’S COMPACTA – *I. crenata*. Dwarf, low, spreading habit. Medium green foliage. Very hardy. Mature height 4’. Zone 5.

SOFT TOUCH – *I. crenata*. Just as the name says – it has a pleasing soft texture! Small, compact globe form with lustrous, dark green foliage. Mature size 2’ x 3’. Zone 6.

SKY PENCIL HOLLY – *I. crenata* ‘Sky Pencil’. An upright columnar holly. Mature height 6-8’. Zone 6.

STEEDS – *I. crenata*. Lustrous, dark green glossy leaves on this upright pyramidal grower. Mature height 6-8’. Zone 5.

STRAIGHT AND NARROW® – *I. crenata* ‘PIIIC-I’. PP29,578. An upright, columnar Japanese holly that holds its shape and does not splay open. Mature at 6’-8’ tall x 2’-3’ wide. Zone 6.

ILEX GLABRA

DENSA – *I. glabra* ‘Densa’. A very nice inkberry holly with a broad, upright habit. Hardy with glossy dark green foliage that holds to ground level. Mature at 3’-4’ tall and wide. Zone 5.

GLABRA COMPACTA – *I. glabra*. Upright, well branched, rounded habit with dark green foliage. Mature height 4-6’. Zone 4.

SHAMROCK – *I. glabra*. A compact, slow growing variety with lustrous, dark green foliage. Mature height 3-4’. Zone 4.

GEM BOX – *I. glabra*. SMNIGAB17. PP27,554. The most compact glabra we grow, this inkberry has small leaves and is full to the ground. A great boxwood substitute. Royalty charge \$.50. Mature height and width is 2-3’. Zone 5.

ILEX MESERVEAE

BLUE MAID® – *I. aquifolium* x *I. rugosa* ‘Mesid’. A fast growing, pyramidal shaped blue holly that produces an abundance of large red berries with proper pollination. Male pollinator required. Mature height 15’. Zone 4.

BLUE PRINCE – *I. rugosa* x *I. aquifolium*. Very hardy variety with deep green leaves. Habit is broad and shrubby. Pollinates ‘Blue Maid’ and ‘Blue Princess’. Mature size 12’. Zone 4.

BLUE PRINCESS – *I. rugosa* x *I. aquifolium*. An abundance of dark red berries adorn the bluish-green leaves on this broad and rounded shrub. Male pollinator required. Mature size 15’ x 10’. Zone 4.

CHINA BOY® – *I. rugosa* x *I. cornuta* ‘Mesdob’. Compact, mounded habit with glossy green foliage. Excellent cold hardiness. Mature size 8’ x 10’. Zone 4.

CHINA GIRL® – *I. rugosa* x *I. cornuta* ‘Mesog’. Cold hardy variety with bright green foliage and red berries. Habit is rounded. China Boy is necessary for proper pollination. Mature size 10’ x 10’. Zone 4.

ILEX VERTICILLATA

SOUTHERN GENTLEMAN – *I. verticillata*. Southern Gentleman will produce an abundance of small flowers but no fruit. Habit is upright and rounded. Male pollinator for ‘Winter Red’®. Mature 8’ x 8’. Zone 3.

WINTER RED® – *I. verticillata*. Habit is multi-stemmed and rounded with lustrous, dark green leaves. Winter fruit is an intense, bright red and maintains its color throughout the winter season. Male pollination required. Mature 9’ x 8’. Zone 4.

ITEA

HENRY’S GARNET – *I. virginica*. White, lightly fragrant flowers cover this plant in early summer. Fall color is reddish-purple. Mature size 5’ x 8’. Zone 5.

LITTLE HENRY® – *I. virginica*. PP10,988. Dwarf Sweetpire. Royalty charge \$.50. A low mounding, compact habit with sweetly scented, pure white flowers in early summer. Fall color is a beautiful wildfire, orange-red. Mature size 2’ x 3’. Zone 5.

JUNIPERUS

JUNIPER ‘GOLD STAR’ – *J. chinensis* ‘Gold Star’. Gold Star is an evergreen shrub best known for its beautiful golden foliage which is brightest in summer. An excellent choice for accent or foundation plantings which also works well on banks or inclines. Mature 6’ x 3’. Zone 4.

JUNIPER ‘BLUE PACIFIC’ – *J. conferta* ‘Blue Pacific’. Dense blue-green needle foliage, low spreading ground cover that is heat, drought and salt tolerant. Mature size 12” x 4-6’. Zone 6.

JUNIPER ‘BLUE STAR’ – *J. squamata* ‘Blue Star’. Silver-green needle foliage, slow growing with a mounding habit reaching a maximum mature size of 3’ tall and 4’ wide. Drought tolerant. Zone 4.

JUNIPER ‘GREEN SARGENT’ – *J. chinensis* ‘Green Sargent’. Fast growing evergreen that is heavily branched and adorned with emerald green foliage. Its low growth habits make it great for mass plantings and erosion control. Mature size 6’ x 3’. Zone 4.

JUNIPER ‘HETZII COLUMNAR’ – *J. chinensis* ‘Hetzii columnar’. An upright juniper, densely branched and pyramidal in shape, which makes a perfect specimen or screening plant. Bluish foliage throughout the year gives this juniper a delicate feel. Mature size 6’ x 8’. Zone 5.

JUNIPER ‘OLD GOLD’ – *J. chinensis* ‘Old Gold’. A hardy juniper with dense, upright branching. Foliage emerges golden and ages to a soft emerald. Mature size 5’ x 4’. Zone 4.

JUNIPER ‘ROBUSTA GREEN’ – *J. chinensis* ‘Robusta Green’. An upright juniper with bright green foliage throughout the year. Irregular columnar growth habit makes for an ideal accent or hedge planting. Mature size 3’ x 15’. Zone 5.

JUNIPER ‘SEA GREEN’ – *J. chinensis* ‘Sea Green’. This rapid growing juniper forms a natural vase shape with bright green finely textured foliage. Makes a great border or small screen. Mature size 8’ x 6’. Zone 4.

JUNIPER ‘TORULOSA’ – *J. chinensis* ‘Torulosa’. A fast growing upright evergreen with emerald green foliage which twists uniquely as it ages. Torulosa makes an excellent hedge, topiary or screen. Mature size 10’ x 15’. Zone 4.

JUNIPER 'BAR HARBOR' – *J. chinensis* 'Bar Harbor'. Prostrate growth habit makes Bar Harbor an excellent groundcover. High tolerance to salt spray. Foliage is a lush blue-green which turns a pleasant shade of purple during winter. Mature size 6-10" x 6-8'. Zone 4.

JUNIPER 'BLUE RUG' – *J. horizontalis* 'Wiltonii'. Similar to Bar Harbor with a tighter growth habit. Foliage is dense and blue in color. Prostrate form, rarely more than 8" tall. Excellent for bank plantings. Mature 8" x 6'. Zone 4.

JUNIPER PROCUMBENS 'NANA' – *J. procumbens* 'Nana'. Low growing juniper with thick branches and yellow green foliage. Great for groundcover or for cascading over walls. Mature size 12" x 6'. Zone 4.

JUNIPER 'GREY OWL' – *J. virginiana* 'Grey Owl'. A standout in the landscape with blue-grey foliage. Densely spreading branches are covered generously with berries. An excellent tall groundcover or background shrub. Mature size 6' x 3'. Zone 4.

KALMIA

OLYMPIC FIRE – *K. latifolia*. Red buds open to large pink blooms. Foliage is heavily-textured and glossy with a wavy leaf margin. Seedling of 'Ostbo Red'. Mature size 6' x 6'. Zone 5.

LEUCOTHOE

COAST LEUCOTHOE – *L. axillaris*. Low, broad habit with spreading branches. Reddish new foliage turns a leathery dark green. Mature size 4' x 6'. Zone 5.

'REJOYCE' COAST LEUCOTHOE – *L. axillaris* 'Rejoyce'. PP30,821. Compact evergreen reaching a mature size of 2-3' tall and wide. Its glossy new foliage emerges red, turns green, then takes on a burgundy color in the winter, providing year-long interest. Deer resistant. Zone 6.

MICROBIOTA

SIBERIAN CYPRESS – *M. decussata*. A low growing, shrubby and spreading evergreen groundcover. Feathery foliage is soft to the touch and scale-like in appearance. Prostrate growth habit 8"-10" x 3'-12'. Zone 3.

MYRICA

NORTHERN BAYBERRY – *M. pensylvanica*. Salt tolerant, semi-evergreen shrub with glossy, aromatic foliage and waxy blue-gray berries. Mature height 6-9'. Zone 4.

NANDINA

FIREPOWER – *Nandina domestica* 'Firepower'. This compact evergreen shrub boasts year-long colorful foliage, with fresh light green new growth in spring, getting reddish highlights as it matures, then turning bright red in the winter. Mature size is 1-2' tall and wide. Zone 6.

GULF STREAM – *Nandina domestica*. A great plant for year round interest, this compact evergreen is adaptable for all type of planting. Color is best in full sun to partial shade. Mature size is 3-4' x 3'. Zone 6.

PIERIS

CAVATINE – *P. japonica* var. *yak*. 'Cavatine'. A very compact, slow grower with long lasting white flowers in the spring. Mature size 2' x 2'. Zone 5.

COMPACTA – *P. japonica*. This compact selection has heavy bud set and white blooms in early spring. Mature height 5'. Zone 5.

DOROTHY WYCOFF – *P. japonica*. Dark burgundy winter color, pale pink flowers. Mature height 6'. Zone 5.

GLOWING HEARTS™ – *P. japonica*. PP34,660. Brilliant red new leaves transition to creamy shades of yellow, creating a striking contrast against its dark green foliage. It produces abundant clusters of light pink, bell-shaped flowers in early spring and can reach a mature size of 10' tall x 8' wide. Zone 5.

HISTORYLAND SUPREME – *P. japonica*. This cultivar sets flower buds later than other Pieris japonica varieties. In early spring, heavy clusters of white flowers cover the entire plant. Blooms are long lasting. Very compact, upright growth habit. Mature at 6' x 6' tall and wide. Zone 5.

KATSURA – *P. japonica*. PP15,452. Rose pink flowers bloom in early spring followed by beautiful dark red foliage. New red flushes continue throughout the growing season and foliage turns green as it matures. Mature height 6-9' and width 6'. Zone 6.

PRELUDE – *P. japonica* 'Prelude'. A slow growing, compact, evergreen shrub. Dense and globe shaped with attractive, pure white flower clusters borne on short stalks. New leaves emerge in a pinkish hue. Mature at 2½' tall and wide. Zone 5.

SCARLETT O'HARA – *P. japonica*. The new growth on this plant is scarlet red. Dainty white flowers appear on the tall slender habit in spring. Mature height 6'. Zone 5.

PRUNUS

PURPLELEAF SAND CHERRY – *P. cistena*. White to light pink flowers and rich purple leaves. Very hardy, multi-stemmed bush. Excellent hedging plant. Mature height 10'. Zone 2.

DWARF FLOWERING ALMOND – *P. glandulosa* 'Rosea'. A clumping multi-stemmed shrub that produces fluffy pink pom-pom flowers in early spring. Flowers are great in fresh cut arrangements. Foliage is light green. Deciduous. Mature 6' x 6'. Zone 4.

BEACH PLUM – *P. maritima*. This fruiting shrub is native to coastal dunes of the Northeastern United States. Since colonial times, people have collected wild fruit to make preserves and jelly. Will tolerate salt spray. Mature size 6' x 6'. Self-pollinating. Zone 3.

RHAMNUS

FINE LINE® BUCKTHORN – *R. frangula* 'Ron Williams'. PP14,791. Delicate fernlike foliage turns yellow in the fall. The upright habit is distinctive. Mature height is 5-6' x 3' wide. Royalty charge \$.50. Zone 2.

RHODODENDRON

BESSIE HOWELLS – *Shammarello* hybrid. Habit is dense and compact with dark green foliage and burgundy-red flowers. Mature height 3-4'. H1.

CHIONOIDES – *R. catawbiense*. White flowers with yellow center. Broad habit. Mature height 4'. H2.

CUNNINGHAM'S WHITE – *R. x 'Cunningham's White'*. Large trusses of white flowers. Rounded habit. Mature at 4'. H2.

ENGLISH ROSEUM – *R. catawbiense*. Lilac pink flowers. Slightly more compact than Roseum Elegans. Ironclad. Mature height 8-10'. H1.

HOLDEN'S™ PINK – *R. 'HoldenRhodo211'*. PP34,628. Light pink flowers with a hint of yellow in the throat. Compact habit. Mature height 3-4'. H1.

NOVA ZEMBLA – *R. catawbiense*. Deep red flowers. Upright habit. Mature height 8-10'. H1.

P.J.M. – *R. carolinianum* cross. Medium purple flowers bloom in late March at Eastern Shore Nursery. Mature height 4-6'. H1.

ROSEUM ELEGANS – *R. catawbiense*. Lavender-pink flowers, very hardy rhododendron. Ironclad. Mature height 8-10'. H1.

ROSEUM PINK – *R. catawbiense*. Pink-purple flowers, lush foliage. Mature height 8-10'. H1.

DWARF RHODODENDRON

YAKU PRINCESS – *R. yakusimanum*. Pink buds open to white flowers. The undersides of the leaves are covered with beige colored indumentum. Mature height 3'. H2.

YAKU PRINCE – *R. yakusimanum*. Pink flowers. Good medium compact habit. Mature height 3'. H2.

Rhododendron Hardiness Rating

H2.....	10° to -15°F
H3.....	0° to -5°F
H4.....	+10° to +5°F

RHUS

GRO-LOW – *Rhus aromatica* 'Gro-Low'. PP28,669. Fast growing, deciduous groundcover with fragrant leaves taking on a red color in fall. Deer and rabbit resistant. Mature at 2-3' tall and 6-8' wide. Zone 4.

TIGER EYES – *Rhus typhina* 'Bailtiger'. PP16,185. A unique accent plant with draping cutleaf foliage. The color varies through the season flushing chartreuse then changing to yellow and scarlet in the fall. Upright and rounded growth habit. Mature at 6' tall and wide. Zone 4.

SALIX

ARCTIC BLUE WILLOW – *S. purpurea* 'Nana'. Dense, rounded form. Leaves are blue-green. Mature height 4' x 4'. Zone 4.

HAKURO NISHIKI WILLOW – *S. integra* 'Hakuro Nishiki'. A Japanese dappled willow noted for its beautifully variegated pink-white-green foliage. Mature height 4' x 4'. Zone 4. (Tree form available on p. 48)

SPIRAEA

ANTHONY WATERER – *S. x bumalda*. A dense mounding spiraea that produces deep rose-red flowers in June. Mature height 3'. Zone 4.

GOLDFLAME – *S. x bumalda*. Pink flowers in summer. Interesting foliage changing from russet orange to golden-green. Mature height 3'. Zone 4.

DOUBLE PLAY® BIG BANG – *S. x 'Tracy'*. PP21,588. This Double Play® Spiraea has the brightest pink flowers and most colorful yellow new growth of any in the series. Attracts hummingbirds. Mounded form and mature at 2'-3' tall and wide. Royalty charge \$.50. Zone 3.

DOUBLE PLAY® DOOZIE™ – *S. x 'NCSX2'*. PPAF. The first sterile reblooming spiraea, this plant starts in spring with bronze red foliage that turns bright green in the summer. The flowers are hot pink and will continue until fall. Mature size 2-3' x 2-3'. Royalty charge \$.50. Zone 3.

DOUBLE PLAY® RED – *S. japonica*. PP26,993. This stunning spiraea has deep crimson pink-red flowers with showy burgundy-purple new growth. Dense and rounded habit. Mature at 2'-3' tall and wide. Royalty charge \$.50. Zone 3.

GOLDMOUND – *S. japonica*. Bright gold foliage, pink flowers and a low mounding form. Mature height 2'. Zone 4.

LITTLE PRINCESS – *S. japonica*. Deep pink flowers all summer. Compact habit. Mature height 2½'. Zone 4.

DOUBLE PLAY® CANDY CORN® – *S. japonica*. PP28,313. Quite a colorful display! Foliage emerges as candy apple red in early spring becoming pineapple yellow. New growth is a nice contrast in orange-red. Late spring blooms are dark purple. Mature at 1½' - 2' tall and wide. Royalty charge \$.50. Zone 4.

MAGIC CARPET – *S. japonica* ‘Walbura’. A compact spiraea with vibrant foliage year round. New growth is red changing to gold at maturity and holds color through summer. Deep pink flowers. Mature height 2’ and width 2’. Zone 4.

NEON FLASH – *S. x bumalda*. Vivid red flowers and rich new growth. Mature height 3’. Zone 4.

OGON – *S. thumbergii*. The fine feathery foliage of this spiraea is striking. The small white flowers emerge early and are followed by gold foliage which turns bright green at maturity. Fall color is bright orange. The branches arch and the habit is willowy. Mature height and width if 5’. Zone 5.

SNOWMOUND – *S. nipponica*. Abundant white flowers. Delicate foliage is blue-green in color. Mature height 5’. Zone 3.

SYRINGA

PALIBIN DWARF KOREAN LILAC – *S. meyeri* ‘Palibin’. A neat and spreading lilac selection. Flowers are fragrant and from reddish-purple buds open to pale lilac. A fine addition to a shrub border or plant several for a low hedge. Mature at 6’ x 7’. Zone 3.

MISS KIM – *S. patula*. Dwarf, compact habit with attractive dark green foliage. Pale purple flower buds open to lavender blue. Vigorous. Mature size 6’ x 5’. Zone 3.

BLOOMERANG® DARK PURPLE – *S. x ‘SMSJP7’*. PP26,549. Large, rounded purple inflorescences. Very showy in spring and continues to be a show stopper with fragrant blooms from mid-summer until frost. Exceptional vigor. Mature height 4’- 6’. Royalty charge \$.50. Zone 3.

BLOOMERANG® PURPINK™ *S. x pubescens*. PP35,123. Reblooming lilac. Depending on how you look at the flowers, you may see a lovely shade of purple or pale pink. This fragrant, prolific flowering, reblooming lilac deserves a prominent spot in the garden. Attracts bees and butterflies. Disease and deer resistant. Mature at 3-5’ tall x 2-3’ wide. Royalty charge \$.50. Zone 3.

Ivory Silk Japanese Tree Lilac can be found on page 48

THUJA

FIRE CHIEF™ ARBORVITAE – *T. occidentalis* ‘congabe’. PP19,009. A perfectly globe shaped, slow growing, compact evergreen providing year-round interest: its bright gold spring foliage takes on soft orange hues in the summer, which deepens to an orange red in fall. It reaches 2’ in 10 years, and 4’ at maturity. Zone 4.

GREEN GIANT ARBORVITAE – *T. standishii x plicata*. A vigorous fast growing pyramidal evergreen. Mature height 60’ and width 12-15’. Zone 5.

JUNIOR GIANT – *T. x plicata* ‘Junior Giant’. PP31,297. Introduced by Hermitage Nursery in Virginia, this is a slower growing and smaller version of Green Giant. Great for an evergreen privacy hedge in a smaller landscape. Deer resistant. Mature at 15’-20’ x 5’-10’. Zone 5.

MR. BOWLING BALL® – *T. occidentalis* ‘Bobozam’. Slow growing, naturally globe-shaped dwarf evergreen with a lacy, dense blue-green foliage that retains its color year-round. Matures at 2-2 ½’ tall and wide. Zone 3.

VIBURNUM

CHICAGO LUSTRE® ARROWWOOD – *V. dentatum* ‘Synnvestedt’. This variety has upright-rounded habit with glossy dark green foliage. White flowers in mid-late June are followed by ornamental clusters of blue-black fruit in fall. Mature 10-12’ x 8-10’ in 10 years. Zone 5.

BLUE MUFFIN® – *V. dentatum Blue Muffin®*. A tall, upright shrub, which makes a nice foundation focus or planted in masses as a hedge or screen. For cross-pollination to produce beautiful blue berries plant a companion Viburnum variety such as Chicago Lustre. Mature at 5’-7’ tall and wide. Royalty charge \$.50. Zone 3.

BRANDYWINE™ – *V. nudum*. Royalty charge \$.50. Most appreciated for its magnificent berry set. White spring flowers produce a stunning display of pink and blue fruit in the fall. Does not require a pollinator for fruit set. Fall foliage is an attractive wine-red. Attracts birds to the garden and resists deer. Mature at 6’. Zone 5.

OPULUS STERILE – *V. opulus Sterile*. In late spring, after glossy bright green leaves have become established, pure white flower clusters, resembling snowballs adorn this tall shrub. Blooms last into the summer and later in the fall the foliage turns purplish-red. Mature at 12’ x 10’. Zone 3.

WEIGELA

SPILLED WINE® – *W. florida* ‘Bokraspiwi’. PP23,781. Dark purple foliage with wavy edges keeps its color all season. Flowers are magenta. Compact habit is its added feature. Mature height 2’ x 3’ width. Royalty charge \$.50. Zone 4.

SONIC BLOOM® PINK – *W. florida*. PP24,572. Royalty charge \$.50. Pink flowers emerge in May from hot pink buds. Reblooms without deadheading until frost. Attracts hummingbirds and resists deer. Mature at 5’. Zone 5.

SONIC BLOOM® WINE – *W. florida*. A prolific reblooming shrub with bubble-gum-pink blooms. Foliage is purple green tinted with burgundy. Attracts bees, butterflies and hummingbirds. Mounded habit reaching 4-5’ tall x 3-4’ wide. Royalty charge \$.50. Zone 4.

VERY FINE WINE® – *W. florida*. Pink flowers and purple black foliage make this a standout shrub in a mixed border, or planted in masses in the landscape. Heavy bloomer, resists deer, full season foliage interest. Mounded habit reaching 2-2½’ tall and wide at maturity. Royalty charge \$.50. Zone 4.

WINE AND ROSES® – *W. florida*. PP10,772. Royalty charge \$.50. Intense rosy-pink colored flowers jump against the dark glossy foliage. Leaf color intensifies to near black in mid-summer. Mature height 5’. Zone 4.

WINE & SPIRITS® – *W. florida* “SMNWFGC”. PPAF. Royalty charge \$.50. A vigorous and handsome weigela with dramatic, dark, purplish-black foliage and crisp white-green flowers. Attracts bees, butterflies and hummingbirds. Mature at 3’-5’ tall and wide. Zone 4.

David Austin Roses

DAVID AUSTIN® ROSES

BATHSHEBA™

A short English Climbing rose. Apricot-yellow buds open to shallowly cupped, many petalled rosettes. Blooms are a beautiful blend of subtle apricot-pink and soft yellow, resembling apricot with creamy outer petals. Medium-strong, superb scent of myrrh with hints of honey and tea. Repeat blooming. Mature at 10' tall. Zone 5.

BOSCOBEL™

PP25,064. Upward facing blooms are composed of perfectly formed, rich salmon rosettes. Very strong and complex myrrh fragrance. Repeat flowering. Very healthy with good disease resistance. Mature at 2½' wide x 3' tall. Upright and bushy. Zone 5.

CARDING MILL®

Beautiful mixed shades of apricot, pink and yellow blend to give this double flower an overall apricot color. Blooms have a myrrh fragrance. The plant has a nice bushy full habit. Zone 5.

CHARLES DARWIN

Large blooms are yellow to mustard in color and have a strong tea to pure lemon fragrance. The flowers begin very full and rounded, later opening to shallow cups. A sturdy shrub with broad spreading growth. Large shrub habit. Mature at 4' x 4½'. Repeat flowering. Zone 5.

CHARLOTTE™

Beautiful cup shaped blooms are soft yellow and reblooming. Tea rose fragrance. Zone 5.

CLAIRE AUSTIN CLIMBER®

PP19,465. This fine white rose bears pleasing cupped buds of pale lemon opening to large, creamy-white blooms with English Musk delicacy. The strong fragrance, based on myrrh with dashes of meadowsweet, vanilla and heliotrope wafts from the elegant arching shrub. This strong and healthy climber grows to 8 ft. Zone 5.

CROWN PRINCESS MARGARETA™ CLIMBER

PP13,484. A climbing English rose with neatly arranged apricot-orange rosettes, bearing a strong fruity fragrance. Habit is well rounded with slightly arching growth. An ideal choice for shady gardens. Repeat flowering. Mature at 5' wide x 5' tall. Zone 5.

DARCEY BUSSELL™

PP18,717. Rich crimson rosettes develop a tinge of mauve on this freely flowering beauty. The graceful shrubby habit makes this ideal for growing in large pots or containers as well as in beds and borders. It has a pleasing fruity fragrance. Zone 5.

DESDEMONA

PPAF. Deceptive peachy pink buds open to reveal white blooms, with a lovely old rose and almond blossom fragrance. Named for the tragic heroine in Shakespeare's Othello. Chalice shaped blooms that have a strong and heady perfume fragrance. Zone 5.

GERTRUDE JEKYLL®

The quintessential old rose scent from the large rosette-shaped flowers. The rich, glowing pink blooms benefit from summer pruning, especially in hotter areas. Voted England's Favorite Rose, it is superb as a shrub or a climber. Very good winter hardiness. Winner of the James Mason award for fragrance. Zone 4.

GOLDEN CELEBRATION®

One of the largest flowered English roses. Flowers are giant cups of rich yellow on long arching branches. Luscious fragrance of strong tea, Sauternes wine and strawberry. Large, nicely rounded, shrub habit with ample foliage. Mature at 4' tall and wide. Repeat flowering. Zone 5.

HARLOW CARR®

These perfectly formed double medium sized pink flowers have a strong fragrance that smell like an old time rose. It has a bushy upright habit and is a good repeat bloomer. Good disease resistance. Zone 5.

LADY OF SHALOTT CLIMBER™

PP22,171. Rich orange-red buds open to salmon pink double blooms. Robust, hardy and highly disease resistant, this forms a large, bushy shrub with arching stems. Ideal even for the inexperienced gardener. This rose emits a pleasant warm tea fragrance with hints of spice. Zone 5.

LICHFIELD ANGEL™

PP18,702. Large, creamy apricot-white, dome-shaped rosettes freely adorn this shapely shrub. Good disease resistance and tolerant of poorer soils. Moderately fragrant and repeat flowering. Mature at 3' wide x 4' tall. Zone 5.

MOLINEUX™

PP9,524. RHS Award of Garden Merit. A healthy variety, which produces rich yellow blooms with exceptional freedom and continuity. There is a delicious musky tea rose scent. Good for disease resistance, repeat flowering, and ideal for poor soil. Zone 6.

OLIVIA ROSE AUSTIN

PPAF. Named after the daughter of David Austin Jr, this rose has beautiful soft pink rosettes opening to three and one half inches across. Vigorous, yet compact and a repeat bloomer. Strong, fruity fragrance. One of the most disease-resistant rose offered by David Austin. Zone 5.

POET'S WIFE

PPAF. Beautifully formed, cupped flowers of strong, striking yellow. Rich, fruity fragrance, with notes of lemon. Low, naturally rounded, bushy growth. Ideal for pots and containers. Zone 5.

PRINCESS ALEXANDRA OF KENT

Unusually large, bright pink blooms are full petalled and deeply cupped. A lovely fragrance of strong tea becoming lemon with hints of black currants. A nicely poised rose which is never clumsy. Well-rounded shrub habit. Mature at 4' x 5'. Repeat flowering. Zone 4.

PRINCESS ANNE

The individualistic beauty stems from a new line of breeding. Pure deep pink blooms, with a hint of yellow on the undersides of the narrow petals, are unusually substantial. Upright growth with thick, polished foliage. Disease resistance and blooming successively in large clusters, this compact rose is ideal for borders and hedging. Medium strength tea rose fragrance. Repeat flowering. Mature at 4½' x 4'. Zone 6.

QUEEN OF SWEDEN™

PP17,150. Elegant! Charming, cup-shaped flowers are soft apricot pink in color with and a classic myrrh fragrance. Exceptionally healthy with good disease resistance. Repeat bloomer. Mature at 2½' wide x 4' tall. Upright. Zone 5.

TEASING GEORGIA CLIMBER™

A delicate beauty with exquisitely cupped rosettes of rich yellow fading into pale yellow towards the edges. Winner of the Henry Edland Medal for its fine tea fragrance. Strong, graceful growth can be trained as a short climber; as a shrub summer pruning will keep it compact. Good disease resistance; very hardy. Zone 5.

*The Generous
Gardener® Rose*

TESS OF THE D'URBERVILLES CLIMBER®

Large fragrant flowers of bright crimson with outer petals that eventually reflex back. The growth of this hardy rose is vigorous, forming a rounded shrub that may benefit from some summer pruning. It has a lovely old rose fragrance and may also be grown as a short climbing rose. Zone 5.

THE ALNWICK ROSE

Large, deeply cupped flowers of soft pink open into full-petalled, shallow cups with paler pink edges. There is a hint of raspberry in the old rose fragrance. This blooms freely until late in the year and remains compact. Zone 5.

THE GENEROUS GARDENER®

Beautifully formed, medium sized, pale-pink flowers nod gracefully on their stems. Flowers have a strong, Old Rose, musk and myrrh fragrance. Petals open to expose numerous stamens giving an almost water lily appearance. Medium climbing habit. Mature at 15' tall. Repeat flowering. Zone 4.

THE LADY GARDENER®

Rosette shaped apricot flowers. An excellent shrub in the garden and will rebloom quickly. Tea rose fragrance. Zone 5.

THE PILGRIM®

A lovely, fragrance perfectly balanced of medium tea and myrrh. Large soft-yellow blooms are particularly beautiful, with buds opening as many petalled cups later forming flat rosettes. Petals fade towards the edges. Medium climbing habit. Mature at 12' tall. Repeat flowering. Zone 5.

TRANQUILLITY™

PP25,063. An English shrub rose noted for the perfection of its pure white, beautifully rounded rosette blooms with a light apple fragrance. Very attractive floriferous display and almost thornless. A very healthy variety with vigorous growth, good disease resistance and tolerant of poor soils. Repeat flowering. Mature size is 3' wide x 4' tall. Zone 5.

VANESSA BELL™

An English shrub rose named for artist, designer and the sister of Virginia Woolf. Pale yellow flowers pale further at the edges to white, each having a yellow eye. Buds are pink tinged and open to medium sized cups held in large clusters. Refreshing fragrance of green tea with hints of lemon and honey. Habit is bushy and upright. 3' wide x 4' tall. Zone 5.

WOLLERTON OLD HALL

Beautifully rounded, chalice-shaped blooms of pale apricot, start as buds with attractive flashes of red. Blooms eventually pale to cream. Wonderfully fragrant with a strong myrrh fragrance and intense hints of citrus. Medium sized climber. Repeat flowering. Mature at 12'. Zone 5.

YOUNG LYCIDAS

PP20,960. Large, deep pink, magenta and red cupped flowers, with outer petals tending towards light purple. The fragrance is reminiscent of Tea and Old Rose scent, with hints of cedar wood. It makes an attractive, bushy shrub, maturing at 4 ½' in height and 4' in width. Zone 5.

KNOCK OUT® ROSES

BLUSHING KNOCK OUT® ROSE

PP14,700. This variety has a light pink bloom that fades to a soft and subtle pink as the season progresses. With similar flowers to the original Knock Out® rose, this shrub rose is a versatile addition to any landscape. Zone 5.

CORAL KNOCK OUT® ROSE

PP19,803. A new Knock Out® for the mid-Atlantic and South, this rose was formerly known as Carefree Celebration. The new foliage is bronze red and the unique coral color is even stronger in hot climates. It maintains an upright to rounded habit and blooms from spring through fall. Zone 5.

DOUBLE KNOCK OUT® ROSE

PP16,202. With full cherry-red double flowers similar to that of a classic rose, this variety comes from the same cross that produced the original Knock Out®. It has the same black spot resistance as the famous original but with the added beauty of a double flower and a slightly better winter hardiness. Zone 5.

EASY BEE-ZY™ KNOCK OUT® ROSE

PPAF. Bright yellow blooms provide long lasting color on this continuously flowering rose. Single petal display with a light citrus scent is alluring to pollinators. A vigorous, bushy and rounded shrub with excellent resistance to black spot, rust and mildew. Mature at 3' wide x 3'-4' tall. Zone 4.

KNOCK OUT® ROSE

PP11,836. The original member of the Knock Out® Family, this shrub rose has a bloom cycle that produces cherry-red/hot-pink blooms up until frost. With superior disease resistance, self cleaning and little to no maintenance this rose suits every garden and landscape. Zone 5.

ORANGE GLOW™ KNOCK OUT® ROSE

PPAF An Orange Knock Out® Rose! Luminescent beauty shines from this rose with double orange, cup-like blooms having hints of coral, pink and yellow. Excellent rust resistance. A bushy and upright shrub. Mature at 3' wide x 4½' tall. Zone 5.

PEACHY KNOCK OUT® ROSE

PP25,628. This new Knock Out® is for the mid-Atlantic and Northern markets. Pink flowers with yellow center and the overall color effect is peach. The color is more intense with the cooler temperatures. Zone 4.

PETITE KNOCK OUT® ROSE

Brings a new level of versatility to the rose market! A miniature version of the original Knock Out® with the same non-fading, bright red flowers and dark and shiny green foliage. Easily maintained and extremely black spot resistant. Great for containers. Mature plants reach 18" in height. Zone 5.

PINK DOUBLE KNOCK OUT® ROSE

PP18,507. Bright bubble gum pink classic shaped flowers adorn this pink version of Double Knock Out®. Superior drought tolerance and flowers from early spring to frost make this rose a show stopper. Zone 5.

PINK KNOCK OUT® ROSE

PP15,070. Just like the original with its single petals and easy maintenance but in a beautiful shade of bright pink! Black spot resistance, self cleaning and drought tolerance, just like the other members of the family, make this an excellent rose for any garden. Zone 5.

WHITE KNOCK OUT® ROSE

PP20,273. An excellent shrub rose which stands out with its pure white blooms and very dark green foliage. It maintains a compact habit, and blooms from spring through fall. Zone 4.

DRIFT® GROUNDCOVER ROSES**APRICOT DRIFT®**

PP23,354. Apricot colored flowers in spring and onward providing a long season display. Tough and disease resistant. True groundcover habit. Mature at 2½' x 1½'. Zone 4.

BLUSHING DRIFT®

PP33,507. Attractive clusters of slightly scented, double pink flowers having a warm yellow center. A stunning, heavy blooming landscape choice with good disease resistance. Zone 4.

BUTTERCREAM DRIFT®

PPAF. Blooms start light yellow to cream colored and finish pure white. Very bushy, compact habit. Very slightly scented. Mature at 2' x 1½'. Zone 4.

**CORAL DRIFT®**

PP19,148. Vibrant, bright, coral-orange blooms cover this small mounding shrub from mid-spring to mid-fall. Winter hardy, heat and drought tolerant. Good disease resistance. Compact, groundcover. Zone 4.

PEACH DRIFT®

PP18,542. Soft and subtle peach blooms cover this plant from mid-spring to the first hard freeze. As one of the most floriferous plants, Peach Drift® will pair well with any perennials in the landscape. Zone 5.

PINK DRIFT®

PP18,874. Pink Drift® has deep pink flowers with a soft faded center that bloom in abundance throughout the entire growing season. The disease resistance is excellent. Zone 5.

RED DRIFT®

PP17,877. Delicate red flowers with excellent disease resistance are what sets this Drift® rose apart from the rest. Perfect for border plantings or anywhere it is allowed to drape naturally. Zone 5.

SCARLETT DRIFT®

PPTBS. An abundance of deep red flowers with golden yellow anthers emerge in early spring, with continual reblooming through fall. Excellent disease resistance, especially against powdery mildew. Low maintenance bushy, compact plant, maturing at 1½' tall x 2' wide. Zone 5.

SWEET DRIFT®

PP21,612. Abundant clear pink double flowers that continuously bloom throughout the growing season make this rose perfect for pathways, hillsides or along the front of any landscape bed. Zone 5.

WHITE DRIFT®

PPAF. Pure white double flower resembles a miniature rose flower. Good disease resistance and low groundcover habit. Zone 5.

LANDSCAPE SHRUB ROSES**BONICA®**

This award winning rose started the Meidiland® family. Beautiful pastel pink flowers adorn this tough and vigorous shrub from spring to mid-fall. With orange-red seed hips in winter this rose has beauty year-round. Zone 5.

HOME RUN®

PP18,552. Flame red off-spring of the Knock Out®, Home Run® has the same superior disease resistance of its parent and is completely resistant to powdery mildew. Quick to flower and with continuous color. Zone 5.

LIMONCELLO™

PP21,532. Continuous blooms of light yellow flowers cover this vigorous growing shrub rose. Zone 5.

TEQUILA™

PP16,342. Brightly colored apricot-orange blooms throughout the season really make this rose stand out in the landscape. Tequila™ can be used as a stand-alone specimen plant or as a beautiful hedge. Zone 5.

TEQUILA SUPREME®

PP21,271. Copper and ochre color and unique scalloped petals make this rose very attractive. Flowering from spring to frost, it has good disease resistance and adapts well to hot and humid conditions. Zone 5.

THE FAIRY

Double light pink flowers that blossom profusely throughout the plant from summer to frost. Interesting dark fern-like foliage offers striking contrast to your landscape. Zone 5.

RUGOSA ROSES**RASPBERRY RUGOSTAR®**

PP15,937. Deep pink flowers with a yellow throat are elegant. This rugosa is resistant to leaf spot and mildew and has a low habit. Flowers heavily in spring and will rebloom in summer and fall. Zone 5.

ROSA RUGOSA

Rose red flowers cover this extremely tough rose from summer to late fall. Tolerant of salty areas, poor soil and even shade makes this the rose for tough growing conditions. Zone 5.

ROSA RUGOSA ALBA

Its blossoms are referred to as the "whitest of the white" by many and they repeat all summer long. Very fragrant flowers are followed by large orange hips in the fall. Zone 5.

TOPAZ JEWEL

PP6,793. Beautiful semi-double pale yellow flowers on a rugosa! Slight fruity fragrance. Habit is wider than tall. Zone 4.

HYBRID TEA AND GRANDIFLORA ROSES

APRICOT CANDY™

PP21,284. A hybrid tea whose color can stand up to the heat without fading. The ruffled edged petals with a soft apricot color contrast nicely with the soft green foliage. Zone 5.

BARBRA STREISAND

Sensuous lavender blooms edged with deep magenta. The foliage is a glossy deep green. With its strong sweet scent, Barbra Streisand makes a great cut rose as well. Zone 6.

BEST KEPT SECRET™

PP26,411. This compact plant boasts large, citrus scented, white blooms with pink-edged petals, standing against dark green glossy foliage. Excellent disease resistance for rust and mildew. Mature at 4' x 2-3'. Zone 6.

BLISS PARFUMA®

PPAF. A delicate pale pink rose with an apricot center. It blooms throughout the season and is very disease resistant. Kordes introduction. Mildly fragrant. Zone 5.

BLUE GIRL

In the realm of lavender roses this girl is actually closer to the unattainable goal of the "true blue" rose than most others. Nice, fruity fragrance and long stems make it perfect for cutting. Zone 5.

BRANDY™

Huge blooms and robust fragrance with thick stems perfect for cutting are what you will remember most about this golden-bronze hybrid tea. Zone 5.

CHERRIES & CHAMPAGNE™

An interesting rose with pointed buds and double blooms, providing transitional colors from red to pink underlined by pale yellow finishing in a delicate cream on the reverse. A vigorous, bushy and upright shrub. Mature at 3' wide x 3'-4' tall. Zone 5.

CHERRY PARFAIT™

PP12,802. This Grandiflora has white petals with a broad red edge that holds nicely in the heat. Dark foliage makes a striking contrast to the bicolor flowers that bloom all season long. Zone 5.

CHRIS EVERT

Well-formed blossoms on this hybrid tea open in tones of orange and yellow and finish with a scarlet blush. New foliage is a deep red and foliage is lush and green. A tidy rose with a moderate, fruity fragrance. Medium, upright. Zone 5.

CHRYSLER IMPERIAL

A perfect example of what a hybrid tea should be, high-centered, velvety red, strong scented and with a great repeat bloom. Zone 5.

DREAM COME TRUE™

This Grandiflora has something for everyone. The catchy orange-red colors will lure even non-rose lovers, while its toughness will satisfy even the most demanding gardener. The bi-tones hold well when cut, and the dark green leaves are much more resistant to diseases than most of the other roses in its class. Zone 5.

EARTH ANGEL PARFUMA®

PP26,836. From Kordes, a well-formed shrub with exceptional health and vigor. The blooms on this variety are numerous and beautifully peony-shaped with a cream exterior and warm pink center. A good repeat bloomer with strong sweet rose fragrance. Mature at 3' wide x 3½' tall. Zone 5.

ENCHANTED PEACE™

PPAF. The blooms open yellow suffused with orange near the petal edges, then turn yellow with pink. Glossy green foliage and an abundance of lovely fragrant blooms cover this upright shrub. Good choice for a container. 5' wide x 2-3' tall. Zone 5.

ETERNAL FLAME™

PP18,918. Soft shades of yellow in the flower, strong citrus scent, and long stems makes this hybrid tea a must have for the cutting garden. Also offers above average disease resistance. Zone 5.

FRAGRANT CLOUD

This tea rose has been in the market for years primarily because of the intense fragrance. The bright orange red flowers continue to bloom and are stunning on a plant that has shiny green foliage. Very fragrant. Zone 5.

GOLD STRUCK™

PP24,971. This rose has good vigor and is disease resistant for a grandiflora. Golden yellow flowers tinged with orange show nicely against dark green of foliage. Flowers are 4" wide when fully opened. Zone 5.

GRANDE AMORE™ ELEGANZA®

PP17,047. A beautiful red hybrid tea with glossy green foliage. Light fragrance. Kordes introduction. Zone 5.

HONEY DIJON™

PP17,822. Upright, vigorous, disease resistant plant and prolific bloomer. Its unique golden-beige large flowers have a pleasant fruity fragrance, and can easily be combined with any other flowers to make an extraordinary bouquet. It also has an extensive vase life. Zone 5.

HONOR™

Long stems, deep green foliage and pure white flower color make this an excellent rose for cutting. Slight classic Hybrid Tea Rose fragrance. Very tall, upright habit. Mature at 3'-4' x 4-5'. Zone 5.

JOHN F. KENNEDY

THE classic white hybrid tea. This strong, classy and handsome rose has withstood the test of time. As popular today as ever. Zone 5.

LET FREEDOM RING™

PP17,821. A long stemmed red hybrid tea with impeccable flower form and great vase life is the pinnacle of discovering a new rose variety. This striking prize winner was created by WWII veteran and amateur hybridizer, Ernest Earman of Virginia. Zone 5.

LOVE

Blooms of lustrous scarlet with white reverse sides are produced in profusion by this popular bi-colored Grandiflora. Zone 5.

LOVE'S PROMISE™

PP9,253. The brightness of the perfectly shaped flowers attracts the eye with its deep currant-red blooms standing tall above the deep green foliage. Perfect for cutting. Strong raspberry fragrance. Excellent disease resistance. Zone 5.

LOVES ME, LOVES ME NOT™

PP34,789. This deep pink Hybrid Tea has 5-inch blooms with over 200 petals each, giving it one the highest petal counts on the market. Strong necks prevent the large blooms from drooping, making it an excellent rose for cutting. Intensely sweet fragrance. Mature at 5' high x 2-3' wide. Zone 5.

MARTHA STEWART™

PP33,753. This remarkable Hybrid Tea Rose offers a beautiful fragrance reminiscent of lemon verbena, bergamot, honeysuckle, and grapefruit. The striking apricot-pink blooms are large and full, with over 100 petals each. Compact, bushy growth habit with a mature size of 2½' high x 2-3' wide. Zone 5.

MEMORIAL DAY™

PP16,572. It takes only one of these huge, old-fashioned flowers to fill an entire room with the sweet, classic scent of a rose. This hybrid tea loves the hot weather which will help it to unfurl its lovely petals of clear pink with a hint of lavender. Zone 5.

MICHELANGELO™

PPAF. With its sweet lemony fragrance and its vibrantly saturated golden petals, this Romantica® rose will find a permanent home in your garden. Perfect stems for cutting and old fashioned blooms to win your heart. Zone 5.

MOONLIGHT ROMANTICA®

PPAF. Displays a large light yellow full double flowers that are fragrant. This upright and bushy rose is very vigorous on its own roots.

MOTHER OF PEARL™

PP18,707. This soft pearl colored Grandiflora has perfect flower shape on a plant that is way above its class for resistance to black spot and winter hardiness. Performs well in hot humid areas and exceptionally well in cooler climates. Zone 5.

OPENING NIGHT™

PP11,265. Award-winning hybrid tea rose bred from two award-winning parents. An exquisite cut rose with velvety red petals that slowly spiral open atop long, strong stems. Dark green glossy foliage; tall, upright growth habit. Zone 5.

PEACE

The world's most famous rose, in brilliant yellow and pink, was first introduced to the U.S. by Conard-Pyle over 60 years ago and is more popular today than when it was first introduced. Voted into the Rose Hall of Fame by the World Federation of Rose Societies in 1976 and later as the Rose of the 20th Century. Zone 5.

PETER MAYLE™

PP11,660. Classically beautiful, large, deep pink blooms, often measuring 4"-5" in width, top long stems making this a perfect rose for cutting. Heavily scented with "old rose" fragrance. Tall and upright. Zone 5.

PINKERBELLE

PPAF. Buds spiral open to form abundant and unique 4" blooms of cream and muted pink and lavender, finished with a pink picotee edge. Sensational fragrance. Excellent resistance to rusts and mildews. Mature at 4' wide x 5'-6' tall. Vigorous and upright. Zone 5.

POPE JOHN PAUL II

PP19,107. One of the best white hybrid tea roses available. The plant is bushy and full and shows disease resistance. The large pure white blossoms are fragrant with a citrus scent. Zone 5.

PRINCESSE CHARLENE DE MONACO®

PP24,296. This Romantica® type hybrid tea rose has flowers with a light apricot to shell pink color. The fragrant flowers will make a good choice to use as a cut flower. Excellent disease resistance for the type. Zone 5.

QUEEN ELIZABETH

A long-time favorite Grandiflora. So vigorous it is suitable for hedges and background plantings. Radiant, luminous pink flowers with medium-size blooms develop from very compact, pointed buds in small clusters. Zone 5.

RASPBERRY CUPCAKE™

PP33,406. An attractive rose with pink to purple-colored blooms and a strong raspberry fragrance with hints of rose water and lemon. Repeat bloomer with excellent resistance to mildews and rust. Bushy habit. Mature at 2'-3' x 4'. Zone 5.

ROMANTICA® BALL GOWN™

PPTBS. Lush medium-pink blooms, more than 100 petals each, with an intense classic rose fragrance that hints of grass and powder. A vigorous, upright and bushy grower with good disease resistance. Mature at 3' wide x 6' tall. Zone 5.

SAVANNAH™ SUNBELT®

PP26,285. A disease resistant hardy rose with salmon flowers and very strong fragrance. The plant is compact and lush with a strong fragrance. Kordes introduction. Zone 5.

SECRET™

PP8,494. A wonderful blend of classic hybrid tea bud form, flower form and seducing spicy fragrance. Topping a show-off plant is a blend of creamy yellow shades suffused with pinks that vary from flower to flower with the season and weather. Zone 5.

STILETTO™

PPAF. A traditional dark red magenta colored tea rose with perfect form. The foliage is dark green and glossy which contrasts beautifully with the flower. Strong fragrance. Zone 5.

ST. PATRICK®

A lovely yellow hybrid tea which has a touch of gold in cooler weather. The chartreus-shaded, slow opening buds spiral open to lovely yellow flowers. Foliage is grey-green. Medium, rounded to upright habit. Zone 5.

SUNNY SKY ELEGANZA

PP22,352. A hardy large yellow tea rose with great disease resistance. Lush dark green foliage with slight fragrance. Kordes introduction. Zone 5.

SWEET MADEMOISELLE™

PPAF. Large full blooms that are unique in color. Temperatures create an array of colors; lighter in the heat and deeper pink in the cooler temperatures. This fragrant tea rose grows with great vigor on its own roots. Zone 5.

SWEET SPIRIT™

PP30,860. This rose offers beauty and hardiness with fully double, bright cherry-red blooms. It is not only strongly fragrant, but it can thrive in hot or humid climates due to its disease resistance. Bushy, rounded growth habit maturing at 3-4' high x 3' wide. Zone 5.

TROPICANA

Winner of 12 international awards, this long-stemmed rose has an intense fruity fragrance in a flashy blend of coral and orange. Zone 5.

VETERANS' HONOR®

Stunning red hybrid tea with huge blossoms of impeccable form. Long cutting stems makes this rose perfect for making a grand bouquet. Zone 5.

VOODOO

An enchantingly rich, fruity fragrance and intriguing blend of yellow, peach and deep orange make for a spellbinding rose. Lovely glossy foliage and a repeat bloomer. Very tall, upright habit. Mature at 3'-4' x 5'. Zone 5.

WEDDING BELLS ELEGANZA®

PP23,570. Very large, long lasting, two-toned, pink blooms are strongly fragrant and make good cut flowers. Lovely, shiny green foliage adds charm. Performs well in rainy climates. Medium, upright habit. Mature at 3' x 5'. Zone 5.

CLIMBING ROSES

AMERICA™

Award winning, fast growing, very vigorous climber that boasts tons of perfectly shaped coral flowers through the season. Very fragrant, which is a rare treat in modern climbers. Zone 5.

BLAZE IMPROVED

Color cascades from this low-maintenance American favorite with pure red roses opening all at once and continuing their bloom through fall. Blooms on new and old wood. Zone 5.

CLOUD 10™

PP24,295. A pure white climbing rose that has a very full flower similar to the English roses. It is hardy to zone 6 (in zone 5 it would be more like a large shrub). It will do great everywhere, but especially in the South and all areas troubled with black spot. Zone 6.

DON JUAN

Its dark red velvety, very fragrant flowers have seduced gardeners and rosarians alike for more than half a century. There is a bit of a mystery about the Italian hybridizer of this very popular rose as he is almost impossible to find references to. Zone 5.

DUBLIN BAY

Large red fully double flowers will open in colder temperature. It is somewhat slow to climb, but when it is established the canes extend up to 10 ft. Slight fruity fragrance. Zone 5.

EDEN® CLIMBER

Perhaps the best known rose since 'Peace' and 'Mister Lincoln'. 'Eden®' is one of the best selling climbers year after year. Sometimes slow to establish, 'Eden' will reward the patient gardener with an abundance of repeating pastel pink flowers rarely seen with such large blooms. Extremely winter hardy and disease resistant. Zone 5.

FOURTH OF JULY™

PP11,518. 'Fourth of July' reaches skyward with a burst of vibrant colors just like the fireworks that inspired the name. This velvety red and white striped climber will have gardeners celebrating all summer as repeat flowers explode in a shower of sweetly fragrant blossoms. Zone 5.

FRUITY PETALS™

PP28,657. A disease resistant bushy climber, best described as coral with a yellow eye. This upright climber explodes with a heavy flush of blooms in the spring and reblooms throughout the season. Slightly scented. 6" tall. Zone 5.

GOLDEN SHOWERS

Popular yellow climber for nearly 50 years has bright yellow-gold flowers with honey-like fragrance, blooming spring through fall on robust plants. Zone 5.

ICEBERG CLIMBER

A rugged climber with beautiful and fragrant cool white blooms that open to large double roses. Truly vigorous and hardy, this rose will bloom throughout the summer. Zone 5.

JOSEPH'S COAT

'Joseph's Coat' is a hardy, large-flowered climbing rose producing showy clusters of urn-shaped to cupped, double yellow flowers, suffused orange-pink and red as the flowers grow older. Zone 5.

KISS ME KATE™ ARBOROSE®

PP30,810. From Kordes, this vigorous climbing rose sports extremely fragrant, beautiful medium-pink blooms with a classical bud shape. Foliage is dark green with excellent disease resistance. Stems are long enough for good cut flowers. Strong fragrance. 4' wide x 10' tall. Zone 5.

LADY IN RED™ ROMANTICA®

PPAF. A well contained climber, it's more compact than most. USA raised, she boasts the true classic American red coloration that does not turn pink or blue. The bloom has a light tea fragrance with large, old-fashioned ruffled blossoms. Zone 5.

NEW DAWN

A hardy, classic, old favorite with an abundant show of pink flowers peaking in the spring and repeating all summer. Zone 5.

THE PRETTY IN PINK EDEN®

PP20,953. All the greatest qualities of the Eden® rose with a beautiful deep pink color. A Romantica® rose, this plant is grown on its own roots and is disease resistant. Zone 5.

POLKA™ ROMANTICA®

PP9,233. A vigorous climber that combines old rose fashion with repeat flowering, disease tolerance and winter hardiness. The strong apricot color will turn peachier during warm weather. Romantica® Series. Zone 5.

RASPBERRY CREAM TWIRL™

PP22,470. Beautiful deep pink with white striped blooms, it is one of the few striped climbers to have better than average disease resistance. The flowers have a slight green apple fragrance. Reaches 10-12' in height and 4-5' in width. Zone 5.

RED EDEN® ROMANTICA®

PP15,052. Amazing what rose breeding can do. Although totally unrelated to Eden® Climber, this great red climber looks, feels and smells like the best selling rose. More fragrant and maybe a better and earlier bloomer in some climates. Romantica® Series. Zone 5.

TANGERINE SKIES™ ARBOROSE®

PPAF. An outstanding Kordes climber covered with strongly scented, tangerine flowers which emerge from classically shaped buds. The unique flower color and dark green, glossy foliage make a beautiful vertical focal point. 4' wide x 8' tall. Zone 5.

WILLIAM BAFFIN

Beautiful and sturdy, this selection is among the most cold-hardy climbing roses. Blooms are deep pink, fragrant and attractive to butterflies. Excellent choice for fences and arbors. Mature at 10'. Zone 3.

WHITE DAWN

PP16,739. Sometimes more a Rambler than a climber in habit, it is covered with pure white, gardenia-like ruffled flowers. Good rebloomer and winter hardiness. Good classical rose fragrance. Zone 5.

WHITE EDEN® ROMANTICA®

PP16,739. Old-fashioned white flowers cover this very vigorous climber in the spring and contrast nicely with its dark foliage. The growing behavior, plant habit, disease resistance and repeat flowering patterns are exactly the same as 'Eden® Climber', one of the most famous Romantica® climbers. Zone 5.

WINNER'S CIRCLE™

PP19,310. This climber from the breeder of 'Knock Out' is sure to become a favorite; it is one of the most floriferous climbers ever introduced. The fire engine red color is non-fading and can take the heat. In the fall the foliage turns deep burgundy-red and the plants are covered with bright orange hips. Zone 5.

ZÉPHIRINE DROUHIN

Deep pink blooms unfurl to completely cover the grass green foliage of this old-fashioned thornless climber. Bourbon fragrance fills the air around each large bloom. Zone 5.

CLIMBING ROSES ON TRELLIS

We grow an assortment of climbing roses in 7 gallons and train them on a wooden trellis. The varieties vary based on what liners are available and are listed below.

America

Don Juan

New Dawn

Golden Opportunity™

Golden Showers

Iceberg Climber

Kiss Me Kate™ Arborose®

David Austin Roses

FLORIBUNDA ROSES

ADOBE SUNRISE™

PP22,793. A compact rose with bright salmon orange flowers that hold up for a long time. It is self cleaning and the small leaves display nicely with the flowers. Slight fragrance. Zone 5.

ARCTIC BLUE™

PPAF. Loads of shapely flower buds become lilac-pink blossoms and age to a unique lavender-blue tone, then finish with a cream color on the reverse of the petals. Fragrance is moderately fruity to citrus-like. Upright and moderately spreading habit. Zone 5.

ANGEL FACE

One of the best roses of the 20th Century. The purest lavender color with one of the strongest fragrances in modern roses. Ruffled petals add to the charm. A true floribunda in habit. Zone 5.

BOLERO™

PP17,841. This predominantly white rose opens with a touch of pink and is a wonderful rose for cutting. This compact Romantica® has an extraordinarily strong fragrance of traditional rose mixed with tropical fruit. Beautiful disease resistant foliage. Zone 5.

BRICK HOUSE®

A vivid statement in the rose garden. Strong, dark red flowers adorn this bushy rose with each flush throughout the season. Excellent disease resistance. Good rebloomer. Mature at 3.5'. Bushy. Zone 5.

BRICK HOUSE® ORANGE

PPAF. Compact size with bright orange-red blooms that do not fade. Its small, rounded mature size of 2½' in height and width would make it a good choice as a container plant. Zone 5.

BRILLIANT PINK ICEBERG

A mutant of Iceberg and a stunning addition to the line. Blooms are a bright cerise color which appear to be painted onto cream. In cooler conditions the flower color intensifies. Mild honey fragrance. Mature at 2' x 2-5'. Zone 5.

BURGUNDY ICEBERG

PP16,198. Lovely buds, showy flower clusters and almost no thorns add to the beauty of this fabulous, deep purple version of the Iceberg rose. Rounded and shrubby, mature at 3'. Zone 5.

CELESTIAL NIGHT™

PPAF. Old-fashioned, very double plum-purple flowers with a raspberry reverse make an outstanding show in the rose garden! Quite a performer. Mild fruity fragrance. Medium, upright and bushy habit. Zone 5.

CINCO DE MAYO™

PP21,709. This floribunda boasts a non-stop display of flowers whose color is almost impossible to describe. A distinctive mix between smoked lavender and rusty red orange, with the plant habit and great foliage of its award winner parent Julia Child. Zone 5.

DESMOND TUTU SUNBELT®

PP22,828. From Kordes, this rose has glossy deep green foliage and good disease resistance. The deep red flowers have a slight fragrance. It is a recurrent bloomer throughout the season with both clusters and single flowers. 2½' wide x 3' tall. Zone 5.

EASY SPIRIT™

PPAF. Produces classy white large flowers with a cream base. Perfectly formed buds and flowers hold their beauty throughout the life of the flower, making them great for bouquets. Nationally proven resilience to rose disease. Mild tea fragrance. Zone 5.

GILDED SUN

This non-fading yellow rose has exceptional disease resistance for a floribunda. It grows well on its own root and has good dark green glossy foliage. Zone 6.

GINGERSNAP

Mixed shades of bright orange and yellow with peach flush and edging describe the gorgeous blooms of this hardy and disease resistant hybrid. The sunny blossoms begin as urn shaped buds and bloom throughout the season. Zone 6.

HOT COCOA™

PP15,155. Maybe it's chocolate, maybe it's smoky or brick or russet. The colorful hues of Hot Cocoa™ vary with differences in climate. This easy to grow Floribunda will become a focal point in any garden because of its unique beauty. Zone 5.

ICEBERG

This AARS winner is a Kordes introduction and is a top performer. The habit is upright and it is a great choice for hedges. Pure white flowers. Mild honey fragrance. Zone 5.

JULIA CHILD™

PP18,473. Julia loved the butter-gold color of this beautiful Floribunda. The perfectly rounded habit of this beautiful plant along with its disease resistance will make this rose a popular choice for gardeners. A wonderful rose to include in any cutting garden. Zone 5.

KETCHUP & MUSTARD™

PP23,289. Stunning two-tone flowers on a medium size, rounded plant. The bright red petals have a dark yellow backside, creating a striking contrast against the glossy dark green foliage. Mature at 3-4'. Zone 5.

KOKO LOKO™

PP23,269. Unique medium-large, soft milky chocolate-colored blooms with lavender undertones can be added to any flower arrangements thanks to their neutral hue. Full, rounded growth habit maturing at 2½'-3' with a good disease resistance. Zone 5.

LEONARDO DA VINCI™ – 'Meideauri'

PP9,980. A pink Romantica® rose with large clusters of very full and quartered flowers and a lovely mild tea scent. Excellent disease resistance. Mature at 6'-7' wide x 4' tall. A low, spreading climber. Zone 5.

MARMALADE SKIES™

PP12,579. Abundant, tangerine orange blooms cover this compact, everblooming plant. Ideal for low borders, or as a specimen in any landscape. The cluster of blooms make for a perfect one stemmed bouquet. Zone 5.

PASSIONATE KISSES®

PPAF. The fresh salmon colored blooms blend well in any landscape – a perfect companion plant in mixed perennial beds. This Floribunda is always in bloom! The non-stop blooms, along with the attractive shape of this rose, make it perfect for cutting to enjoy indoors. Zone 5.

PINK BRICK HOUSE™

PP32,663. Bright, fluorescent pink flowers are produced from spring until frost. Excellent for containers or the landscape. Very compact habit. Mature at 2½' tall and wide. Zone 5.

PLUM PERFECT™ SUNBELT®

PP22,691. Plum colored double flowers are showy with the dark green shiny foliage. Heat and humidity tolerant. Moderate fragrance. Kordes introduction. Zone 5.

POLYNESIAN PUNCH™

PP28,073. A compact floribunda that would do well in a container. The flowers range from yellow, to orange to pink and it blooms all season. Slight fragrance. Zone 5.

RAINBOW SORBET™

PP16,408. As colorful as a rainbow, as refreshing as a taste of sorbet on a hot summer day. Medium-sized blooms in shades of bright yellow, orange and red. All the wonderful qualities of the Floribunda class on a plant with disease resistance equal to that of many shrubs. Zone 5.

ROSIE THE RIVETER™

PPAF. Very glossy, dark foliage really highlights the bloom color on this stunning rose. Blooms are hardy in shades of oranges and golds suffused with pink then gold on the reverse. Fragrance is moderately fruity with hints of spice and cinnamon. Medium, rounded and bushy habit. Zone 5.

SCENTIMENTAL™

PP10,126. No two flowers are exactly alike in their color or pattern: whether the double cup-shaped blooms boast creamy white petals with red stripes, or red petals with white stripes, they make this continuous bloomer a show stopper in any garden. Vigorous, rounded habit bush maturing at 3-4'. Zone 5.

SOUTH AFRICA® SUNBELT®

Lovely dark gold cupped flowers bloom in clusters and rebloom throughout the season. Moderate fragrance. Kordes introduction. Zone 5.

SUNSPRITE

Considered one of the finest yellow roses in existence, 'Sunsprite' has good disease resistance with excellent form. Zone 5.

TAKE IT EASY™

PPAF. Naturally disease resistant, this stunning red rose with pink undersides is an easy to care for shrub rose. Self cleaning and green shiny foliage all summer long. Slight tea rose fragrance. Zone 5.

VAVOOM™

PP20,166. Glowing color in tones of orange, reminiscent of orange juice, lasts until the very end of these long-lived blossoms. New growth is mahogany red over glossy green foliage. Moderately spicy fragrance. Medium, low, rounded and compact habit. Zone 5.

WINNING STREAK™

PPAF. When in full bloom, this compact, vigorous yet low maintenance bush is covered with distinctive yellow striped cherry-red to fuchsia blooms. It has a good disease resistance and does not require much space thanks to its small mature size of 2' high and wide. Zone 6.

KORDES VERANDA® ROSES

CREAM VERANDA®

PP21,198. An upright, bushy and compact shrub rose which evokes romance. Beautiful, fragrant apricot-cream flowers. A Kordes introduction, it is very disease tolerant and performs well in hot climates. Great in containers and the landscape. Moderately strong fragrance. 2½' wide x 2½' tall. Zone 5.

FIESTA VERANDA®

PPAF. From Kordes, these bright yellow flowers with orange edges contrast beautifully with the dark green glossy foliage. The habit is compact and it grows well in a container or in the ground. Slight fragrance. Mature 2-3' wide x 3-4' tall. Zone 5.

LAVENDER VERANDA®

PP23,683. Beautiful lavender flowers and disease resistance are what make this rose a standout. Great for a container or a small space. Kordes introduction. Slight fragrance. Zone 5.

MANGO VERANDA®

PP29,399. Perfect for a container or small yard, this Kordes variety has vibrant orange flowers which will brighten any location. Slight fragrance. Mature at 2½' wide x 2½' tall. Zone 5.

SUNBEAM VERANDA®

PP23,314. Bright yellow double flowers cover this Kordes variety all season long. Attractive to bees and butterflies, the flowers have a slight fragrance. Great for small spaces. Mature at 2' wide x 2½' tall. Zone 5.

WHITE VERANDA®

PP32,299. Introduced in 2020, this Kordes variety has pure white blooms all season long on a small compact plant. Vigorous on its own roots, it has great disease resistance and performs well in a container or in the ground. Very slight fragrance. Mature at 2½' wide x 2' tall. Zone 5.

MINIATURES

AMBER SUNBLAZE®

PP20,779. This addition to the popular Sunblaze® family has all the qualities that made the family some of the most sought after miniature roses over the last twenty years. Its aggressive bright orange color is sure to make a bold statement whether in the container garden or in mixed borders with perennials. Zone 5.

BRIDAL SUNBLAZE®— 'Meilmera'

PP10,002. The best white flowering miniature rose! Graceful, long lasting and durable soft white blooms are fully double. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 18" wide x 12"-15" tall. Short and bushy. Zone 5.

CANDY SUNBLAZE®— 'Meidanclar'

Abundant and continuous pink and white striped cup shaped blooms start deep pink to wine-red striped with white. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 18"-24" wide and tall. Compact, rounded and bushy. Zone 5.

CHERRY SUNBLAZE®— 'Meibekarb'

Blooms are a true, bright red! A sister plant of Debut in all respects except flower color. Floriferous and neat. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 18" wide x 12"-15" tall. Short and bushy. Zone 5.

DRAGON FRUIT SUNBLAZE®

PPTBS. Lovely, deep-pink-to-red roses on a compact, bushy and vigorous plant. The most disease resistant Sunblaze® variety introduced to date. Excellent for a low hedge or border. Mature at 18" wide and tall. Zone 5.

LEMON SUNBLAZE®

PPTBS. Attractive lemon-yellow flowers unfurl from classically shaped buds. Flowers finish in shades of cream to white. Very slightly scented. Bushy, compact and rounded habit. Mature at 1½' wide and tall. Zone 5.

RAINBOW SUNBLAZE®— 'Meigenpi'

PP17,481. Covers itself with small buds having a bright yellow cast with red undertones which transform into stunning orange-red flowers. Vigorous and bushy. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 18" wide x 12"-18" tall. Medium, bushy. Zone 5.

RED SUNBLAZE®

Plants are vigorous, upright and freely branching. Creates a spectacular hedge, bringing truly vivid red color to traffic control barriers. Zone 5.

SUGAR CANDY ROSE™

PP35,648. A 2026 introduction and an ideal container rose, displaying bright orange, apricot and yellow toned flowers that are larger than the typical miniature rose bloom, increasing its flower coverage and brightening any yard or patio from spring to frost. Good disease resistance, 18" at maturity. Zone 6.

PATIO TREE ROSES

DOUBLE KNOCK OUT® TREE

PP16,202. From the same cross that produced the original Knock Out®, the Double Knock Out® rose represents the next generation in the family of Knock Out® roses. The full double flowers look just like a classic rose. Zone 5.

EASY BEE-ZY™ KNOCK OUT® TREE

PP35,465. Abundant and continuous yellow blooms fading to a creamy color from spring to frost. Single roses attracting pollinators. Vigorous and good resistance to black spot, rust and mildew. Low maintenance. Zone 4.

PEACH DRIFT® ROSE TREE

PP18,542. Soft and subtle peach blooms cover this plant from mid-spring to the first hard freeze. As one of the most floriferous plants, Peach Drift® will pair well with any perennials in the landscape. Zone 5.

PEACHY KNOCK OUT® ROSE TREE

PP25,628. Best for the mid-Atlantic and northern markets, this rose blooms from spring to fall. Pink flowers with yellow centers, the overall color effect is peach, which becomes more intense with cooler temperatures. Zone 4.

PINK DOUBLE KNOCK OUT® ROSE TREE

PP18,507. Bright bubble gum pink classic shaped flowers adorn this pink version of Double Knock Out®. Superior drought tolerance and flowers from early spring to frost make this rose a show stopper. Zone 5.

RED DRIFT® ROSE TREE

PP17,877. Delicate red flowers with excellent disease resistance are what sets this Drift® rose apart from the rest. Perfect for border plantings or anywhere it is allowed to drape naturally, Red Drift® will be sure to add unmatched beauty to your landscape or garden. Zone 5.

AUTUMN SUNBLAZE® TREE

PP9,652. An improved version of Orange Sunblaze. The bloom is a brighter orange that does not fade. Out-performs many garden and pot rose varieties. The bloom and foliage persist through hot, dry summer months. Zone 5.

YELLOW SUNBLAZE® TREE

PP14,274. This Sunblaze® rose has blooms as bright as the sun. Its size and growth habit offer unlimited landscape possibilities. Winter hardy with a vigorous growth habit, this bushy yet compact plant will bloom non-stop spring through fall. Zone 5.

THE PETITE KNOCKOUT® TREE

PP30,811. CPBRAE. Bold red 1½" diameter flowers adorn this truly compact Knock Out® selection. Great disease resistance and an abundance of continuous blooms enable this rose to live up to its name. Zone 5.

POLLINATION GUIDELINES

Many fruit trees require pollination from another variety of the same type in order to produce fruit. The trees must be blooming at the same time for them to cross pollinate. Some fruit varieties are self-pollinating and do not need another tree to pollinate them. See the chart on the following page for specific information for each variety. Our picture tags on each tree have specific pollination information.

APPLES

Most apple varieties need pollination from another variety that is blooming at the same time. Some apples are self-pollinating so only one variety is needed. Some apples are pollen sterile, which means they will not pollinate other apples, but they still need a pollinator to produce fruit.

APRICOTS, PEACHES AND ASIAN PERSIMMONS AND NECTARINES

All of our apricots, peaches, Asian and hybrid persimmons are self pollinating. Our American persimmon seedling need at least two for pollination.

CHERRIES

All of our tart cherries are self-pollinating. Most sweet cherries need a pollinator, but there are a few that are self-pollinating.

PEARS

Most European and Asian pears need pollination from another variety. Seckel and Bartlett will not cross pollinate. Most Asian pears and European pears are not compatible, but Bartlett will pollinate Asian pears that bloom at the same time.

PLUMS, PRUNES, PLUMCOTS AND PLUOTS

Most European prunes and plums are self-pollinating. Most Japanese plums are self-pollinating, and European and Japanese plums will not cross pollinate. Plumcots and Pluots can be pollinated with Japanese plums.

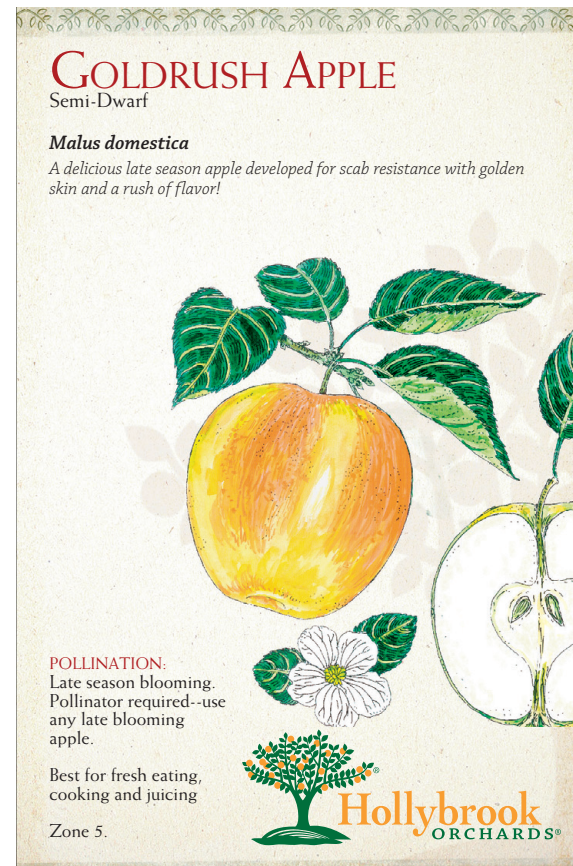

MATURE TREE SIZES

The ultimate size of a fruit bearing tree is controlled by how aggressively the tree is pruned. Fruit trees should be pruned annually to encourage new growth and fruit production. Most fruit trees are budded on dwarfing root stock so they are smaller than standard size fruit trees. Generally, dwarf trees will achieve a mature height of 8-10 feet and semi-dwarf trees will reach 15 feet.

POP MATERIALS

Our fruit trees have large color picture tags with botanical illustrations painted by artists. There is easy to understand pollination information for every variety on each tag, as well as specific cultural information for each species.

Large outdoor banners are available to display with your fruit trees. Colorful rack cards are included with each shipment to promote Home Orcharding to homeowners.

Minimum of 5 trees per variety. Order in multiples of 5. 1-800-323-3008

APPLE

ARKANSAS BLACK APPLE

This beautiful, deep red, late maturing apple tastes even better after a time in storage. Best for fresh eating, sauces and baking. Mid-season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

BALDWIN APPLE

This heirloom variety was first grown in Massachusetts in the 1750's. The fruit is reddish green and is a great apple for fresh eating or cooking. Stores well. Mid-late season bloomer. Pollinator required. Semi-dwarf. Zone 5.

BRAEBURN™ APPLE

This New Zealand introduction produces late ripening fruit that is sweet with a tinge of tartness. Best for fresh eating and winter keeping. Early bloomer. Pollinator required and this variety is pollen sterile. Semi-dwarf. Zone 5.

CHEHALIS APPLE

Early harvest. Fruit is large, greenish yellow. Tree is upright and spreading. Flesh is crisp and juicy. Good for desserts and cooking. Early to mid-season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

CORTLAND APPLE

A hardy tree well suited for northern climates. Its large, red striped fruit with McIntosh parentage keeps well. Best for fresh eating, pies, cooking and canning. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

COX'S ORANGE PIPPIN APPLE

A classic English apple, often regarded as one of the finest flavored dessert apple. Fruit is medium size with red stripes over its orange flush color. The distinctive, rich complex flavors make it a good choice for desserts, pies, cooking and cider. Late season bloomer. Pollinator required. Semi-dwarf. Zone 4.

CRIMSON CRISP® APPLE

PP16,622. A delicious, crisp, medium sized apple with attractive deep-crimson skin. The flavor of the light-yellow flesh is a perfect balance of sweet and tart. Best for fresh eating. Good disease resistance. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

EMPIRE APPLE

A McIntosh x Red Delicious cross that has great McIntosh flavor with the crispness of Red Delicious. Keeps well. Best for fresh eating, sauces and pies. Early bloomer. Pollinator required. Semi-dwarf. Zone 4.

ESOPUS SPITZENBERG APPLE

Thomas Jefferson actually grew this variety in the Monticello orchard and it is said to have been his favorite variety. Fruit is medium-to-large and slightly oval with orangish skin, speckled with russet. Flesh is crisp and tangy. Best for fresh eating and desserts. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

FIRECRACKER™ CRABAPPLE – *Malus spp.*

'Firecracker'. A delightful sparkling jewel of an apple, Firecracker™ looks like a miniature Red Delicious. It has bright red flesh and a spritely flavor. Naturally dwarf and easy to grow. Mid-season bloomer. Pollinate with any apple or crabapple. Zone 3.

GALA® APPLE

This sweet and crunchy, red-orange apple matures in late summer. Considered to be one of the best for fresh eating. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

GINGER GOLD® APPLE

A yellowish green summer ripening apple that is crispy and mildly tart. Great for fresh eating. Mid-late season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

GOLDEN DELICIOUS APPLE

Golden Delicious is still the world's most popular apple, but the flavor is so much better from a home grown tree! Sweet and spicy and a consistent producer. Best for fresh eating, pies, cooking, canning and freezing. Mid-to-late season blooming. Self-pollinating. Semi-dwarf. Zone 5.

GOLDEN RUSSETT APPLE

The 'champagne' of old time cider apples. A small-to-medium-apple having a golden color with a bronze blush and heavily russeted. Yellow flesh is fine-textured, crisp and highly flavored. Best for cider, fresh eating and cooking. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

GOLDRUSH

A crisp yellow apple ripening with a tart, tangy flavor that sweetens with age and keeps well. Considered a dessert apple, it is also good eaten fresh. Blooms late and ripens in mid-to-late October. Disease resistant. Pollinator required. Semi-dwarf. Zone 5.

GRANNY SMITH APPLE

A late season favorite that produces heavy annual crops of tart and tasty green apples. Best for fresh eating, pies and cooking. Good keepers. Mid-to-late season bloomer. Pollinator required. Semi-dwarf. Zone 5.

GRAVENSTEIN APPLE

This heirloom variety was brought to America in the late 1700's from Europe. Because of its crisp flavor, it is still a favorite among apple lovers. Best for fresh eating, cooking and canning. Early season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

HARALSON APPLE

A medium sized, red-striped apple with greenish-yellow under color. Flesh is white, crisp, juicy and firm. Good for fresh eating and cider. Late season bloomer. Pollinator required. Semi-dwarf. Zone 2.

HONEYCRISP™ APPLE

PP7,197. This dessert quality apple is juicy and crisp with a delicate, mildly sweet flavor. The skin is striped scarlet-red over pale yellow. The tree is tolerant to severe winter temperatures. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

IDARED

A firm, sweetly tart, bright red apple with pale, yellow-green flesh. It can be eaten fresh, in salads, as well as baked, cooked in sauces and pies. This variety was developed in Idaho from a cross between Jonathan and Wagener, two antique New York apples. Blooms mid-season and ripens late. Keeps well. Pollinator required. Semi-dwarf. Zone 4.

JONAGOLD APPLE

The best of both worlds – the tart Jonathan and the sweet Golden Delicious combine to make this luscious apple. Jonagold is a preferred dessert apple. Mid-season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

JONATHAN APPLE

A small-to-medium sized, bright red apple with fine, juicy flesh. Good for cooking and fresh eating. Heavy bearer. Early season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

LIBERTY APPLE

Medium-to-large, bright, shiny, McIntosh type fruit is red striped with yellow-green background. Extremely disease resistant. Best for fresh eating, cooking and canning. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

LODI APPLE

An heirloom variety that matures in early summer. The apples have crisp white flesh and are prized for pies and sauce. Early season bloomer. Pollinator required. Semi-dwarf. Zone 4.

MACOUN APPLE

Suited for northern climates, this McIntosh-type apple is preferred by many over McIntosh, one of its parents. Best for fresh eating, cooking, canning and drying. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

McINTOSH APPLE

This heirloom variety has been around since the early 1800's and is a favorite in northern climates. This flavorful apple is best used for baking and fresh eating. Early to mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

MELROSE APPLE

Official Ohio State apple. Large, flattened fruit has yellowish-green skin flushed and streaked with dark red spots. Very good cooking and dessert quality. Tree is vigorous. Mid- to late season bloomer. Pollinator required. Semi-dwarf. Zone 5.

MUTSU (CRISPIN) APPLE

This large, yellow-gold apple with course, crisp flesh has a wonderfully sweet and spicy flavor. Best for fresh eating and baking. Mid-season bloomer. Matures late season. Pollen sterile. Pollinator required. Semi-dwarf. Zone 4.

NEWTOWN PIPPIN APPLE

When ripe this variety is green but mellows to light yellow. Good for fresh eating, cider, sauces, and pies. Has historical significance as being a favorite of George Washington and Thomas Jefferson. Antique apple. Late season bloomer. Self-pollinating. Semi-dwarf. Zone 4.

NORTHERN SPY APPLE

A very late, large apple that is considered one of the best for pies and sauce. Late blooms assure regular crops. Must be pollinated by another late blooming apple variety. Pollinator required. Semi-dwarf. Zone 5.

PINK LADY® APPLE

PP16,725. A sweet-tart apple, also known as Cripps Pink is from Western Australia. It is one of the last varieties to mature and it stores well. Best for fresh eating and cooking. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

POUND SWEET APPLE

This heirloom variety produces large, delightfully sweet, golden russet apples late in the season. Best for fresh eating and canning. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

RED DELICIOUS APPLE

Fruit is sweet, crisp and beautiful. The tree produces heavy crops of extra-fancy type fruit. Best for fresh eating, desserts and salads. Keeps well. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

RED FUJI APPLE

Fuji's success lies in its high quality fruit that is great for both fresh eating and baking. Skin color is an attractive pink stripe over green-yellow background. Keeps well. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

RED ROME APPLE

The tree is a heavy producer of beautiful cherry-red fruit. Best for fresh eating, baking and cooking. Late season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

ROXBURY RUSSETT APPLE

It originated early in the 17th century in Roxbury, Massachusetts, and is probably the oldest named variety of apple in America. Medium-to-large in size, and elliptical in shape, the green skin is tinged a bronze, and overspread with a brownish-yellow russet. High sugar content. Good for fresh eating, baking and cider. Late season. Antique apple. Pollinator required. Semi-dwarf. Zone 4.

SPARTAN APPLE

With firm, crisp and juicy fruit, Spartan is good for fresh eating and desserts. Very aromatic and a good keeper. Red skin and snow white flesh. Tree is strong and a heavy producer. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

STAYMAN APPLE

A heirloom apple with a wonderful sweet-tart flavor. The apples are large and deep red in color. Best for fresh eating, baking and long storage. Late season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

WEALTHY APPLE

Medium sized fruit ripens to pale yellow splashed with an all over scarlet when ripe. The flesh is refreshing, crisp, and very juicy. Flavor is distinctive with a hint of strawberry. Good for fresh eating, sauces and preserves. Excellent pollinator with profuse blooms over a long period. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 2.

WHITNEY CRABAPPLE

The fruit is large for a crabapple and the skin color is light greenish-yellow with red stripes. These tender, juicy apples are great for fresh eating and sauces. Mid-season bloomer. Pollinate with any apple or crabapple. Dwarf. Zone 3.

WINESAP APPLE

This heirloom variety has been around since the early 1800's. The fruit is bursting with spicy flavor and stores exceptionally well. Best for fresh eating, cooking and canning. Late season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

WOLF RIVER APPLE

A heirloom variety that will produce huge apples weighing more than 1 lb. It is a good quality multipurpose apple. Best for baking and fresh eating. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

YELLOW TRANSPARENT APPLE

An early ripening heirloom variety with firm, sweet white flesh. Best for cooking, sauce and fresh eating. Early bloomer. Pollinator required. Semi-dwarf. Zone 3.

APRICOT**BLenheim APRICOT**

Blenheim is perhaps the world's most popular apricot tree. Its pale orange fruit with red dots and aromatic, sweet flavored, juicy, flesh is considered to be the most succulent of all apricots. Best for canning quality and drying. Self-pollinating. Dwarf. Zone 5.

CHINESE APRICOT

This variety produces large crops of medium-to-large fruit that mature early in the season. Fruit has very nice texture and flavor. Best for fresh eating, cooking, canning and drying. Self-pollinating. Dwarf. Zone 4.

GOLDCOT APRICOT

Developed in Michigan, this very cold hardy apricot has a record of producing regular crops of medium-to-large delicious fruits. Best for fresh eating, jam, canning, cooking and drying. Self-pollinating. Dwarf. Zone 5.

TILTON APRICOT

An excellent variety for drying and canning. It has a distinctive flavor. The fruit is medium to small in size. The color is golden-yellow with a dark red blush. Self pollinating. Dwarf. Zone 5.

FLAVOR DELIGHT APRIUM® – *Prunus spp.* 'Flavor Delight'. PP7,090. Apriums are apricot and plum crosses that produce the tangy taste of apricot and the sweetness of plum. Fruit is about 2" in diameter. Best for fresh eating. Pollinate with any apricot. Dwarf. Zone 6.

CHERRY

BLACKGOLD™ CHERRY – *Sweet*. This dark red fleshed cherry is a hybrid of Gold and Stella. It combines the best of both parents to produce heavy crops of beautiful, heart shaped fruit with excellent flavor and crack resistant skin. Best for fresh eating. Self-pollinating. Will pollinate other sweet cherries. Semi-dwarf. Zone 5.

BLACK PEARL™ CHERRY – Introduced by Cornell University, this black cherry matures early and stores well. The fruit is sweet and crack resistant. The tree has an upright habit and the tree is canker resistant. This variety is good for canning, preserves, cooking, sauces and fresh eating. Pollinator required. Semi-dwarf, in maturity 12'-15' tall. Zone 4.

BLACKYORK™ (EASTERN BING) CHERRY

Sweet. The same large, dark red-black, delicious cherries as Bing, but disease resistant and better suited to Eastern growing conditions. Best for fresh eating. Must be pollinated by another sweet cherry variety. Semi-dwarf. Zone 5.

REGINA™ CHERRY – *Sweet*. PP11,530. This German variety produces high quality, dark red fruit. Cherries are large, firm and best for fresh eating. Trees are productive and disease resistant. Must be pollinated by another sweet cherry variety. Not compatible with Van. Semi-dwarf. Zone 4.

RYNBRANDT CHERRY – *Sweet*. Early season, large, black sweet cherry. Rynbrandt is resistant to fruit cracking and is very tasty. Best for fresh eating. Must be pollinated by another sweet cherry variety. Semi-dwarf. Zone 5.

WHITEGOLD® CHERRY – *Sweet*. This yellow fleshed sweet cherry is a hybrid of Emperor Francis and Stella. It combines the best of both parents to produce heavy crops of round shaped fruit with excellent flavor and crack resistant skin. Best for fresh eating. Self-pollinating. Will pollinate other sweet cherries. Semi-dwarf. Zone 5.

BALATON® CHERRY – *Hungarian Tart*. Fruit matures after Montmorency to extend the tart cherry season. These large, high quality cherries are best used for fresh eating and baking. Developed in Hungary. Self-pollinating. Semi-dwarf. Zone 5.

DANUBE™ CHERRY – *Hungarian Tart*. (Erdi Botermo cv.) Medium-to-large, dark red fruits are sweeter than Montmorency. Very productive, naturally dwarf tree. Developed in Hungary. Best for fresh eating and baking. Self-pollinating. Semi-dwarf. Zone 4.

MONTMORENCY CHERRY — *Tart*. The absolute standard of all tart cherries. Bright red fruit with yellow flesh. Early and heavy producer. Best for fresh eating, pies, cooking, canning and freezing. Self-pollinating. Semi-dwarf. Zone 5.

CARMINE JEWEL™ BUSH CHERRY – *Prunus fruticose x Prunus cerasus*. Fruit has dark red flesh, rich cherry flavor and high flesh to pit ratio making it excellent for making pies, preserves, juice, dried fruit and fresh-eating. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6.5' tall x 6' wide. Zone 2.

JULIET™ BUSH CHERRY – *Prunus fruticose x Prunus cerasus*. Full sized dark red fruit with the perfect sugar content and low acidity for fresh eating. This variety is an excellent choice for pick your own orchards. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6½' tall x 6' wide. Zone 2.

ROMEO™ BUSH CHERRY – *Prunus fruticose x.p cerasus*. This bush cherry was selected for fruit sweetness and quality. The fruit is dark crimson with a small pit and does not split. Romeo makes a lovely ornamental plant. Mature size 6-7' tall x 6'. Zone 2.

EDIBLE CRABAPPLE

WHITNEY CRABAPPLE – *Malus spp.* The fruit is large for a crabapple and the skin color is light greenish-yellow with red stripes. These tender, juicy apples are great for fresh eating and sauces. Mid-season bloomer. Pollinate with any apple or crabapple. Zone 3.

NECTARINE**ARCTIC GLO NECTARINE**

PP7,884. This white fleshed nectarine is juicy and sweet. The fruit is a brilliant crimson-red with a creamy white under color. Best for fresh eating. Self-pollinating. Dwarf. Zone 5.

FANTASIA NECTARINE

Flavorful fruit with red skin and yellow flesh follows a beautiful display of bright pink, mid-season flowers. Picked early, the fruit is firm and tangy. Picked later, the fruit is sweet and rich. Ripe in late mid-season. Attracts birds and butterflies. Self-fruitful. Freestone. Zone 6.

FLAVORTOP

Delicately sweet, freestone, large yellow fleshed fruit with red-orange skin. A vigorous tree with fragrant mid-season pink blossoms. Self-pollinating. Mature at 20' but can be kept at 12-15' with proper pruning. Zone 5.

MERICREST NECTARINE

A super hardy variety that can withstand temperatures of -28° F. The fruit has a tangy, sweet taste and is best for fresh eating, canning and desserts. Freestone. Self-pollinating. Dwarf. Zone 5.

REDGOLD NECTARINE

Redgold nectarine produces very high quality fruit that is sweet, juicy and slightly tangy at maturity. Fruit is large and deep red in color. Best for fresh eating, cooking, canning and freezing. Freestone. Self-pollinating. Dwarf. Zone 5.

SUNGLO NECTARINE

This variety is a heavy producer of mid-season fruit with beautiful color and exceptional flavor. Freestone. Self-pollinating. Dwarf. Zone 5.

PEACH**BELLE OF GEORGIA PEACH**

A late season, white fleshed peach that is exceptionally hardy. Mature fruit has a wonderful aroma and very sweet characteristic taste. Best for fresh eating, pies, cooking and canning. Freestone. Self-pollinating. Dwarf. Zone 5.

BLUSHINGSTAR® PEACH

PP10554. A firm, high quality, white flesh peach which matures late in the season. Very productive tree. Best for fresh eating, shipping and storing. Freestone. Self-pollinating. Dwarf. Zone 5.

BONANZA MINIATURE PEACH

This freestone yellow peach produces large sweet fruit. Great for small gardens or container growing. Mature height 4'. Self-pollinating. Miniature. Zone 6.

CANADIAN HARMONY PEACH

This late flowering freestone variety produces large golden peaches with lots of red blush. Great for salads because it is slow to brown, it also freezes well. Self pollinating. Dwarf. Zone 5.

CONTENDER PEACH

An exceptionally hardy, medium to large peach which produces well in colder climates. In spring the tree is covered in lovely pink blooms which are attractive to bees. The red fruit which follows is sweet and delicious. Cold hardy and disease resistant. Ripens in mid to late August. Self-pollinating. Freestone. Zone 4.

CRESTHAVEN PEACH

This hardy, late season peach is a most consistent producer. The yellow flesh is juicy and firm. Best for fresh eating, canning and cooking. Freestone. Self-pollinating. Dwarf. Zone 5.

HARVESTER PEACH

Profuse pink blossoms followed by heavy crops of medium sized, freestone orange-yellow fruit blushed deep carmine in mid-late summer. Firm, sweet and juicy fruit is good for fresh eating, baking and canning. Self-pollinating. Zone 6.

INDIAN BLOOD PEACH

Its name describes it perfectly, an old fashioned Indian peach with a good quality flavor and dark crimson skin and flesh. This variety was also grown by Thomas Jefferson at Monticello. Heavy producer. Best for pickling and preserving. Cling. Self-pollinating. Dwarf. Zone 5.

JULY ELBERTA PEACH

A large, juicy, yellow fleshed peach that is best for fresh eating, canning and freezing. Mid-season. Freestone. Self-pollinating. Dwarf. Zone 5.

LORING PEACH

Large, mid-season, yellow peach lends itself well to canning, cooking and fresh eating. Freestone. Self-pollinating. Dwarf. Zone 5.

MADISON PEACH

A hardy yellow freestone peach. The fruit ripens midseason and is flavorful. Good for fresh eating and canning. Self pollinating Dwarf. Zone 5.

REDHAVEN PEACH

This yellow fleshed peach matures early and crops heavily. It is exceptionally hardy and the standard by which all other peaches are compared. Best for fresh eating, pies, cooking and freezing. Semi-freestone. Self-pollinating. Dwarf. Zone 5.

RELIANCE PEACH

One of the hardiest peaches available, this variety consistently produces heavy crops. Fruit is high quality and best used for fresh eating, pies, cooking and canning. Freestone. Self-pollinating. Dwarf. Zone 5.

SATURN PEACH

A freestone, doughnut shaped peach with white, tender sweet flesh. The pit can easily pop out of the fruit with a finger poke and gentle pull. Good for fresh eating and desserts. Matures early season. Self-pollinating. Zone 5.

SWEET CAP™ PEACH

This donut type peach (Peento) has white flesh and dark red skin. Perfect for fresh eating as it is juicy, sweet and the pit is small. Self-pollinating. Dwarf. Zone 5.

WHITE LADY PEACH

This beautiful red skinned peach is a real winner with its firm white flesh and mild sweet taste. A productive, cold hardy variety that ripens mid-season. Best for fresh eating. Freestone. Self-pollinating. Dwarf. Zone 5.

PEAR

ANJOU PEAR – *European*. Our highest quality winter pear. Fruit is bright green, developing a tinge of yellow at maturity. The tree is vigorous but slow to come into bearing. Best for fresh eating and winter keeping. Must be pollinated by another European pear. Dwarf. Zone 5.

BARTLETT PEAR – *European*. The most popular pear variety in U.S.A. The smooth buttery flesh is sweet and juicy. Adaptable to many different soil types and growing areas. Best for fresh eating, cooking and canning. Must be pollinated by another European pear, except Seckel. Dwarf. Zone 5.

COMICE PEAR – *European*. Comice is a luscious, rich flavored well known dessert pear. The skin color is a beautiful golden yellow tinged with a hint of red. Best for fresh eating, salads and baking. Must be pollinated by another European pear. Dwarf. Zone 5.

GOLDEN RUSSET BOSCH PEAR – *European*. A favorite of many with its sweet, juicy white-yellow flesh and cinnamon colored russet skin. Best for fresh eating and canning. Must be pollinated by another European pear. Dwarf. Zone 4.

KIEFFER PEAR – *European*

A large, green-yellow pear that matures late. Long-lived trees are resistant to fire blight. Fruit is best for fresh eating and winter keeping. Self-pollinating. Will pollinate other European pears. Dwarf. Zone 4.

MOONGLOW PEAR – *European*. This wonderful European pear matures about a week after Bartlett and shows some resistance to fire-blight. The medium-to-large pears are sweet and juicy. Best for fresh eating, canning and cooking. Must be pollinated by another European pear. Dwarf. Zone 4.

RED ANJOU PEAR – *European*. Fine textured pear with golden-white flesh that is mild and juicy. Skin is deep red and gets even brighter as it ripens. Best for fresh eating and winter keeping. Must be pollinated by another European pear. Dwarf. Zone 5.

RED BARTLETT PEAR – *European*. Beautiful red fruit is very similar to the green Bartlett. Best for fresh eating, cooking, canning and freezing. Must be pollinated by another European pear, except Seckel. Dwarf. Zone 5.

SECKEL PEAR – *European*. A very firm, small, green-red pear, prized for its high sugar content. This very productive tree bears huge crops at maturity. Best for fresh eating, winter keeping, cooking and canning. Must be pollinated by another European pear, except Bartlett. Dwarf. Zone 5.

CHOJURO PEAR – *Asian*. An early bearing variety with medium-to-large, flattened, golden-brown fruit. Habit is somewhat droopy. Best for fruit salads, fresh eating and canning. Must be pollinated by another Asian pear. Dwarf. Zone 4.

DAISUI LI™ PEAR – *Asian*. PP6,075. Large, medium green fruit that bursts with juicy sweet flavors. A real taste delight that's best for fresh eating. Must be pollinated by another Asian pear. Dwarf. Zone 4.

HARDY GIANT™ PEAR – *Asian*. Also known as New Arirang, Olympic Giant and Korean Giant Pear, this giant sized (3½-4"), round Asian pear has excellent flavor. Fruit is russet brown when ripe and best for fresh eating and canning. Must be pollinated by another early blooming Asian pear. Dwarf. Zone 5.

HOSUI PEAR – *Asian*. An early season, russet type, with round globular shape. The higher acid level adds a sprite zip to the mellow flavor. Best for fresh eating and they keep well. Moderately self-fruiting, but for maximum harvests pollinate with 20th Century. Will pollinate other Asian pears. Dwarf. Zone 5.

RAJA PEAR – *Asian*. This is a must have variety if you like flavor. The fruit is an attractive golden brown with a very sweet, richly flavored, quite delectable taste. This hardy variety is very productive and disease resistant. Best for fresh eating. Must be pollinated by another Asian pear. Dwarf. Zone 4.

SHIN LI™ PEAR – *Asian*. Large, greenish-yellow fruit that is wonderfully sweet, aromatic, crisp and juicy. Very productive. Best for fresh eating. Must be pollinated by another Asian pear. Dwarf. Zone 4.

SHINKO PEAR – *Asian*. Medium-to-large, rich flavored fruit with good texture makes this variety special. A good keeper, and fire blight resistant. Best for fresh eating and canning. Must be pollinated by another Asian pear. Dwarf. Zone 4.

SHINSEIKI PEAR – *Asian*. Also known as New Century, this variety produces an early season, round, smooth, yellow skinned pear. Flesh is sweet, crisp and juicy with excellent storage life. Best for fresh eating and salads. Must be pollinated by another Asian pear. Dwarf. Zone 5.

TSU LI PEAR – *Asian*. An ancient heirloom cultivar from China, which produces a medium to large, light green to yellow, oval shaped pear. The fruit has white flesh with a tinge of yellow and is crisp and juicy. A vigorous, very productive pear tree. Self-fertile. Zone 5.

20TH CENTURY PEAR – *Asian*. Also known as Nijisseiki, this apple pear is one of the best Asian varieties. Flesh is sweet, slightly tart, firm and juicy. Fruit is round, greenish-yellow and very uniform. Very productive. Best for fresh eating and canning. Must be pollinated by another Asian pear. Dwarf. Zone 5.

PERSIMMON

AMERICAN PERSIMMON – *Diospyros virginiana*. The native habitat ranges from southern Connecticut to Florida and west to Kansas. Highly valued by native Americas for its fruit and wood, the fruit is also a favorite of deer, turkeys and other wildlife. Honey bees love its white fragrant flowers. Fruit is astringent and should ripen before eating. Mature height 25'-40' tall and 20'-35' wide. Plant multiple seedlings for proper pollination. Zone 5.

FUYU (IMOTO) PERSIMMON – *Diospyros kaki*. Large, round, flattened. More "square" and flatter than Jiro. Reddish-brown skin. Smooth texture. Non-astringent. Mature 25-35'. Self-pollinating. Zone 7.

HACHIYA PERSIMMON – *Diospyros kaki*. This Asian persimmon has large, acorn shaped, orange fruits that are wonderfully sweet when ripe. Astringent. Mature 20-25'. Self-pollinating. Zone 7.

JIRO PERSIMMON – *Diospyros kaki*. One of the most popular varieties in Japan, this Asian persimmon has large, flattened, round fruit that is seedless and sweet. Non-astringent. Mature 20-25'. Self-pollinating. Zone 6.

SAIJO PERSIMMON – *Diospyros kaki*. An Asian persimmon that consistently produces medium-sized elongated fruit with the best taste of all the Kaki. Fruit must be allowed to soften before eating. Astringent fruit. Mature 20-25'. Self-pollinating. Zone 6.

PLUM

AU ROSA PLUM – *Japanese*. An improved version of Santa Rosa Japanese plum from the Auburn University in Alabama. Fragrant white flowers attract a multitude of pollinators. Delicious fruit has bright red skin and yellow flesh, best for fresh eating, jam, baking, canning, freezing and jelly. Good disease resistance. Ripens in mid-August. Self-pollinating. Zone 5.

RED ACE PLUM – *Japanese*. These semi-freestone fruits mature late summer. Fruit is crimson-red with green-yellow background. Best for fresh eating, desserts, snacks and canning. Must be pollinated by another Japanese plum. Semi-dwarf. Zone 5.

DUARTE PLUM – *Japanese*. Tree is vigorous and hardy. The deep red fruit is large with firm, juicy sweet flesh. Best for fresh eating and canning. Must be pollinated by another Japanese plum. Semi-dwarf. Zone 5.

ELEPHANT HEART PLUM – *Japanese*. This variety produces large, heart shaped fruit that has dark red skin and red flesh. Best for fresh eating. Must be pollinated by another Japanese plum. Semi-dwarf. Zone 5.

METHLEY PLUM – *Japanese/American*. Sometimes called “Sugar Plum”, this Japanese style plum has medium sized fruit and is very productive. Best for fresh eating and canning. Self-pollinating. Will pollinate other Japanese plums. Semi-dwarf. Zone 5.

SANTA ROSA PLUM – *Japanese*. This large plum with its deep red-purple skin and amber flesh is juicy and delicious. Best for fresh eating, desserts, snacks and canning. Self-pollinating. Will pollinate other Japanese plums. Dwarf. Zone 5.

SATSUMA PLUM – *Japanese*. This very sweet, medium sized red fruit is oval in shape. It is a productive, consistent bearing tree. Best for fresh eating and canning. Must be pollinated by another Japanese plum. Semi-dwarf. Zone 5.

SHIRO PLUM – *Japanese*. The ultimate yellow plum. This Japanese type is very productive. Fruits are medium-to-large, sweet and juicy. Best for fresh eating, canning and desserts. Pollinator required. Must be pollinated by another Japanese plum. Dwarf. Zone 5.

SUPERIOR PLUM – *Japanese /American*. A dessert quality plum with striking bright red skin and juicy yellow flesh. Cold hardy and a good choice for northern climates. Best for fresh eating. Harvest late mid-season. Requires pollination by another Japanese-American plum variety. Clingstone. Semi-dwarf. Zone 4.

TOKA PLUM – *Japanese /American*. A very sweet and juicy, reddish-bronze plum with yellow flesh. Dessert quality, best for fresh eating. Requires pollination by another Japanese-American plum variety. Clingstone. Semi-dwarf. Zone 4.

DAMSON PLUM – *European*. This European plum is named for Damascus, where it most likely originated. The small, tart, juicy fruit is considered the best for making preserves. Self-pollinating. Will pollinate other European plums. Dwarf. Zone 5.

GREEN GAGE PLUM – *European*. This European plum has a sweet, distinctive flavor and makes wonderful jam! Green Gage is cold hardy and productive. Best for fresh eating, desserts and preserves. Self-pollinating. Will pollinate other European plums. Semi-dwarf. Zone 5.

PRESIDENT PLUM – *European*. A heavy producer of large oblong fruit with dark blue skin and yellow flesh. Best for fresh eating, this plum ripens in late season. Requires pollination by another European plum. Freestone. Semi-dwarf. Zone 5.

FRENCH PRUNE PLUM – *European*. This prune-plum has a very sweet and mild flavor. The small-to-medium fruits are red to purplish-black. Best for fresh eating, canning and drying. Self-pollinating. Will pollinate other European plums. Semi-dwarf. Zone 5.

ITALIAN PRUNE PLUM – *European*. A large, dark purple fruit that is good for both canning and drying. One of the finer prune-plum varieties. Heavy bearer. Self-pollinating. Dwarf. Zone 5.

STANLEY PRUNE PLUM – *European*. Hardy trees yields consistent crops of blue, medium sized oval, freestone fruit. Best for fresh eating, cooking, canning and drying. Self-pollinating. Will pollinate other European plums. Dwarf. Zone 5.

YELLOW EGG PLUM – *European*. A heavy producer of large oval fruit with golden yellow skin and golden flesh. A dessert quality plum which sweet, juicy and has a taste of honey. Best for fresh eating, cooking and canning. Self-pollinating. Freestone. Semi-dwarf. Zone 5.

FLAVOR SUPREME PLUOT®
PP6,763. Pluot is a plum like fruit with the firmness and flavor you get from apricot. Fruit is solid red when fully ripe and very sweet. Best for fresh eating. Pollinate with any Japanese plum. Dwarf. Zone 6.

BEACH PLUM – *Prunus maritima*. This fruiting shrub is native to coastal dunes of the Northeastern United States. Since colonial times, people have collected wild fruit to make preserves and jelly. Will tolerate salt spray. Mature size 6' x 6'. Must have at least two for pollination. Zone 3.

ESPALIER FRUIT TREES

A great way to grow fruit in a limited space, these trees are pruned to a horizontal multi-tier espalier form and shipped on a wooden trellis.

COLONNADE®

GOLDEN SENTINEL™ COLONNADE® APPLE – *Malus pumila*. Enjoy the wonderful spring display of snow white flowers followed by large solid gold fruit. Sweet juicy flesh is good for fresh eating and baking. Harvest in early to mid-September. Column shape works well for container gardening or small spaces. Mature size 8' x 2'. Early to mid-season bloomer. Pollinator required. Zone 5.

NORTHPOLE™ COLONNADE® APPLE – *Malus pumila*. Variety has a beautiful spring showing of pure white flowers followed by a heavy crop of large, red, McIntosh-like apples. Compact growth habit is straight up with virtually no branching. Column shape works well for container gardening or small spaces. Harvest in early September. Mature size 8' x 2'. Early to mid-season bloomer. Pollinator required. Zone 5.

SCARLETT SENTINEL™ APPLE
Large, delicious, greenish-yellow fruit with attractive dense clusters of white flowers. Abundant, closely spaced fruit. Very productive and disease resistant. One of the most dwarfing of the columnar varieties. Mature size 8' x 2'. Early to Mid-season bloomer. Pollinator required. Zone 4.

APRIUM, PLUOT, PLUERRY

FLAVOR DELIGHT APRIUM® – *Prunus salicina x armeniaca*. PP7,090. Apriums are an apricot-plum cross. The fruit has the tangy taste of apricot mixed with the sweetness of plums. Fruit is about 2" in diameter. Best for fresh eating. Pollinate with any apricot. Dwarf. Zone 6.

FLAVOR SUPREME PLUOT® – *Prunus salicina x armeniaca*. PP6,763. Pluot is a plum like fruit with the firmness and flavor you get from apricot. Fruit is solid red when fully ripe and very sweet. Best for fresh eating. Pollinate with any Japanese plum. Dwarf. Zone 6.

SWEET TREAT PLUERRY™ – This new fruit is a complex Interspecific hybrid predominantly a combination of plum and cherry. The fruit is larger than a cherry and has the sweetness of cherry and zing of fresh plum. Requires pollination by a late flowering Japanese plum or pluot. Standard height. Zone 6.

BUSH CHERRY

CARMINE JEWEL™ BUSH CHERRY – *Prunus fruticosa x Prunus cerasus*. Fruit has dark red flesh, rich cherry flavor and high flesh to pit ratio making it excellent for making pies, preserves, juice, dried fruit and fresh-eating. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6.5' tall x 6' wide. Zone 2.

JULIET™ BUSH CHERRY – *Prunus fruticosa x Prunus cerasus*. Full sized dark red fruit with the perfect sugar content and low acidity for fresh eating. This variety is an excellent choice for pick your own orchards. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6.5' tall x 6' wide. Zone 2.

ROMEO™ BUSH CHERRY – *Prunus fruticosa x Prunus cerasus*. This bush cherry was selected for fruit sweetness and quality. The fruit is dark crimson with a small pit and does not split. Romeo makes a lovely ornamental plant. Mature size 6-7' tall x 6'. Zone 2.

FIG

BLACK SPANISH FIG – *Ficus carica*. This variety bears abundant crops of dark mahogany fruit. The sweet, juicy firm fruit is great for fresh eating, preserves and drying. A naturally dwarf tree. Suitable for containers and capable of bearing two crops a year. Self-pollinating. Zone 7.

BROWN TURKEY FIG – *Ficus carica*. Handsome, low, bushy plant produces medium to large elongated purple-brown fruit. Everbearing beginning in early June. Mature size 10'. Self-pollinating. Zone 5.

CELESTE FIG – *Ficus carica*. These are the "candy" figs, sweet as sugar and great for desserts and gourmet recipes. Fruit is brown to purple. This hardy and vigorous plant grows 6-10'. Self-pollinating. Zone 6.

CHICAGO HARDY FIG – *Ficus carica*. Hardy for northern climates, this fig may die back to the ground but will grow back in the spring ready to produce sweet figs again. Fruit has a purple-brown colored flesh. Mature size 8'. Self-pollinating. Zone 5.

FIGNOMENAL – *Ficus carica*. A great choice for container growing. Sweet, medium sized fruit ripens brown on the outside with reddish flesh. Everblooming thus everbearing. Self-pollinating. Mature at 2'-3' tall and wide. Zone 7.

ITALIAN HONEY FIG – *Ficus carica*. Also known as Lattarulla fig, this reliable and hardy variety will bear good crops of large, greenish-yellow fruit with sweet, light amber flesh. Lattarulla bears two crops in one season, one ripening in late July and the second in mid-September. Mature size 12-15'. Self-pollinating. Zone 7.

OLYMPIAN FIG – *Ficus carica*. Olympian produces two crops of green and purple striped fruit with sweet, violet flesh that is excellent for fresh eating, canning or drying. It is incredibly cold hardy and reliably produces two crops. Self-fruitful. Mature at 4'-8'. Zone 6.

PETER'S HONEY FIG – *Ficus carica*. Originally from Sicily, this variety is the sweetest of all figs! The light greenish fruit is tender and sweet. Mature height is 10'. Best for fresh eating and cooking. Self-pollinating. Zone 7.

VIOLET DE BORDEAUX FIG – *Ficus carica*. A small to medium size fig with purple-black fruit having very deep red strawberry pulp and a sweet, rich flavor. Plants will thrive in extremes of heat, humidity and drought and have very good resistance to pests and disease. Enjoy fresh picked or dried. Self-fruitful. Mature at 6'-10'. Zone 5.

GOUMI

SWEET SCARLET™ GOUMI – *Elaeagnus multiflora*. This variety has juicy and aromatic fruit with a unique sweet-tart flavor that resembles pie cherries. Very good eaten fresh, it is also used to make preserves. Mature height 6'. Self-pollinating. Zone 4.

GUAVA

PINEAPPLE GUAVA SEEDLING – *Feijoa sellowiana*. Glossy green leaves with a whitish-silver cast underneath. Striking flowers have a crimson red center with bright pink petals. Plant several to form an attractive evergreen hedge. Dark green fruit is flavorful with a taste of mint and pineapple. Bright pink petals are sweet with a hint of cotton candy. Two are needed for proper pollination. Mature 6-8'. Zone 7.

JUJUBE

HONEY JAR JUJUBE – *Ziziphus jujuba*. Small, spicy yet sweet, fruit with thin skin ripens very early. One of the best for coastal northern climates, yet it tolerates warm tropical conditions as well. Disease and pest resistant. Self-fertile. Mature height 12'-15'. Zone 5.

LANG JUJUBE – *Ziziphus jujuba* 'Lang'. Lang has an attractive form and bears striking, large, pear-shaped, golden brown fruit. Fruit is crisp, flavorful and delicious eaten fresh, dried, or candied. An attractive small tree with light gray, lightly contorted branches and dainty light green foliage. Mature height 20'. Partially self-pollinating. Zone 4.

LI JUJUBE – *Ziziphus jujuba*. Li is a truly beautiful tree that produces an abundance of very large, mahogany brown fruit. The fruit is sweet, crisp, and flavorful. It is shaped like a small egg with a very small, almost unnoticeable seed. Crops are heavier when two or more varieties are planted. Mature height 8-10'. Partially self-pollinating. Zone 5.

SHANXI LI – *Ziziphus jujuba*. Produces plump, yellow-green fruit which ripens off the tree to a rich mahogany. Often reaching 2", Shanxi Li is touted as having the largest fruit of any jujube. Originating in Central Asia, it is both heat and drought tolerant. Mature 5' - 6' tall. Zone 5.

KIWI

HARDY ANNA KIWI – *Actinidia arguta*. The sweet, emerald green flesh is sweet to eat. Fruit is round to cylindrical in shape and can weigh up to ½ oz. Vines are vigorous. Pollinator required. Zone 4.

HARDY RED KIWI – *Actinidia purpurea*. Named for its cranberry-red fruit and red flesh, this unique species bears good crops of delicious, sweet-tart flavored fruit. Pollinator required. Zone 4.

HARDY MALE KIWI – *Actinidia arguta*. This attractive, easy to grow vine is covered fragrant, white flowers in May. One male plant can pollinate up to 8 female plants. The male plant does not produce fruit. Zone 4.

MULBERRY

EVERBEARING MULBERRY – *Morus nigra*. A mulberry with a small space requirement. Fruit is medium to large in size, black when ripe and wonderfully sweet. Great for fresh eating, jams, jellies and wine. Self-pollinating. Multi-stemmed or trained to a tree-form. Can be pruned after fruiting to maintain a 2'-6' height, otherwise it is mature at 10'-15' tall x 15'-20' wide. Zone 5.

ILLINOIS EVERBEARING MULBERRY – *Morus alba x M. rubra*. This handsome tree has beautiful dark green, tropical-like foliage. It is valued most for its tasty 1½" long, virtually seedless fruit that is good for both fresh eating and cooking. Mature height 25-30'. Self-pollinating. Zone 5.

MOJO BERRY® – *Morus rotundiloba*. Dwarf, compact everbearing mulberry reaching a mature size of 7' high by 3' wide if planted in-ground and 5' by 2' if container grown. It produces black berries from May until September and does not require any chilling hours to set fruit. Self pollinating. Zone 7.

RED MULBERRY – *Morus alba rubra*. A medium sized, upright, spreading and rounded fruit tree. When ripe the ¾"-1" fruit is red to deep purple in color and relished by humans and wildlife. Self-fertile. Mature at 35'-50' tall x 30'-40' wide. Zone 4.

OLIVE

ARBEQUINA OLIVE – *Olea europaea*. This Spanish variety is a beauty with its shiny, dark evergreen leaves and weeping form. It begins bearing quality gourmet olives after one year. Tree is slow growing to about 25-30'. Self-pollinating. Zone 8.

PAWPAW

PAWPAW – *Asimina triloba*. Seedling. Exotic and attractive, this hardy, Native American fruit has a banana-like flavor with creamy custard-like flesh. This tree produces unusual purple flowers before its large, tropical looking foliage appears. Fall color is a striking yellow. Two seedling pawpaws will cross pollinate. Mature height 12-15'. Zone 5.

POMEGRANATE

AMBROSIA POMEGRANATE – *Punica granatum*. Produces large fruit with pale pink skin. The delicious purple juice from this variety has a sweet-tart flavor. Hummingbirds love the showy, orange-red flowers. Best to keep pruned to 3-6 trunks. Mature at 10'. Zone 7.

GRANADA POMEGRANATE – *Punica granatum*. PP2,618. A bud sport of Wonderful with darker, less tart fruit. Large fruit is good for fresh eating, juice and decorating. Plant can be shaped to a bush or tree form. Mature 12'. Self-pollinating. Zone 7.

WONDERFUL POMEGRANATE – *Punica granatum*. Fruit is large, greenish-red to reddish-orange with a delicious tangy flavor. Well known variety. Shrub or tree form. Mature 18'. Self-pollinating. Zone 7.

TEA PLANT

KOREAN TEA PLANT – *Camellia sinensis*. Grow and harvest tea! This attractive evergreen is a camellia grown for foliage rather than flowers. The tea is aromatic and flavorful and this variety is one of the hardiest tea plants. Mature height 5'. Zone 7.

ARONIA

VIKING ARONIA – *Aronia melanocarpa* 'Viking'. An attractive, easy to grow native plant with glossy green foliage and pink-tinged white blooms. Wine black berries are antioxidant rich and ripen in late summer. Good for jams, preserves, wine and baking. Cold hardy. Self-pollinating. Mature at 5'-6' tall and wide. Zone 3.

BUSHEL AND BERRY®

BABY CAKES™ BLACKBERRY – *Rubus hybrid*. PP27,032. Perfect for container growing. Dwarf, compact and thornless. In most regions two crops are produced per season, classic flavor. Zone 4.

BERRYBUX™ – *Vaccinium angustifolium x corymbosum*. PP25,467. When the white flowers open in spring, boxwood-like foliage emerges. The flowers yield a dramatic display of berries that turn yellow, then red and ripen dark blue and are aromatic. Packed with antioxidants and a great plant for containers. This was formerly named Blueberry Glaze. Mature at 2'-3'tall and bushy. Zone 5.

JELLY BEAN® BLUEBERRY – *Vaccinium angustifolium x corymbosum*. ZF06-179. PP24,662. CPBR 5496. Think of homemade blueberry jelly and you have the flavor of this handsome variety. Berries are large and flavorful over unique elongated foliage. Green leaves have red tints in cooler climates. Great when used as a mini-hedge. Mature at 1'-2' tall and mounded. Zone 4.

PEACH SORBET® BLUEBERRY – *Vaccinium corymbosum*. PP23,325. A compact blueberry bush with new growth emerging in various shades of orange-pink before turning to green. The foliage takes on a purple color in fall. Mature at 2' x 2' tall and wide. Zone 5.

PERPETUA BLUEBERRY – *Vaccinium angustifolium x corymbosum*. PP24,209. A beautiful plant for the landscape with the added benefit of producing two crops of deliciously flavorful berries each year. The first ripens mid-summer, then the plant flowers a second time and sets fruit for fall harvest. Lovely color interest in the fall and winter as green leaves turn deep reds and greens. Mature at 4'-5' tall and upright. Zone 4.

PINK ICING® BLUEBERRY – *Vaccinium angustifolium x corymbosum*. PP23,336. Large fruit is robustly flavored and the foliage is a dazzling display of color in shades of pink mixed with blue and deep greens turning iridescent turquoise blue in winter. Year-round beauty. A great variety for a decorative planter. Mature at 3'-4' tall and mounded. Zone 5.

SILVER DOLLAR™ BLUEBERRY – *Vaccinium corymbosum*. PPAF. A blueberry with unique foliage resembling that of a Eucalyptus having hints of silver in spring and summer. Medium sized blueberries ripen in summer. A mounded shrub, mature at 2'-3' tall and wide. Zone 5.

BREW-TEA-FUL™ TEA CAMELLIA – *Camellia Sinensis*. PP33,458. Whether planted as an evergreen hedge or in a patio container, not only the fresh new leaves provide the growers with their favorite choice of tea, but the blossoms can also be used to make an aromatic fall drink. Mature height 5-6'. Zone 7.

RASPBERRY SHORTCAKE® RASPBERRY – *Rubus idaeus*. PP22,141. Good for container or landscape growing, this thornless raspberry is compact with a rounded habit. The medium size summer fruit is sweet. 2'-3' tall. Zone 4.

BLACKBERRY

CHESTER BLACKBERRY – *Rubus spp.* This thornless variety produces large, very sweet, high quality fruit that ripens in July. Excellent for fresh use, jams, jellies and baked products. Self-fruitful. Zone 5.

PRIME-ARK® FREEDOM BLACKBERRY – *Rubus x 'APF-153T'* PP26,990. Thornless variety producing 2 crops of large, firm berries on older canes early in the season and on new canes in late summer/early fall. Self-fruitful. Zone 5.

TRIPLE CROWN BLACKBERRY – *Rubus spp.* Named for its three crowning attributes – flavor, productivity and vigor. Vines are high yielding, semi-trailing and thornless. Fruit ripens in early July. Self-fruitful. Zone 5.

BLUEBERRY

BLUECROP BLUEBERRY – *Vaccinium corymbosum*. A mid-season, good flavored berry. Consistently produces clusters of medium-to-large, light blue fruit of good quality. Hardy and more drought resistant than most. Plant two varieties for best fruit production. Early mid-season. Zone 4.

BLUEJAY BLUEBERRY – *Vaccinium corymbosum*. Open, loose clusters of medium-to-large light blue berries with a mild, slightly tart flavor. Good dessert quality. Plant two varieties for best fruit production. Early. Zone 5.

BLUERAY BLUEBERRY – *Vaccinium corymbosum*. This variety produces small, tight clusters of large, medium blue fruit with very sweet, slightly tart, aromatic flavor. Plant two varieties for best production. Early mid-season. Zone 4.

CABERNET SPLASH™ – *Vaccinium corymbosum*. A Northern Highbush blueberry with an abundant fruit set which ripens early mid-season. This variety has good ornamental interest with dark wine color foliage aging to green in summer and vibrant red in the fall. Compact, upright habit and good in containers. Self pollinating. Mature at 3'-4' tall and wide. Zone 4.

DUKE – *Vaccinium corymbosum*. A stocky, upright northern highbush blueberry. Early ripening, large, firm, light blue blueberries with mild flavor. Best for fresh eating. Mature at 4'-6' tall and wide. Zone 4.

EARLIBLU BLUEBERRY – *Vaccinium corymbosum*. These medium sized, light blue, berries have an excellent, mild, sweet flavor. Vigorous variety. Plant two varieties for best fruit production. Early. Zone 5.

ELLIOTT BLUEBERRY – *Vaccinium corymbosum*. Nice ornamental bush with bluish green leaves and late blooming flowers. Fruit is small-to-medium in size and light blue in color. Flavor is mild. Mature at 5'-8'. Self-pollinating. Late. Zone 4.

JERSEY BLUEBERRY – *Vaccinium corymbosum*. Long, loose clusters of small-to-medium light blue berries. Vigorous, fast growing, bush with open, spreading canes. Plant two varieties for best production. Mid-season. Zone 4.

PATRIOT BLUEBERRY – *Vaccinium corymbosum*. This early season blueberry bears consistent crops of large berries. Lower growing than most highbush blueberries, this variety is adaptable to many soil types and is somewhat resistant to phytophthora. Early. Zone 3.

PINK LEMONADE BLUEBERRY – *Vaccinium corymbosum*. The only pink blueberry out there, Pink Lemonade offers wonderful pink flowers that give way to beautiful pink blueberries. The berries have a mild, pleasant flavor that ripen mid- to late-season. Zone 4.

PINK POPCORN™ BLUEBERRY – *Vaccinium corymbosum*. A northern highbush blueberry producing pale pink fruit with a darker pink blush which ripen in early to mid-season. True blueberry flavor and aroma. Self fertile, but plant another variety for better production. Mature at 4'-5'. Zone 3.

CHIPPEWA BLUEBERRY – *Vaccinium corymbosum* x *Vaccinium angustifolium*. Medium-large sky blue fruit is smoothly sweet and ripens mid-season. A cold hardy half-high blueberry variety. Self fertile, but plant another variety for better production. Compact growth habit. Can be grown in a container. Mature at 3'-4'. Zone 3.

NORTHBLUE BLUEBERRY – *Vaccinium corymbosum* x *Vaccinium angustifolium*. Medium sized fruit with a juicy, wild blueberry flavor ripen mid-season. Best for fresh eating and baking. A cold hardy half-high variety. Self fertile, but plant another variety for better production. Open and upright growth habit. Mature at 3'-4'. Zone 3.

NORTHCOUNTRY BLUEBERRY – *Vaccinium corymbosum* x *Vaccinium angustifolium*. Medium sized fruit with a classic, wild blueberry flavor ripens early mid-season. A cold hardy half-high variety. Plant a second cold hardy blueberry variety for the best fruit production from each. Compact and spreading habit. Suitable for container growing. Mature at 2' x 3'. Zone 3.

POLARIS BLUEBERRY – *Vaccinium corymbosum* x *Vaccinium angustifolium*. Medium sized, aromatic and very sweet fruit ripens early season. A cold hardy half-high blueberry variety. Plant another cold hardy variety with Polaris for the best fruit production from each. Mature at 3'-4'. Zone 3.

TOP HAT BLUEBERRY – *Vaccinium angustifolium* 'Top Hat'. Pea-sized light blue fruit follows lovely white flowers. A cold hardy blueberry with a delicious flavor. Good for container growing. Grows best in full sun. Plant a second cold hardy blueberry variety for best fruit production from each. Mature 2' x 2'. Zone 3.

NORTHLAND BLUEBERRY – *Vaccinium corymbosum* x *Vaccinium angustifolium*. These berries have a wild blueberry flavor that is great for pies and fresh eating. Self fertile, but plant another variety for better production. Zone 3.

CRANBERRY

PILGRIM CRANBERRY – *Vaccinium macrocarpon*. Pilgrim is an attractive, evergreen groundcover with dainty foliage. Its small pink flowers produce an abundant crop of tasty red berries. Habit is spreading, growing only about 6" in height. Self-fruitful. Zone 4.

ELDERBERRY

SAMDAL – *Sambucus nigra* 'Samdal'. An introduction from Denmark. Fruit is borne on shoots produced the prior growing season, starting as tiny white flowers developing into clusters of small flavorful black berries, which ripen in August. Fruit is best for jams, jellies, juices and cordials. Vigorous 6'-8' x 2'-5'. Cross-pollinate with Samyl. Zone 3.

SAMYL – *Sambucus nigra* 'Samyl'. From Denmark, this variety ripens in August. The small black fruit grows on last years' growth. Fruit is best for jams, jellies, juices and cordials. Vigorous 6'-8' x 2'-5'. Cross-pollinate with Samdal. Zone 3.

GRAPE

CATAWBA RED GRAPE – *Vitis labrusca* x *vitis vinifera* 'Sémillon'. This variety has been grown in the USA since the early 1800's. A vigorous and hardy variety bearing medium sized clusters of round, muted red fruit. An excellent choice for wine, juice, jams and jellies. Vine. Zone 4.

CONCORD SEEDLESS GRAPE – *Vitis labrusca*. Seedless. Standard of quality for bluish-black grapes. Excellent distinctive flavor used for table, juice, jelly and wine. Vigorous, hardy, strong growing, productive vine. Self-fruitful. Zone 4.

EDELWEISS GRAPE – *Vitis labrusca*. Greenish-white to pale-green grapes ripen early and produce large clusters of fruit used primarily for juice and jelly. Excellent disease resistance. Self-fruitful. Zone 4.

KING OF THE NORTH GRAPE – *Vitis labrusca*. Medium sized juicy, tart, blue fruits that are excellent for juice, jelly and wine making. Productive and vigorous, these vines are resistant to common grape diseases and insects. Self-fruitful. Zone 4.

MARQUIS GRAPE – *Vitis spp.* A white seedless grape that grows in large clusters of large berries. Flavor is fruity and rich and is good for fresh eating and wine making. Self-fruitful. Zone 5.

MARS GRAPE – *Vitis labrusca*. Seedless, medium-to-large, sweet flavored, juicy grapes are deep blue at maturity. Flavor is similar to Concord. Among the most cold hardy of the seedless grapes. Slip-skin. Self-fruitful. Zone 5.

RELIANCE GRAPE – *Vitis labrusca*. This seedless, juicy grape is a favorite with its deep red color and rich flavor. Vigorous vines produce big clusters of these beauties. Self-fruitful. Zone 5.

VANESSA GRAPE – *Vitis labrusca*. Seedless, blushing red grape with a very firm skin. Flavor is sweet and tangy perfect for juice and jams. Self-fruitful. Zone 5.

WINE HYBRID GRAPE

CAYUGA WHITE GRAPE – *Vitis labrusca*. Cayuga White makes an excellent white wine. Fruit is light bodied and light green in color. Very productive and disease resistant. Self-pollinating. Zone 5.

FRONTENAC GRAPE – *Vitis riparia*. This red grape is winter hardy and is used to produce full bodied, high quality wine. Resistant to common grape diseases. Ripens mid-season. Self-pollinating. Zone 3.

HONEYBERRY AND HASKAPS

Haskaps and Honeyberries are in the honeysuckle familia and native to Eurasia and northern Canada. Honeyberry is the common name in the U.S. and they are called haskaps in Japan and are a superfruit rich in antioxidants. The small elongated blue berries ripen early in the season. The University of Saskatchewan has a breeding program and promotes haskaps and hopes to see widespread commercial production of this fruit.

AURORA HONEYBERRY– *Lonicera x caerulea*. CPBR12-7637. Partially self-fertile, this early to mid-season bloomer produces medium-large fruit. Plant two varieties for best pollination. Mature size 5' x 5'. Zone 3.

BERRY BLUE HONEYBERRY– *Lonicera x caerulea*. Early bloomer with small size fruit. Plant two varieties for best pollination. Mature size 8'. Zone 3.

BLUE MOON™ HONEYBERRY–*Lonicera x caerulea*. An attractive, spreading shrub with velvety, bright green leaves. Fruit is large and tasty. Plant two varieties for proper pollination. Mature size 4-5'. Zone 3.

BLUE PACIFIC™ HONEYBERRY–*Lonicera x caerulea var. edulis*. Attractive spreading habit, light green foliage, and bears large crops of dark blue, tasty berries. Plant two varieties for proper pollination. Mature size 3'. Zone 3.

BLUE VELVET™ HONEYBERRY –*Lonicera x caerulea var. edulis*. This compact spreading variety is very unique with its attractive grayish-green velvety foliage. Its very large blue berries are flavorful and great for fresh eating and preserves. Plant two varieties for proper pollination. Mature size 4' x 4'. Zone 3.

BOREALIS HONEYBERRY– *Lonicera x caerulea*. CPBR07-5728. Early to mid-season bloomer, it produces medium size fruit. Plant two varieties for best pollination. Mature size 5' height x 6' spread. Zone 3.

RASPBERRY

ANNE RASPBERRY – *Rubus idaeus*. PP10,411. This variety is everbearing and produces large, yellow fruit on new canes. Flavor is very sweet. Self-fruitful. Zone 4.

BRISTOL BLACK RASPBERRY – *Rubus idaeus*. An excellent quality, large, jet black berry with rich but mild, sweet flavor that's best used for fresh eating, desserts, freezing, canning and jelly. Vigorous, productive, upright plant with compact, sturdy canes. Ripens mid-season. Self-fruitful. Zone 4.

CAROLINE RASPBERRY – *Rubus idaeus*. PP10,412. Everbearing. Large, firm red fruit with a unique intense raspberry flavor. This variety is very vigorous with long fruiting periods. Self-fruitful. Zone 4.

ENCORE RASPBERRY – *Rubus sp.* A vigorous, sturdy, upright and nearly thornless raspberry with excellent winter hardiness. Large red fruit has good raspberry flavor. An excellent choice for extending the summer raspberry picking season. Floricane or summer bearing. 4'-5' tall x 3'-4' wide. Zone 4.

HERITAGE RED RASPBERRY – *Rubus idaeus*. This everbearing variety produces large, sweet, dark red berries from July until frost. Heritage will bear fruit the first year. Self-fruitful. Zone 4.

JEWEL BLACK RASPBERRY – *Rubus sp.* A popular, high yielding black raspberry variety with superb quality berries. The fruit is large in size and glossy black in color. Great for jams and jellies! Winter hardy and reliable. 4'-5' tall x 2'-3' wide. Zone 5.

POLANA RASPBERRY – *Rubus idaeus*. These good flavored, glossy berries are large and highly productive. Vigorous canes. A great choice for early fall raspberries. Self-fruitful. Zone 3.

PRELUDE RASPBERRY – *Rubus idaeus*. PP11,747. This variety was recently released by the N.Y. State Experiment Station and is identified as the earliest ripening summer red raspberry. Vivid red berries are good flavored and an excellent choice when earliness and quality are required. Vines are vigorous, hardy and will produce some fall berries. Self-fruitful. Zone 4.

SEA BERRY

BOTANICA™

Hippophae rhamnoides. This Russian variety produces a large crop of bright orange good flavored fruit. Upright habit is attractive. Male Sea Berry required for proper pollination. Mature height 6-10'. Zone 3.

GARDEN'S GIFT™

Hippophae rhamnoides. A Russian variety that produces large crops of fruit that are great for juice and preserves. Male Sea Berry required for proper pollination. Mature height 6-10'. Zone 3.

MALE SEA BERRY

Hippophae rhamnoides. A striking ornamental with large, golden-brown, flower buds. The Male Sea Berries do not produce fruit but will pollinate the female varieties. One male plant can pollinate up to 8 female plants. Mature height 6-10'. Zone 4.

GOJI BERRY

CRIMSON STAR™– *Lycium barbarum*. An attractive, vining shrub with light purple, bell-shaped flowers which appear in May. Pleasantly sweet and rich in flavor, the red berry-like fruit can be eaten fresh or dried. Native to China. Mature at 10'-12'. Self-fertile. Zone 5.

ALMOND

ALL IN ONE ALMOND – *Prunus dulcis*. A great choice for home landscapes. This almond blooms in late spring and produces soft-shelled, sweet nuts which ripen and mature in September and October. A self-fertile cultivar maturing at 15'-20'. Zone 5.

ORACLE™ ALMOND – *Prunus dulcis* 'Oracle'. The variety produces large semi-hard shelled nuts. Partially self fertile, so planting two varieties will produce larger crops. Mature height: 10-12'. Zone 5.

PRIMAVERA™ ALMOND – *Prunus dulcis* 'Prima'. Productive and reliable, this hardy and very late blooming variety bears good crops of sweet, softshell nuts. Partially self-fertile, so planting two varieties will produce larger crops. Mature height 20'. Zone 5.

CHESTNUT

CHINESE CHESTNUT – *Castanea mollissima*. Bristly, apple size burrs contain 3-7, medium-to-large, crisp nuts. Dense, lustrous foliage provides good shade. Plant two for proper pollination. Zone 4.

DUNSTAN CHESTNUT – *Castanea* spp. A blight resistant American x Chinese hybrid. Nuts are superior in size and taste. Plant two Dunstan chestnuts for proper pollination. Zone 4.

CHINQUAPIN – *Castanea Pumila*. A native nut tree producing small chestnut-like bur covered nuts ready to be harvested in fall. Mature at 30'. Zone 5.

PECAN

PAWNEE PECAN – *Carya illinoensis*. The most widely planted pecan in the U.S., Pawnee is disease resistant and produces large nuts that ripen in late October. Bears nuts in 5-7 years. Pollinator required by another pecan variety. Mature height 50-75'. Zone 6.

BUTTERNUT & WALNUT

BUTTERNUT – *Juglans cinera*. This native tree, often called white walnut, was an important tree in American forests. Nuts mature in fall when the kernels are sweet and oily with a buttery flavor. Native Americans depended on this tree for the nuts and made syrup from the sap. Somewhat self-pollinating, but it is best to plant more than one tree. Mature height 40-60'. Zone 3.

BLACK WALNUT – *Juglens nigra*. A native tree with a medium growth rate, usually reaching a mature size of 50-75'. Although self-fertile, it requires wind for pollination. For a better crop, it is advised to plant more than one. Juglens sensitive plants should be planted far from the tree. Zone 4.

SAUBER WALNUT – *Juglans nigra* 'Sauber'. A fast growing Black Walnut cultivar which produces consistent crops of good quality and flavorful nuts. This variety is self-fertile utilizing wind as a pollinator. It is best to plant two trees for optimum nut production from each. Mature at 70' x 40'. Zone 4.

CARPATHIAN ENGLISH WALNUT – *Juglans regia*. A lovely tree producing medium to large, crunchy, English-type walnuts which ripen in October. Bears fruit in 4-7 years when two are planted near each other for proper cross-pollination. Hardy in cold temperatures yet heat tolerant. Mature at 30' - 40' tall and wide. Zone 5.

HAZELNUT

AMERICAN HAZELNUT – *Corylis Americana*. A strong multi-stemmed shrub producing desirable edible nuts which attract wildlife and game. Performs best in full sun. Plant two for best nut production. Mature height 10'-15'. Zone 4.

ACER

BURGUNDY BELLE® RED MAPLE – *A. rubrum* 'Magnificent Magenta'. A red maple with year-round interest. Emerging foliage becomes a medium green in summer turning orange or red in September, then burgundy in October. Canopy is compact and rounded. In maturity 45' tall x 15' wide. Deciduous. Zone 5.

AUTUMN BLAZE® MAPLE – *A. x freemanii* 'Jeffersred'. PP4,864. Foliage is medium green with a fall color being brilliant orange-red and long lasting. Habit is upright branching, forming a broadly oval shape. Mature size 50' x 40'. Zone 3.

ARMSTRONG MAPLE – *A. rubrum* 'Armstrong'. A fastigate tree great for tight spaces, this red maple cultivar has wonderful fall color as the leaves turn from yellow to an orangey-red. Mature size 45' x 15'. Zone 4. 7 gallon only.

OCTOBER GLORY® MAPLE – *A. rubrum* 'October Glory'. PP2,116. Tree shape is broadly oval to round. Summer foliage is a glossy, medium green turning deep red to reddish-purple in the fall. Variety is more adaptable to areas with mild winters and hot summer temperatures. Mature size 40' x 35'. Zone 4.

REDPOINT® MAPLE – *A. rubrum* 'Frank Jr.'. PP16,769. Lush green foliage turns a brilliant red in the fall and its dominate central leader makes this fast growing tree a standout. Broad pyramidal form. Mature 45' x 30'. Zone 5. 7 gallon only.

RED SUNSET® MAPLE – *A. rubrum* 'Franksred'. This is one of the most highly rated and reliable of the red maple cultivars. It's a vigorous growing tree with a strong and symmetrical branching pattern. Foliage is dark green and glossy in the summer with fall color being brilliant orange-red to red. Mature size 45' x 35'. Zone 4.

SUN VALLEY MAPLE – *A. rubrum* 'Sun Valley'. An oval, symmetrical, densely branched tree with dark green foliage. The fall color is bright red. Mature height 40'x35'. Zone 4.

CRIMSON SUNSET MAPLE® – *A. truncatum* x *A. platanoide*s 'JWS-KW202'. PPAF. This tree's foliage resembles that of Crimson King, but its form is more upright and compact. Thanks to the *Acer truncatum* parentage, it flourishes in the summer heat where few purple leafed plants will grow. Mature size 35' x 25'. Zone 5. 7 gallon only.

PACIFIC SUNSET® MAPLE – *A. truncatum* x *A. platanoide*s 'Warrenred'. PP7,433. Tree shape is upright spreading with rounded crown. Foliage is dark green, smooth and glossy. Beautiful fall colors range from yellow-orange to bright red. Mature size 30' x 25'. Zone 4.

URBAN SUNSET® – *A. truncatum* x. *a. platinoides* 'JFS-KW187'. PP27,545. This upright street tree is narrow and compact and produces few seeds. The fall foliage is red to burgundy. A great choice when a wide canopy is not desired. Mature size 35' x 20'. Zone 4.

FALL FIESTA SUGAR MAPLE – *A. Saccharum* 'Bailsta'. A fast growing Sugar Maple with outstanding fall color. Glossy green leaves become vibrant hues of yellow, orange and red in autumn. Leathery foliage resists tattering. In maturity 50' - 75' tall x 50' wide. Zone 4.

LEGACY® SUGAR MAPLE – *A. sacchuram* Legacy®. PP4,979. This sugar maple has great fall color with reddish orange foliage, relatively fast growing for a sugar maple, it is also Japanese Beetle resistant. Mature size 50' x 35'. Zone 5.

JAPANESE ACER

BLOODGOOD JAPANESE MAPLE – *A. palmatum* 'Bloodgood'. A vigorous, upright grower with large, deep purplish-red foliage. It is one of the most popular red uprights and the standard for comparison among the purple leafed, tree form Japanese Maples. Mature size 18' x 18'. Zone 5.

EMPEROR I JAPANESE MAPLE – *A. palmatum* 'Emperor I'. A fine cultivar, distinguished by its bright red foliage. Typically holds its true red color thru the summer. Upright branching develops a broad shape with age. Heat tolerant. Mature height 10-12'. Zone 5.

RYUSEN JAPANESE MAPLE – *A. palmatum* 'Ryusen'. PP18,501. 'Ryusen' boasts a magnificent weeping habit with strong, pendulous branches bearing palmately divided leaves of bright green. The foliage on this slow grower turns brilliant shades of golden-orange and bright red in autumn. More heat and sun tolerant than many *A. palmatum* cultivars, 'Ryusen' leafs out late in spring, thus avoiding late frosts. Mature size 20' H x 6-8' W. Zone 5.

SHAINA JAPANESE MAPLE – *A. palmatum* 'Shaina'. A unique dwarf with dark red, deeply divided leaves that grow in clusters. Fall color is bright red. Growth is compact. Mature 9-10'. Zone 6.

SEIRYU JAPANESE MAPLE – *A. palmatum* var. *dissectum* 'Seiryu'. An upright laceleaf maple, this tree has smaller delicate leaves than most. Beautiful light green foliage in the early spring and gold to yellow fall foliage. Mature size 10-15' x 8-12'. Zone 5.

CRIMSON QUEEN JAPANESE MAPLE – *A. palmatum* *dissectum* 'Crimson Queen'. This red laceleaf cultivar maintains its deep purple-red color through the summer. Foliage is heat resistant, with scarlet fall color. Habit is weeping and mounded. Mature height 6'. Zone 5.

INABE SHIDARE JAPANESE MAPLE – *A. palmatum* *dissectum* 'Inabe Shidare'. This lace leaf weeper is a fast grower with purple foliage that holds its color well in the summer heat. Sturdy branches. Mature size 7' x 10'. Zone 5.

PURPLE GHOST JAPANESE MAPLE – *A. palmatum* 'Purple Ghost'. This medium size upright maple leafs out in the spring with deep purple leaves with dark veins. Fall color is bright red to orange. Tolerates sun well. Mature size 8' x 4'. Zone 5.

TAMUKEYAMA JAPANESE MAPLE – *A. palmatum* *dissectum* 'Tamukeyama'. This is an outstanding variety among the laceleaf weepers. Leaves are a very rich deep purple and hold their color through the heat of the summer. Mature size 8' x 12'. Zone 5.

VIRIDIS JAPANESE MAPLE – *A. palmatum* *dissectum* 'Viridis'. Weeping laceleaf form. Does well in shade. Green leaves turning yellow, golden and orange in fall. Zone 6.

AMELANCHIER

AUTUMN BRILLIANCE® SERVICEBERRY – *A. x grandiflora* 'Autumn Brilliance'. PP5,717. Form is strong, upright and spreading with medium green foliage. White spring flowers, brilliant red fall color and edible fruit makes this a great selection. Mature height 20'. Zone 4.

SPRING FLURRY™ SERVICEBERRY – *A. laevis* 'JFS-Arb'. PP15,304. A street tree Amelanchier with a strong central leader. Shape is upright oval with medium green foliage. Clusters of pure white flowers cover this tree in early spring and fall color is orange. Mature height 35'. Zone 4.

BETULA

DURA HEAT™ RIVER BIRCH – *B. nigra* 'BNMTF'. Glossy, dark olive green leaves are smaller and more closely spaced than those of the species. Bark exfoliates early, exposing whitish patches. Mature size 40' x 25'. Zone 4.

HERITAGE® BIRCH – *B. nigra* 'Cully'. PP4,409. This selection of river birch has a broadly pyramidal shape with light green glossy foliage. The light bark color peels and exposes mottled patches of cream, orange and pinkish tan colors. Fall foliage is yellow. Mature size 40' x 30'. Zone 4.

JACQUEMONTII BIRCH – *B. jacquemontii*. This tree has the whitest bark of all the birches. Habit is upright oval with dark green, thick, glossy foliage that turns yellow in the fall. Mature size 40' x 30'. Zone 5.

CARPINUS

LUCAS COLUMNAR HORNBEAM – *C. betulus* 'Lucas'. Dense, tightly columnar hornbeam with thick, durable leaves turning from golden yellow to brown at the end of the growing season and persisting through the winter months. Narrower than the 'fastigiata', it reaches a mature size of 30' in height and 10' in spread. Zone 5.

PYRAMIDAL EUROPEAN HORNBEAM – *C. betulus* 'Fastigiata'. A beautiful columnar to pyramidal tree with yellow fall color. Mature height 40'. Zone 5.

AMERICAN HORNBEAM – *C. caroliniana*. This native ironwood is a small understory tree known for its tolerance of wet soil. Nice globular form. Mature size 20-35' x 20-35'. Zone 3.

CERCIDIPHYLLUM

KATSURA TREE – *C. japonicum*. The bluish-green foliage on this tree is quite an eye catcher with its delicate heart shaped leaves. Autumn color is a mix of bright yellow, pink and orange-red. Mature height 40'. Zone 5.

CERCIS

ACE OF HEARTS REDBUD – *C. canadensis* ‘Ace of Hearts’. PP17,161. Clusters of light violet, sweet-pea-like blossoms appear in early spring, followed by small, semi-glossy and heart shaped leaves. Tree is compact and perfect for smaller yards. Mature 12’ x 15’. Zone 5.

ALBA – *C. canadensis* ‘Alba’. In early spring, small white flowers appear in abundance on the leafless branches. Heart-shaped leaves emerge bronze, quickly turning green. Fall color is yellow. Mature height 20-30’. Zone 4.

EASTERN REDBUD – *C. canadensis*. Wide spreading with medium green foliage. Flowers are rosy pink and fall color is yellow. Mature size 25’ x 25’. Zone 4.

FLAME THROWER® REDBUD – *C. canadensis* ‘NC2016-2’. PP31,260. From the J. C. Raulston Arboretum at NC State, this Cercis has persistent color from spring through fall. Pink flowers are followed by foliage which emerges burgundy, becoming hues of yellow and then green often with multiple shades on a single branch. Mature at 15’-20’ tall x 15’ wide. Zone 5.

FOREST PANSY REDBUD – *C. canadensis* ‘Forest Pansy’. Tree is upright with spreading branches. Foliage is deep purple paling to bronze-green. Produces a magenta rose flower. Mature height 20’. Zone 5.

HEARTS A’FIRE™ – *C. canadensis* “JN100”. PPAF. Dark pink spring flowers are followed by a burst of colorful heart-shaped leaves in fiery shades of burgundy red, tangerine and gold which age reddish green. A small upright specimen tree maturing at 10-15’ tall and wide. Zone 5.

PINK HEARTBREAKER WEEPING REDBUD – *C. canadensis*. PPAF. Exceptional weeping form with strong branching. The leaves are smaller than the species and juvenile leaves are red, turning dark green. Flowers are lavender-pink. Mature height 15’. Zone 4.

DON EGOLF REDBUD – *C. chinensis*. Vivid, rosy mauve flowers cover the stems in early spring. Foliage is dark green and heart shaped. Habit is compact, slow growing and multi-stemmed. Mature height 9’. Zone 6.

ROYAL WHITE REDBUD – *C. canadensis* f. *alba* ‘Royal White’. Pure white flowers emerge before foliage providing a stunning display. Attractive to birds and butterflies. Matures to a rounded tree, excellent in full sun or part shade. Mature at 15’-25’ tall and wide. Zone 4.

RUBY FALLS REDBUD – *C. canadensis* ‘Covey’ x ‘Forest Pansy’. PP22,097. This weeping redbud is a very compact grower with beautiful maroon red heart shaped foliage. Perfect for a small garden. Mature height 6’. Zone 5.

CHIONANTHUS

CHINESE FRINGETREE – *C. retusus*. Fragrant white flowers with fringe-like petals hang in clusters that appear in the spring just after the leaves have emerged. Fall foliage is yellow and winter reveals attractive, exfoliating gray bark making this ornamental tree interesting for all seasons. Mature size 20’ x 20’. Zone 5.

FRINGETREE – *C. virginicus*. Oval, spreading tree with medium-to-dark green foliage produces small greenish-white, clustered flowers that are wonderfully fragrant. Mature size 18’ x 20’. Zone 4.

CORNUS

EUROPEAN VARIEGATED DOGWOOD – *C. alba* ‘Argenteo-marginata’. Foliage is green with a creamy white margin. Winter stem color is a deep red. A great accent plant, it is quite dramatic against a dark colored backdrop. Mature height 10’. Zone 3.

CORNUS SGT. PEPPER® – *C. alba* ‘Verpaalen 2’. PP34,377. The spring variegated foliage is bright green and cream, with pale pink margins, taking on a burgundy and hot pink color in the fall. The stems remain burgundy through the seasons. An excellent plant for breaking architectural and landscape monotony. Mature at 4-6’ tall x 6-8’ wide. Zone 3.

CORNUS SPRING GROVE™ – *C. florida* ‘Grofflor’. An understory tree with lovely architecture, heavy flower and fruit production and good fall color. The large white flowers attract pollinators. Broader than tall, the tree matures at 20’ tall by 30’ wide. Zone 5.

CORNUS VENUS® – *C. (kousa x nutalli) x kousa* ‘KN30-8’. PP16,309. A spectacular and vigorous dogwood from Rutgers University. It is adorned with stunning white bract-like flowers in spring, red fruit and beautiful red foliage in the fall. Good winter hardiness and disease resistance. Fast growing and matures at 15-20’ tall and wide. Zone 5.

BAILEYI RED TWIG DOGWOOD – *C. sericea*. Rich green leaves turn reddish purple in the fall. Flowers are white and fruit is blue. Winter stem color is reddish. Mature height 9’. Zone 3.

YELLOW TWIG DOGWOOD – *C. sericea* ‘Flaviramea’. Bright yellow stems on young growth of this bushy shrub are attractive in winter. Flowers are white followed by white fruit. Mature height 9’. Zone 3.

KOUSA® DOGWOOD CLUMP FORM – *C. kousa chinensis*. A multi-stemmed tree with vase shaped form with showy white flowers and exfoliating gray bark. White bracts open after green foliage. In the fall, raspberry-like fruit attracts birds while the foliage becomes a rich red. Mature height 20’. Zone 5.

KOUSA® DOGWOOD – *C. kousa*. A small, deciduous, vase shaped flowering tree which is often multi-stemmed. White flowers are petal-like pointed bracts which are followed by pinkish-red berry-like fruits in summer. Fruit is edible but best left for the birds. Good disease and insect resistance. Mature at 15’-30’ tall and wide. Zone 5.

CELESTIAL™ DOGWOOD – *C. kousa x Cornus florida* ‘Rutdan’ ‘Celestial™’. A late spring flowering white dogwood with flowers with a greenish tinge that open fully to white. A vigorous grower with uniform spread. Mature height 15’-25’. Zone 5.

CONSTELLATION® DOGWOOD – *C. kousa x C. florida* ‘Rutcan’ ‘Constellation®’. PP7,210. White flowering dogwood blooms after *florida* and before *kousa*. Borer and disease resistant. Tree form. Mature height 25’. Zone 5.

SCARLET FIRE® DOGWOOD – *C. kousa* ‘Rutpink’. PP28,311. An extraordinary introduction from Rutgers. Pink pointed bracts vary in color from deep pink to fuchsia. New foliage is deep green tinged with purple. In summer 1” pink fruit emerges and later in the fall the deep green foliage turns red. Long flowering, disease and pest resistant and both cold and heat tolerant. Mature at 25’. Zone 5.

STELLAR PINK® DOGWOOD – *C. kousa* x *C. florida* ‘Rutgan’ Stellar Pink®. PP7,207. Pink flowering dogwood that blooms after *florida* and before *kousa*. Borer and disease resistant. Tree form. Mature height 20-25’. Zone 5.

COTINUS

ROYAL PURPLE SMOKE TREE – *C. coggygia*. A small open tree that flowers in summer with pink smoke like puffs. Keeps color through summer in part or full shade with reddish purple fall color. Mature height 10-15’ and width 8-10’. Zone 5.

CRATAEGUS

WINTER KING HAWTHORN – *C. viridis* ‘Winter King’. Winter King is an attractive hawthorn with silvery bark that contrasts nicely with dark green, glossy leaves. Spring flowers are white, fall fruit is red. Mature height 20’. Zone 4.

FRANKLINIA

FRANKLIN TREE – *F. alatamaha*. This small tree with bright green foliage reveals fragrant, white, camellia like flowers in summer. Fall foliage turns vivid orange-red and its ridged grey bark with vertical white striations adds winter interest. Mature height 25’. Zone 5.

GLEDITSIA

STREET KEEPER® HONEYLOCUST – *G. triacanthos* ‘Draves’. PP21,698. This honeylocust has a strong narrow upright habit. The fall yellow foliage is dramatic. Mature height 45’. Zone 4.

HIBISCUS TREE FORM

AZURI SATIN® – *H. syriacus* ‘DVPazurri’. PP20,563. A tall upright, deciduous rose of Sharon with striking blue flowers, which produce few to no seeds. Long season of bloom. Low maintenance. Attracts butterflies and resists deer. Mature at 8’-12’ x 4’-6’. Zone 5.

BLUEBERRY SMOOTHIE™ – *H. syriacus*. PP26,662. Large, lovely, double blue-purple blooms in summer, contrast nicely with vibrant green foliage. Flowers are like magnets for butterflies and hummingbirds. No messy seed pods with this sterile variety. Mature at 4’-5’ tall and 3’-4’ wide. Zone 5.

RASPBERRY SMOOTHIE™ – *H. syriacus*. PP27,196. Large double raspberry colored flowers bloom mid to late summer. From Garden Debut. Zone 5.

HYDRANGEA TREE FORM

FIRE AND ICE™ – *H. paniculata* ‘Wim’s Red’. PP26,005. Compact and upright, this early bloomer displays cone shaped panicles consisting of small fertile florets and showy sterile florets that mature from white to pale pink, then reddish pink in early fall. Zone 3.

LIMELIGHT™ TREE HYDRANGEA – *H. paniculata* ‘Limelight’. PP12,874. Flowers are a beautiful lime green in mid-summer, eventually changing to pink tones before fading to beige. Panicles are large, upright and cone shaped. Dark green leaves turn attractive shades of red in the fall. Royalty charge \$1.00. Mature height 12-15’. Zone 3.

LITTLE LIME® TREE FORM – *H. paniculata*. A dwarf form of ‘Limelight’, it has strong stems with lime green flowers that are stunning in the summer. Flowers will change to white and then age to a nice pink into fall. Mature at 10’ tall x 5’ wide. Royalty charge \$1.00. Zone 3.

PEE GEE TREE FORM – *H. paniculata*. This classic Grandiflora hydrangea tree has spreading branches that produce large white blooms in early August that turn pink in the fall. Mature at 15’. Zone 3.

PHANTOM TREE HYDRANGEA – *H. paniculata* ‘Phantom’. This deciduous tree bears conical panicles, of creamy-white flowers that become blush-pink with age. Flower heads can grow up to 15” long. Blooms July-September. Mature height 8-10’. Zone 3.

PINK DIAMOND TREE HYDRANGEA – *H. paniculata* ‘Pink Diamond’. Light pinkish-white flowers are prevalent from the beginning of the bloom period and become darker as the season continues. Vigorous grower. Mature height 15’. Zone 3.

PINKY WINKY™ TREE HYDRANGEA – *H. paniculata* ‘DVPpinky’. PP16,166. Large white flower panicles open in mid to late summer and florets turn pink as the flower grows creating a two-tone effect. Royalty charge \$1.00. Mature height 10’. Zone 3.

QUICK FIRE® TREE HYDRANGEA – *H. paniculata* ‘Bulk’. PP16,812. Quick Fire® blooms up to one month earlier than other hydrangeas. This hardy variety will tolerate full sun. Flowers are white and quickly turn pink. By fall the flowers are rosy-pink. Royalty charge \$1.00. Mature 8’. Zone 3.

KOELREUTERIA

GOLDENRAIN TREE – *K. paniculata*. Rounded tree form with medium green foliage. A very impressive tree in mid-summer when it is covered with clusters of bright yellow flowers. Fall color is yellow. Mature size 30’ x 30’. Zone 5.

LABURNUM

VOSSII GOLDENCHAIN – *L. x watereri* ‘Vossii’. Vase shaped tree with dark green foliage and beautiful hanging clusters of golden yellow flowers. Mature height 25’. Zone 5.

LAGERSTROEMIA

ACOMA CrapeMyrtle – *L. indica x fauriei*. Low spreading, semi-pendulous, semi-dwarf, multi-stemmed growth habit. Panicles are pure white with golden anthers. Blooms from late June – September. Mildew resistant. Mature size 10' x 11'. Zone 7.

Bellini® Grape CrapeMyrtle – *L. indica* 'Congrabel'. PP28,975. A delightful lavender-purple treat! An attractive, compact crapemyrtle with a rounded habit, perfect as an accent in any garden, large or small. Resistant to deer and powdery mildew. Mature at 3'-4' tall and wide. Zone 5.

Bellini® Strawberry CrapeMyrtle – *L. indica* 'Strawconbel'. A bright red addition to the Bellini® series. Resistant to deer and powdery mildew. An excellent choice in a mixed garden or low border. Attracts pollinators and tolerates dry conditions. Best in full sun. Compact and mounded habit. Mature at 3-4' tall and wide. Zone 5.

Bellini® Raspberry CrapeMyrtle – *L. indica* 'Conlagras'. PP29,006. Compact size and delicious bright raspberry-red flower color, make this crapemyrtle unique. A great choice for a foundation plant or mixed garden specimen. Mature size 3' - 4' tall. Zone 5.

Colorama Scarlet™ CrapeMyrtle – *L. x 'JMI'*. PP311,585. A long flowering scarlet red crapemyrtle with deep green foliage in summer and lasts well into fall. Attracts birds and butterflies. An excellent, deciduous landscape specimen with a vigorous, self-branching habit. Mature at 15'-20' x 8'-12'. Zone 6.

Dynamite® CrapeMyrtle – *L. indica* 'Whit II'. PP10,296. Tall with cherry red blooms. Highly mildew resistant. Mature height 15'. Zone 6.

Hopi CrapeMyrtle – *L. indica x fauriei*. Spreading, semi-dwarf, multiple stemmed growth habit. Medium pink flowers from late June–September. Disease resistant and hardy. Mature size 7½' x 10'. Zone 5.

Pink Velour® CrapeMyrtle – *L. indica* 'Whit III'. PP10,319. Buds open to bright pink flowers which provide a lush velour-like blanket from summer to fall. New foliage is maroon and ages to purplish green, then dark green. Highly mildew resistant. A Carl Whitcomb introduction. Mature size 12-15'. Zone 6.

Pocomoke CrapeMyrtle – *L. indica* 'Pocomoke'. A multi-stemmed shrub with panicles of dark rosy pink flowers. Blooms throughout the summer. Attractive dark green foliage turns rich bronze-red in fall. Unique size for a crapemyrtle. Makes a nice accent plant, alone or in masses. Cold hardy. Deciduous. Mature at 3'-4' tall and 4'-5' wide. Zone 6.

Raspberry Sundae® CrapeMyrtle – *L. indica* 'Whit I'. PP10,297. The flowers are raspberry red with a white margin and habit is upright. Mature height 15'. Zone 6.

Red Rocket® CrapeMyrtle – *L. indica* 'Whit IV'. PP11,342. This variety produces beautiful cherry red flower spikes up to 20" long from summer to fall. Highly mildew resistant. Mature size 12-15'. Zone 6.

Rhapsody in Pink™ CrapeMyrtle – *L. indica* 'Whit VIII'. PP16,616. This vigorous grower has dark wine new growth and showy, crepe like pink flowers throughout the growing season. It is considered a carefree plant because of its drought tolerance and high resistance to powdery mildew. Mature height 10-15'. Zone 6.

Sarah's Favorite CrapeMyrtle – *L. indica x fauriei*. Long lasting, white flowers are produced from mid-summer thru early fall. Fall foliage is burgundy and the peeling, cinnamon colored bark makes it an excellent choice for year round landscape interest. Mature height 20'. Zone 6.

Sioux CrapeMyrtle – *L. indica x fauriei*. An exceptional small landscape tree, well suited for small sunny gardens. This crapemyrtle has striking pink flowers and dark green foliage and blooms continuously from summer through fall. Hardy, drought tolerant and disease resistant. Mature at 13'-20' tall and 10' wide. Zone 6.

Thunderstruck™ Lavender Skies™ – *L. x 'JM8'*. PP34,076. Luscious dark green foliage is a perfect background for pastel lavender flowers. Blooms from summer through the fall. Fast growing, upright and mature at 12'-15' tall x 8'-10' wide. Zone 6.

Tonto CrapeMyrtle – *L. indica x fauriei*. Semi-dwarf, multi-stemmed growth habit. One of the best cold hardy red selections. Light tan exfoliating bark. Mature size 10' x 10'. Zone 5.

Zuni CrapeMyrtle – *L. indica x fauriei*. Globose, semi-dwarf, multi-stemmed growth habit. Medium lavender flowers from mid-July to late September. Mature size 9' x 8'. Zone 5.

LIRIODENDRON

Emerald City® Tulip Tree – *L. tulipifera* 'JFS-Oz'. This cultivar has a strong central leader with deep green glossy foliage. The yellow flowers are attractive to hummingbirds and butterflies. Mature height 55' x 25' width. Zone 5.

MAGNOLIA

Ann Magnolia – *M. liliflora x M. stellata* 'Ann'. Deep purple-red flowers which bloom later than *M. stellata*. Shrubby grower to 8-10' in height. Zone 5.

Black Tulip™ Magnolia – *M. x soulangeana* 'Jurmagl'. PPAF. With rich, deep burgundy-red blooms, this magnolia makes a dramatic and elegant specimen tree in any landscape. Blooms appear before the foliage emerges. Can be grown in container or in masses to make an interesting hedge. Mature at 20' x 10'. Zone 5.

Butterflies Magnolia – *M. acuminata* 'Fertile' x *M. denudata* 'Sawada's Cream'. PP7,456. Beautiful dark yellow flowers appear before leaves. Flowers are 3-4" across. Mature height 20'. Zone 4.

Genie Magnolia – *M. soulangeana x M. liliflora*. PP20,748. A small, pyramidal tree. Dramatic, lightly fragrant, deep maroon-purple flowers open before the foliage appears. A repeat bloom often occurs in late summer. A nice accent or specimen plant. Mature at 10'-13' x 5'. Zone 3.

Jane Magnolia – *M. liliflora x M. stellata* 'Jane'. Flowers are purplish-red outside and white inside. Shrub form to 10-15' in height. Zone 5.

KAY PARRIS MAGNOLIA – *M. Grandiflora* ‘Kay Parris’. A cross between Little Gem and Bracken’s Brown Beauty, it has a dense, compact habit that responds well to shearing. Lovely fragrant white flowers stand out among glossy medium green foliage with velvet-like, orange-brown undersides. Mature height 20’ tall by 10’ wide. Zone 6.

LEONARD MESSEL MAGNOLIA – *M. x Loebneri* ‘Leonard Messel’. Bicolored star-like flowers, white topside with rosy-purple underside, open on bare stems in early spring. Slow grower with a mature size of 10-15’ tall and 12’ wide when grown as a shrub/ multi-trunk form. Deciduous. Zone 4.

LOIS MAGNOLIA – *M. x brooklynensis* ‘Lois’. Later blooming than its parent ‘Elizabeth’, makes this bright yellow flowering deciduous magnolia less susceptible to frost damage. Flowers emerge before the foliage. Deer resistant. Mature at 30’ tall x 25’ wide. Zone 5.

MOONGLOW™ MAGNOLIA – *M. virginiana* ‘Jim Wilson’. PP12,065. This variety has a distinct upright growth habit with dark green, semi-evergreen leaves. Flowers are creamy white with the scent of lemon. Mature height 35’. Zone 4.

NED’S NORTHERN BELLE SWEETBAY MAGNOLIA – *M. virginiana* ‘Ned’s Northern Belle’. Flowering in June and July, this sweetbay magnolia has larger flowers and is cold tolerant. Mature size 20’ x 20’. Zone 4.

ROYAL STAR MAGNOLIA – *M. stellata*. Pink buds open to nearly pure white star-like flowers. 15-20’ in height and 10-15’ spread. Zone 4.

SWEETBAY MAGNOLIA – *M. virginiana*. Habit is loose and upright spreading with dark lustrous green leaves and fragrant creamy white flowers in spring and summer. Mature height 20’. Zone 5.

WATERLILY MAGNOLIA – *M. stellata*. Highly fragrant, rich pink buds open to white blossoms on bare stems. The flowers appear later than other star magnolias. Habit is upright and bushy. Mature 15-20’ in height. Zone 5.

BRACKEN’S BROWN BEAUTY MAGNOLIA – *M. grandiflora* ‘Bracken’s Brown Beauty’. This Southern magnolia is considered by Michael Dirr to be one of the best selections with its relatively compact dense pyramidal habit. Flowers are 5-6” in diameter. Mature 30’ x 15’. Zone 5.

EDITH BOGUE MAGNOLIA – *M. grandiflora* ‘Edith Bogue’. Evergreen tree that is suited for northern climates. Large, dark green leaves with rusty undersides. Large creamy white fragrant flowers in spring. Mature height 30’. Zone 5.

VICTORIA MAGNOLIA – *M. grandiflora* ‘Victoria’. Large, deep green leathery leaves. Cup shaped, fragrant white flowers all summer. Evergreen tree. Mature height 20’. Zone 6.

MALUS

DONALD WYMAN CRABAPPLE – *M. ‘Donald Wyman’*. Red buds open to white showy blossoms. Foliage is glossy green. Fruit is bright red. Mature height 20’. Zone 4.

GOLDEN RAINDROPS® CRABAPPLE – *M. transitoria* ‘Schmidtcutleaf’. Has a very delicate appearance with its fine textured, deeply cut foliage and tiny golden yellow fruit. Form is upright, vase shape. Spring flowers are white. Mature height 20’. Zone 3.

PRAIRIFIRE CRABAPPLE – *M. ‘Prairifire’*. One of the best red leafed crabs, it has attractive reddish bark and long lasting pinkish-red flowers that produce dark red fruit. Shape is upright, spreading and rounded. Mature height 20’. Zone 4.

ROYAL RAINDROPS® CRABAPPLE – *M. JFS-KW5’*. PP14,375. Bright reddish pink flowers cover this crabapple in mid spring. Foliage is deep purple and cutleaf which gives season-long appeal. Disease resistant. Mature height 20’ and width 15’. Zone 4.

RUBY DAYZE® CRABAPPLE – *M. JFS KW139MX*. PP31,232. Bright magenta-pink flowers cover this upright, oval shaped crabapple in spring, giving way to persistent, tiny deep red fruit in the fall. It is one of the most disease resistant purple foliage crabapple cultivars. Mature at 22’ tall and 16’ wide. Zone 4.

SPARKLING SPRITE® CRABAPPLE – *M. JFS-KW207’*. PP27,954. A great carefree tree with compact form suitable for small spaces. Pink buds are followed by fragrant white flowers that are long lasting. Tiny yellow fruit forms in late summer before the foliage turns bright yellow and holds well into winter. Mature at 16’ tall x 8’ wide. Zone 4.

METASEQUOIA

AMBERGLOW – *M. glyptostroboides*. PPAF. Bright gold foliage emerges in the spring and becomes tinged with orange in the summer. It does not burn in full sun. Mature height 15’ x 7-8”width. Zone 6.

DAWN REDWOOD – *M. glyptostroboides*. A deciduous, fast growing conifer. Pyramidal in habit with bright green needles that turn rusty orange in the fall. Mature height 70-100’ x 25’. Zone 5.

NYSSA

BLACK TUPELO – *N. sylvatica*. This fast growing tree has a central dominant leader with a conical shape and dense foliage that is lustrous dark green. Fall leaf color is a brilliant red with yellow veins. Mature height 40’. Zone 4.

WILDFIRE – *N. sylvatica* ‘Wildfire’. Spring growth reveals a surprising flush of deep red leaves that continue as long as the new growth emerges. Summer foliage is green and the fall reveals tints of orange-yellow to purple red. Mature height 40’. Zone 5.

PLATANUS

EXCLAMATION!™ LONDON PLANETREE – *P.x acerifolia* ‘Morton’s Circle’. A strong central leader and pyramidal shape make this an excellent selection. Exfoliating bark begins at an early age. Some resistance to anthracnose and powdery mildew and frost cracking in cold climates. Mature size 60’ x 40’. Zone 4.

PRUNUS

DWARF FLOWERING ALMOND – *P. glandulosa* 'Rosea'. A clumping multi-stemmed shrub that produces fluffy pink pom-pom flowers in early spring. Flowers are great in fresh cut arrangements. Foliage is light green. Deciduous. Mature 6' x 6'. Zone 4.

KRAUTER VESUVIUS PLUM – *P. cerasifera* 'Krauter Vesuvius'. This tree is very similar to Thundercloud Plum in appearance, but is smaller and more upright. Very tolerant of hot, dry weather conditions. Foliage is dark purple and flowers are light pink. Mature height 20'. Zone 5.

THUNDERCLOUD PLUM – *P. cerasifera* 'Thundercloud'. Single, pink flowers appear in early spring before the deep purple foliage. The foliage retains its deep purple color through the season. Mature 20'. Zone 5.

BEACH PLUM – *P. maritima*. This fruiting shrub is native to coastal dunes of the Northeastern United States. Since colonial times, people have collected this wild fruit to make preserves and jelly. Will tolerate salt spray. Mature size 6' x 6'. Must have at least two for pollination. Zone 3.

PINK CASCADE® FLOWERING PEACH – *P. persica*. Bright pink double flowers on this ornamental weeping peach tree provide a colorful welcome to spring followed by burgundy foliage in summer. Rounded, weeping habit. Excellent for small landscapes. Mature at 12'-15' x 10'-12'. Zone 5.

PINK CASCADE® WEEPING CHERRY – *P. 'NCPH1'*. Developed at NC State, this is an improved weeping cherry. Cascading branches in spring are covered in bright pink blooms followed by dramatic purple-red to green foliage providing interest throughout the growing season. Grafted at 5'. Mature size 12 x 12'. Zone 5.

PURPLELEAF SAND CHERRY – *P. cistena*. White to light pink flower and rich purple leaves. Very hardy, multi-stemmed bush. Excellent hedging plant. Mature height 10'. Zone 2.

AKEBONO FLOWERING CHERRY – *P. yedoensis* 'Akebono'. This rapid growing variety produces soft pink, single flowers and forms a rounded spreading tree. Mature size is 25' x 25'. Zone 6.

Mt. Fuji
Flowering
Cherry

AUTUMN FLOWERING CHERRY – *P. subhirtella* 'Autumnalis Rosea'. An upright spreading tree with slender branches. Foliage is medium green turning yellow-to-bronze in the fall. Semi-double to double light pink flowers are produced in November and again in the spring. Mature size 25' x 22'. Zone 5.

KWANZAN FLOWERING CHERRY – *P. serrulata* 'Kwanzan'. The most popular of all flowering cherries has large, double, deep-pink flowers. Habit is upright and spreading. Leaves appearing with flowers are reddish copper, later turning to dark green. Mature height 25'. Zone 5.

MT. FUJI FLOWERING CHERRY – *P. serrulata* 'Mt. Fuji'. The open, horizontal, spreading, and somewhat weeping habit is covered with very large, white flowers in early spring. Also known as Shirotae. Mature size 15' x 30'. Zone 6.

OKAME FLOWERING CHERRY – *P. 'Okame'*. Small, pink flowers are early and long lasting. Habit is upright branching and oval in form. Nice fall color of yellow-orange to orange-red. Mature height 25'. Zone 5.

SHIROFUGEN FLOWERING CHERRY – *P. serrulata*. Fast growing flowering tree that has a wide spreading form. Large double flowers are purplish pink in bud opening to white. Young foliage is copper colored. Mature height 20-30'. Zone 5.

YOSHINO FLOWERING CHERRY – *P. x yedoensis*. Single, white-to-pink flowers are fragrant and bloom early spring. Foliage is dense and the leaves are glossy green. Growth habit is vigorous, with upright, spreading branches. Mature height 30'. Zone 6.

DOUBLE WEEPING CHERRY – *P. subhirtella* 'Pendula Plena Rosea'. A small tree with graceful, weeping branches covered with clouds of showy double, rose pink flowers in the spring. Top grafted. Zone 5.

SNOW FOUNTAINS® WEEPING CHERRY – *P. 'Snofozam'*. A graceful weeper with a cascading form displays single white flowers in the spring. Branching is compact. Fall color is golden to orange. Top grafted. Zone 5.

BONFIRE DWARF ORNAMENTAL PEACH – *P. persica* 'Bonfire'. Bonfire is a unique compact tree/shrub that is covered with soft pink, double flowers in early spring. Its leaves are an extraordinary deep burgundy that measure 8-10" in length. Foliage is very dense. Mature 6'. Zone 5.

DOUBLE RED FLOWERING PEACH – *P. persica*. Ornamental peach. Flowers are profuse double rose red blooms. Mature height 20'. Zone 5.

PYRUS

CLEVELAND SELECT FLOWERING PEAR – *P. calleryana* 'Cleveland Select'. Improved calleryana pear with better branching. This is an oval shaped flowering pear, with white blooms and glossy green foliage that turns red-orange in fall. Mature height 35'. Zone 4.

QUERCUS

BUR OAK – *Q. macrocarpa*. Bur Oak has the largest acorn of any North American Oak which when set against the heavily lobed green leaves is stunning. Excellent park tree due to its spreading branches and ultimate height. Mature size 55' x 45'. Zone 3.

PIN OAK – *Q. palustris*. Pin Oak is a tree with a very distinctive growth habit. The strong central leader is maintained to the top. Shape is pyramidal with slender horizontal branches. Fall color is rusty orange to red. Mature size 55' x 40'. Zone 4.

NORTHERN RED OAK – *Q. rubra*. Quick growing oak with an open crown and smooth bark on younger trees. Beautiful flame red leaves in fall that really set this oak apart from the rest. Mature size 50' x 45'. Zone 4.

SWAMP WHITE OAK – *Q. bicolor*. Dark green leaves that fade to yellow during the fall and beautiful exfoliating bark give this tree year around beauty. Tolerant to adverse growing conditions. Mature 45' x 45'. Zone 4.

WHITE OAK – *Q. alba*. A resilient oak with dark green to almost dark blue green leaves that turn deep red in autumn. New growth will emerge in a soft shade of pink the following spring. Mature size 45' x 45'. Zone 4.

WILLOW OAK – *Q. phellos*. This is a well formed, broad, cone-shaped tree. Glossy dark green leaves turn pale gold in fall. Mature size 60' x 40'. Zone 5.

SALIX

GOLDEN WEeping WILLOW – *S. alba tristis* 'Niobe'. Leaves are yellow-green, turning yellow in the fall. Habit is fast growing, rounded, and weeping. Mature 50'. Zone 3.

BABYLON WEeping WILLOW – *S. babylonica*. Attractive green pendulous branches create a waterfall effect. Fall color is yellow. Mature height 50'. Zone 6.

WEeping PUSSY WILLOW – *S. caprea* 'Pendula'. This graceful weeper will display beautiful silvery catkins in late winter. The catkins will open to reveal one of the first signs of spring. Mature height 8'. Top grafted. Zone 4.

Golden Weeping Willow

HAKURO NISHIKI WILLOW – *S. integra* 'Hakuro Nishiki'. A beautiful willow with variegated, tri-colored foliage of pink, white and green. Zone 4.

ARCTIC BLUE WILLOW – *S. purpurea* 'Nana'. Very attractive, rounded, weeping form with finely textured blue green leaves. Zone 4.

STEWARTIA

JAPANESE STEWARTIA – *S. pseudocamellia*. Medium sized tree with camellia-like flowers in July – August and attractive red purple fall color. Beautiful cream and tan patches are revealed as its trunk begins to exfoliate with age. Mature height 30'. Zone 6.

STYRAX

JAPANESE SNOWBELL – *S. japonicus*. A beautiful small tree, covered in June by pure white, pendulous bell-shaped flowers with bright yellow stamens. Mature size 20'. Zone 5.

SYRINGA

FLOWERFESTA® PURPLE TREE FORM – *S. meyeri* 'Flowerfesta® purple'. PP31,300. This reblooming dwarf lilac on standard boasts abundant fragrant light purple flowers in early summer, then again in fall. Zone 5.

IVORY SILK JAPANESE TREE FORM – *S. reticulata* 'Ivory Silk'. Habit is compact yet sturdy with its upright spreading branches that become rounded with time. Foliage is deep green and the tree is covered in early summer with creamy white flower plumes. Mature 20' x 15'. Zone 4.

MISS KIM TREE FORM – *S. patula*. Compact yet vigorous lilac on standard, with fragrant, pale purple flower buds opening to a lavender blue. Zone 3.

PALIBIN TREE FORM – *S. meyeri* 'Palibin'. A favorite Korean lilac on a standard. Soft lilac purple flowers in mid spring. Mature size 6' x 5'. Zone 3.

TAXODIUM

BALD CYPRESS – *T. distichum*. Swamp native, deciduous pyramidal conifer with soft, feathery light green foliage that turns to an orange-brown color in fall. Tolerates a wide range of soil conditions. Mature at 50-70' high and 20-45' wide. Zone 4.

TILIA

GREENSPIRE® LINDEN – *T. cordata* 'Greenspire'. Habit is pyramidal in shape with uniform branching and a strong central leader. Foliage is dark green and the fall color is yellowish. Mature height 40'. Zone 4.
